

ENVIROWASH

the most effective wheelwash system available

Envirowash keeping your site clean

Our **wheelwash** solutions will keep your vehicles free from mud, dirt and dust whilst **protecting the environment** and the highways from site debris.

Garic offer a number of wheel washing techniques, using ground-breaking technology and environmentally friendly systems that provide an **unrivalled wheel-clean experience**.

From our **Enviro Wheelwash** system to Disease Control solutions, our team of experts can deliver and set up a wheel washing service to meet your exact needs.

Visit our website www.garic.co.uk for an online demo of our **Wheelwash** in action.

Envirowash tailored solutions

Enviro Power Wash (pictured on opposite page). This totally self-sufficient, fully powered unit is for the 'heavy duty sites' with serious sticky clay and muck. It copes easily with large numbers of trucks, dumpers and other kit. Blasted by huge volume water jets washing the wheels/tyres, chassis and underside of vehicles without them stopping (with or without ramps). Dig dimensions 13' x 20' x 3'36" (4m x 6.1m x 1m).

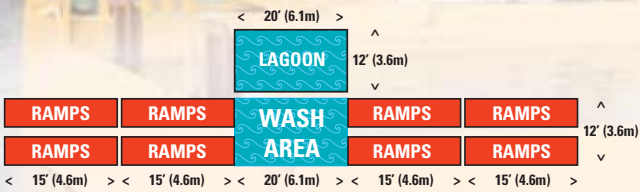

Elevated Enviro Wash For quick set-up and removal on short-term contracts or sites that require the heavy duty wash but 'no dig' for use on car parks, roads and surfaced areas. Recycles and re-circulates 100% of water separating the muck and debris in the lagoon area for easy removal and cleaning.

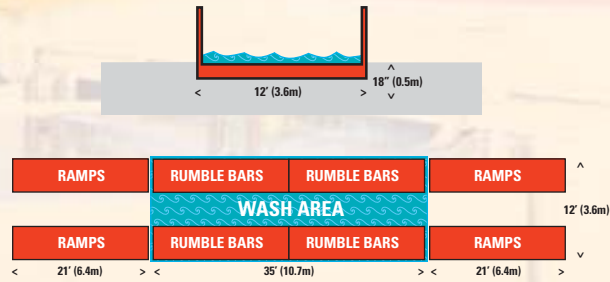

Drive Thru No power required, an inexpensive but very efficient wash system suited to quarries and sites that are not as dirty. Can be placed directly on top of roads etc. Alternatively can be dug-in (dig dimensions 13' x 35' x 18" (4m x 10.7m x 0.4m) so that no ramps are required. Easy clean system allows quick and safe cleaning of the unit with very little downtime. Available with extra rumble road sections if required.
