Sport England Ref: PA/22/E/GCS/62057

FAO Fiona Bradley

Thank you for consulting Sport England on the above application. I have received representations from the applicant to advise that the projected population would be 732 persons.

Sport England – Non Statutory Role and Policy

The Government, within their Planning Practice Guidance (Open Space, Sports and Recreation Facilities Section) advises Local Planning Authorities to consult Sport England on a wide range of applications. <https://www.gov.uk/guidance/open-space-sports-and-recreation-facilities-public-rights-of-way-and-local-green-space#open-space-sports-and-recreation-facilities>

This application falls within the scope of the above guidance as it relates to residential development of more than 300 units.

Sport England assesses this type of application in light of the National Planning Policy Framework (NPPF) and against its own planning objectives, which are Protect - To protect the right opportunities in the right places; Enhance - To enhance opportunities through better use of existing provision; Provide - To provide new opportunities to meet the needs of current and future generations. Further information on the objectives and Sport England's wider planning guidance can be found on its website: <https://www.sportengland.org/how-we-can-help/facilities-and-planning/planning-for-sport>

The occupiers of new development, especially residential, will generate demand for sporting provision. The existing provision within an area may not be able to accommodate this increased demand without exacerbating existing and/or predicted future deficiencies. Therefore, Sport England considers that new developments should contribute towards meeting the demand that they generate through the provision of on-site facilities and/or providing additional capacity off-site. The level and nature of any provision should be informed by a robust evidence base such as an up to date Sports Facilities Strategy, Playing Pitch Strategy or other relevant needs assessment.

The Proposal and Assessment against Sport England's Objectives and the NPPF

The population of the proposed development is estimated to be approximately 732. This additional population will generate additional demand for sports facilities. If this demand is not adequately met then it

may place additional pressure on existing sports facilities, thereby creating deficiencies in facility provision. In accordance with the NPPF, Sport England seeks to ensure that the development meets any new sports facility needs arising as a result of the development.

You may be aware that Sport England's Sports Facilities Calculator (SFC) can help to provide an indication of the likely demand that will be generated by a development for certain facility types. The SFC indicates that a population of 732 in this local authority area will generate a demand for:

FACILITY	DEMAND	COST
Sports Hall	0.22 ct	£149,485
Swimming Pool	7.79m2	£150,277

These figures indicate that this development should be contributing towards off-site provision for sports facilities in the locality. A contribution of £299,762 can be justified in order to enhance existing sports facilities in the locality.

Sport England, in conjunction with Public Health England, has produced 'Active Design' (October 2015), a guide to planning new developments that create the right environment to help people get more active, more often in the interests of health and wellbeing. The guidance sets out ten key principles for ensuring new developments incorporate opportunities for people to take part in sport and physical activity. The Active Design principles are aimed at contributing towards the Government's desire for the planning system to promote healthy communities through good urban design. Sport England would commend the use of the guidance in the master planning process for new residential developments. The document can be downloaded via the following link:

<https://www.sportengland.org/how-we-can-help/facilities-and-planning/design-and-cost-guidance/active-design>

Conclusion

This being the case, Sport England offers its **support** for this this application, subject to the securing of a financial contribution as set out above. If no financial contribution is secured, we would object to this application as the proposal would not secure anything in relation to sports facilities.

The absence of an objection to this application, in the context of the Town and Country Planning Act, cannot be taken as formal support or consent from Sport England or any National Governing Body of Sport to any related funding application, or as may be required by virtue of any pre-existing funding agreement.

We would be grateful if you would advise us of the outcome of the application by forwarding a copy of the decision notice.

Yours sincerely,

Philip Raiswell
