| Plan / Programme / Strategy | National Planning Policy Framework CLG (2012) |
| Level | National |
| Web Link | http://www.communities.gov.uk/planningandbuilding/planningsystem/planningpolicy/planningpolicyframework/ |
| Summary | |
| The National Planning Policy Framework (NPPF) sets out the Government's economic, environmental and social planning policies for England. It sets out the Government's requirements for the planning system and proposes a strong presumption in favour of sustainable development. | |

Key Objectives

(Para 17) Planning should: take account of and support local strategies to improve health, social and cultural wellbeing for all, and deliver sufficient community and cultural facilities and services to meet local needs.

(Para 28) To promote a strong rural economy, local and neighborhood plans should: promote the retention and development of local services and community facilities in villages, such as local shops, meeting places, sports venues, cultural buildings, public houses and places of worship.

(Para 70) To deliver the social, recreational and cultural facilities and services the community needs, planning policies and decisions should:

- plan positively for the provision and use of shared space, community facilities (such as local shops, meeting places, sports venues, cultural buildings, public houses and places of worship) and other local services to enhance the sustainability of communities and residential environments;
- guard against the unnecessary loss of valued facilities and services, particularly where this would reduce the community's ability to meet its day-to-day needs;
- ensure that established shops, facilities and services are able to develop and modernise in a way that is sustainable, and retained for the benefit of the community; and
- ensure an integrated approach to considering the location of housing, economic uses and community facilities and services.

(Para 155) Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made

Implications for the Local Plan

Deliver sufficient community and cultural facilities to meet local needs; support retention of local services; Seek early and meaningful involvement in plan making.

| <p>that mutual respect is fundamental to issues of integration and cohesion</p> <ul style="list-style-type: none"> • A commitment to equality that sits alongside the need to deliver visible social justice, to prioritise transparency and fairness, and build trust in the institutions that arbitrate between groups. |
