A. INTRODUCTION TO THE BASIC CONDITIONS STATEMENT BACKGROUND TO THE NEIGHBOURHOOD PLAN

1. The Fulbourn Neighbourhood Plan has been prepared by Fulbourn Parish Council. The application for designation of the Neighbourhood Area was approved by South Cambridgeshire District Council on 13th April 2018.
2. The designated Neighbourhood Plan Area coincides with the Parish Boundary and encompasses the Fulbourn Fen Nature Reserve, the village itself together with the area south of the village that abuts the Gog Magog Hills and is bounded to the north-west by Teversham and to the north-east by Little and Great Wilbraham. To the west it includes the Beechwoods Estate beyond which is the edge of Cambridge City (see fig.1).
3. The Neighbourhood Plan has given the community of Fulbourn the opportunity to define the key characteristics of their village and to guide future development and change: preserving what is important to local people and indicating how the village should evolve in future in the context of the growth of Cambridge and South Cambridgeshire.
4. The Neighbourhood Plan has been prepared within the context of the strategic objectives set out in the South Cambridgeshire Local Plan (adopted September 2018).
5. The Neighbourhood Plan covers the period up to 2031 and will be subject to review to ensure that it responds to changes over time and if necessary, policies and development guidelines will be revised for future phases of development.
6. Between 2018 and spring 2021, the Neighbourhood Plan Steering Group worked closely with the wider community, local businesses and South Cambridgeshire District Council (SCDC) and engaged extensively with statutory stakeholders, developers and landowners through the Pre-Submission consultation process (Reg. 14 Consultation).
7. The Reg.14 Consultation was held between 1st January 2021 and 28th February 2021. Amendments have been made to the Neighbourhood Plan to address issues raised in responses to the Reg. 14 consultation.
8. The Fulbourn Neighbourhood Plan is supported by a Consultation Statement and this Basic Conditions Statement.

What are the Basic Conditions?

9. The Neighbourhood Plan can only be put to a referendum and be adopted if it meets each of a set of basic conditions. The basic conditions are set out in paragraph 8(2) of Schedule 4B to the Town and Country Planning Act 1990 as applied to neighbourhood plans by section 38A of the Planning and Compulsory Purchase Act 2004. The basic conditions are:

- having regard to national policies and advice contained in guidance issued by the Secretary of State it is appropriate to make a neighbourhood plan.
 - the making of the neighbourhood plan contributes to the achievement of sustainable development.
 - the making of the neighbourhood plan is in general conformity with the strategic policies contained in the development plan for the area of the authority (or any part of that area).
 - the making of the neighbourhood plan does not breach, and is otherwise compatible with, EU obligations.
 - The making of the Neighbourhood Plan complies with other basic conditions, notably the Public Sector Equality Duty.
10. Throughout the process of developing the Fulbourn Neighbourhood Plan, the qualifying body has given consideration to how it will meet the basic conditions that must be met if the plan is to be successful at independent examination. This Basic Conditions Statement has been prepared to demonstrate to the independent examiner that the draft Fulbourn Neighbourhood Plan meets the basic conditions.
11. In accordance with the published Neighbourhood Planning Guidance, the Parish Council has discussed the basic conditions with the local planning authority.
12. This Statement addresses each of the five 'basic conditions' required by the Regulations and explains how the Neighbourhood Plan meets the requirements of paragraph 8 of Schedule 4B to the 1990 Town & Country Planning Act

What are the Legal Requirements?

13. There are five prescribed legal requirements for a neighbourhood plan:
- The plan is being submitted by a qualifying body. In a neighbourhood area that covers the whole or any part of the area of a parish / town council only a parish / town council can submit the neighbourhood plan. If the plan is for an area that includes the whole or part of the area of another parish or town council (a multi-parish plan), consent must be obtained from all of the parish / town councils whose area is included. This could take the form of a written consent form. Elsewhere the plan must be submitted by a designated neighbourhood forum.
 - The draft neighbourhood plan sets out policies in relation to the development and use of land in the whole or any part of a neighbourhood area. A neighbourhood plan must include land use planning policies that can be used in the determination of planning applications. It must also relate to a designated neighbourhood area. The statement needs to confirm these two matters, clearly stating which designated neighbourhood area the draft plan relates to.
 - The proposed neighbourhood plan states the period in which it is to have effect. This should be clearly shown on the front of the plan and confirmation of the period should also be included within the basic conditions statement.
 - The policies do not relate to excluded development. For example, county matters (mineral extraction and waste development) and Nationally Significant Infrastructure Projects.
 - The proposed neighbourhood plan does not relate to more than one neighbourhood area. You cannot submit a neighbourhood plan that relates to

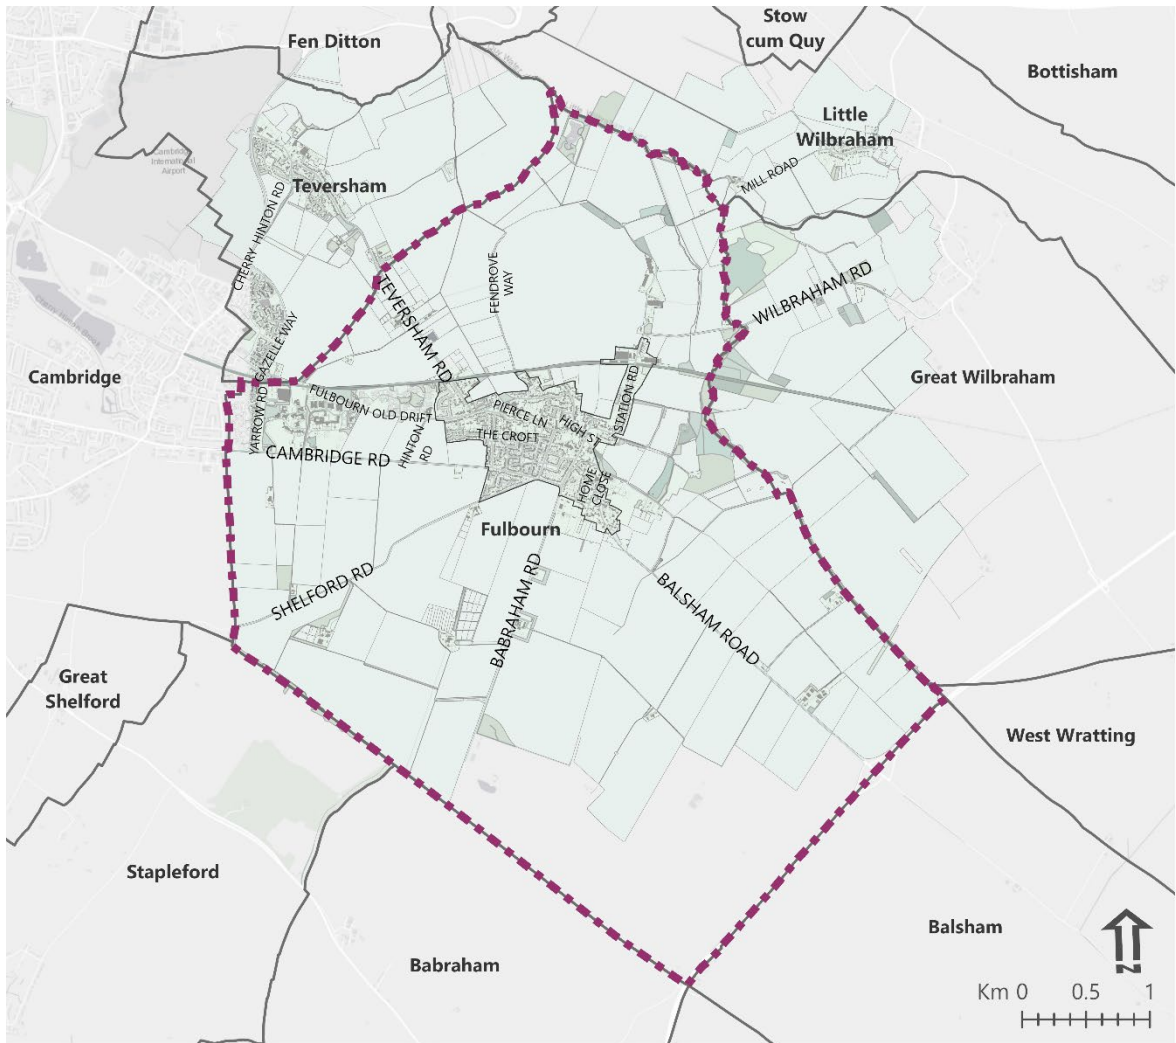

more than one neighbourhood area and there can only be one neighbourhood plan in force for each neighbourhood area.

14. The Fulbourn Neighbourhood Plan has been prepared and submitted by a qualifying body: Fulbourn Parish Council. It expresses policies that relate to the development and use of land only within the designated neighbourhood area. No provision for excluded development such as national infrastructure is contained within the Neighbourhood Plan. The Neighbourhood Plan does not relate to more than one neighbourhood area and relates solely to the Fulbourn Neighbourhood Plan Area as designated by South Cambridgeshire District Council on 13th April 2018. There are no other Neighbourhood Development Plans in place for the neighbourhood area.
15. A Strategic Environmental Assessment (SEA) and Habitat Regulations Assessment (HRA) Screening Opinion was prepared by Place Services on behalf of South Cambridgeshire District Council (SCDC) for the Fulbourn Neighbourhood Plan. The Plan does not allocate any land for development purposes and does not include any content that could give rise to significant negative effects on the environment, or any social or economic tenets of sustainability. It has therefore been determined that the Fulbourn Neighbourhood Plan can be screened out for its requirement of Strategic Environmental Assessment in line with the requirements of Directive 2001/42/EC. The HRA screening report indicates that the Fulbourn Neighbourhood Plan is not predicted to have likely significant effects on any Habitats site, either alone or in combination with other plans and projects. Natural England agreed that there are unlikely to be significant environmental effects from the proposed plan. The requirement for the Plan to undertake further assessment under the Conservation of Habitats and Regulations 2017 (as amended) has therefore been therefore screened out. This is addressed in detail in Section 5.

Structure of the Basic Conditions Statement

16. This document explains how the Fulbourn Neighbourhood Plan taken as a whole and the policies set out in it meet the requirements of each of the basic conditions and other legal tests. It is structured as follows:
 - Section B: sets out how the Neighbourhood Plan has had regard to national planning policies and advice.
 - Section C: explains how the 'making' of the Neighbourhood Plan contributes to the achievement of sustainable development.
 - Section D: explains how the 'making' of the Neighbourhood Plan is in general conformity with the strategic policies contained in the development plan for the area of the authority.
 - Section E: explains how the 'making' of the Neighbourhood Plan does not breach and is otherwise compatible with Environmental obligations.
 - Section F: explains how the 'making' of the Neighbourhood Plan complies with the Public Sector Equality Duty.
 - Section G: confirms how the prescribed conditions are met in relation to the Neighbourhood Plan and prescribed matters have been complied with in connection with the proposal for the Neighbourhood Plan.

-  Parish Boundaries
-  Development Framework

B. BASIC CONDITION 1: CONFORMITY WITH NATIONAL POLICY AND GUIDANCE

Introduction

17. To meet this condition, the Neighbourhood Plan must be shown to have regard to national policies and advice contained in guidance issues by the Secretary of State.
18. There is an obligation for any Neighbourhood Plan to have regard to the National Planning Policy Framework (NPPF). The NPPF is the key document setting out the Government's planning policies for England and how these are expected to be applied. First introduced in March 2012 and as subsequently updated in July 2018, February 2019 and July 2021, it sets out the Government's planning policies for England and how these are expected to be applied. Critically, it established a 'presumption in favour of sustainable development' unless there are policies which provide a specific reason for refusing development relating to areas or assets of particular importance. It provides a framework within which local people and their accountable local authorities can produce their own distinctive local and neighbourhood plans which reflect the needs and priorities of the community. The NPPF also stipulates that, where appropriate, the plans must reflect and promote relevant EU obligations and statutory requirements. Principally, the NPPF stipulates that any planned development is sustainable and achieves improvements in the environment, economy and wellbeing of people. However, the NPPF also makes it clear that in guiding development to sustainable solutions, the planning system must take into account local circumstances to reflect the character, needs and opportunities of each area.
19. The NPPF (July 2021) places particular importance on the creation of beautiful and distinctive places with a consistent and high quality standard of design which an area's defining characteristics. Paragraph 127 states that Neighbourhood planning groups can play an important role in identifying the special qualities of their area and explaining how this should be reflected in development, both through their own plans and by engaging in the production of design policy, guidance and codes by local planning authorities and developers.

Compliance with Principles of the NPPF

20. The NPPF states that the planning system should be genuinely plan-led with succinct and up-to-date plans providing a positive vision for the future of each area; a framework for addressing housing needs and other economic, social and environmental priorities; and a platform for local people to shape their surroundings.
21. The NPPF sets out a number of underlying principles for plan-making. Table 1 provides a summary of how the Fulbourn Neighbourhood Plan conform to these principles.
22. The NPPF also provides further details on the role of communities and the status of Neighbourhood Plans. Paragraph 29 advises that Neighbourhood Planning gives communities the power to develop a shared vision for their area. Neighbourhood

Plans can shape, direct and help to deliver sustainable development, by influencing local planning decisions as part of the statutory development plan. Neighbourhood Plans should not promote less development than set out in the strategic policies for the area or undermine those strategic policies.

Table 1: Conformity of the Fulbourn Neighbourhood Plan with overarching principles of NPPF

NPPF Overarching Principles	Fulbourn Neighbourhood Plan
a) Plans should be prepared with the objective of contributing to the achievement of sustainable development	The Neighbourhood Plan has been prepared to contribute to sustainable development. The Plan's objectives, policies and proposals address economic, social and environmental objectives.
b) Plans should be prepared positively, in a way that is aspirational but deliverable;	The Neighbourhood Plan has been prepared positively. The policies in the Neighbourhood Plan sets out robust criteria which reflect local concerns about the need to respond to the character of Fulbourn in terms of existing settlements, landscape, topography and heritage assets and to be of a high quality in design terms. The Neighbourhood Plan includes land use planning policies and actions which are in conformity with national, strategic and local planning policies and provides a clear and practical framework within which decisions on planning applications can be made. The Parish Council has worked closely with the local planning authority at each stage of preparation of the plan.
c) Plans should be shaped by early, proportionate and effective engagement between plan-makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;	The accompanying Consultation Statement sets out the details of the consultation which have been undertaken. In July 2019 a new survey of all households in the parish was initiated. This was done by way of a brief questionnaire delivered to each house with the Parish Council's quarterly "Pump" newssheet. The full results are available as part of the evidence base and specific findings and comments from villagers received in that survey are referred to throughout the relevant sections of the plan (see (EV619-621)). Further targeted surveys have been carried out regarding businesses in the parish and users of the local community facilities and recorded in a Community Engagement Log (EV505-507). A formal Regulation 14 public consultation was undertaken in January-February 2021. Responses received from the local community, statutory consultees and other stakeholders have been fully reviewed and

	changes have been made to the Draft Neighbourhood Plan where considered appropriate to address these. The Neighbourhood Plan has been prepared in close collaboration with South Cambridgeshire District Council. The community has confirmed through this consultation that there is general support for the vision and objectives set out in the Plan and the scope and purpose of the policies.
d) Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;	The Neighbourhood Plan policies and proposals have been prepared by a Neighbourhood Plan Steering Group comprising local residents, with support from planning consultants and planning officers at South Cambridgeshire District Council. Amendments have been made at key stages to improve the clarity and reduce ambiguity and in response to comments and representations made.
e) Plans should be accessible through the use of digital tools to assist public involvement and policy presentation; and	Updates and documents have been provided on the Neighbourhood Plan websites at all stages of plan preparation.
f) Plans should serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).	The objectives of the Neighbourhood Plan are clearly set out and the Plan has been amended and updated to reduce duplication of policies in the South Cambridgeshire Local Plan.

Compliance with Objectives of the NPPF

23. The NPPF has 13 key objectives which are:

- Delivering a sufficient supply of homes
- Building a strong, competitive economy
- Ensuring the vitality of town centres
- Promoting healthy and safe communities
- Promoting sustainable transport
- Supporting high quality communications
- Making effective use of land
- Achieving well designed places
- Protecting Green Belt Land
- Meeting the challenges of climate change and flooding
- Conserving and enhancing the natural environment

- Conserving and enhancing the historic environment
 - Facilitating the sustainable use of minerals
24. The Fulbourn Neighbourhood Plan contributes to meeting these objectives and promotes sustainable development together with improvements to the environment, economy and wellbeing of people (existing and new communities) in the Neighbourhood Area. It has been prepared having full regard to national policies and advice. The Vision underpinning the Neighbourhood Plan reflects this overall commitment:

‘In the period to 2031 Fulbourn village will continue to be a vibrant, sustainable and thriving local community with its own distinctive characteristics, separate from Cambridge yet complementary and benefiting from its proximity. It will have a locally distinctive built and natural environment and a wide provision of local services, strongly supported by the local community. New developments will ensure the ongoing success of Fulbourn providing suitable housing, employment, leisure facilities and local services whilst protecting and enhancing its natural and built assets for future generations’.

25. A detailed assessment has been undertaken of the neighbourhood area which is set out in the evidence base documents. The issues identified from our assessment of existing conditions and consultation with the local community, have provided the basis for the development of planning policies. The Neighbourhood Plan seeks to ensure that development is of a high quality which respects the character of the neighbourhood area and that the provision of necessary infrastructure is secured to meet the needs of new and existing communities.
26. Of particular relevance to the Neighbourhood Plan is the emphasis placed in the NPPF on good design and the protection of the natural and historic environment. The NPPF makes it clear that design quality must be considered throughout the evolution and assessment of individual proposals and that early discussion between applicants, the local planning authority and local community about the design and style of emerging schemes is important for clarifying expectations and reconciling local and commercial interests. Early, proactive and effective engagement with the community is expected.
27. The Neighbourhood Plan identifies 13 objectives which provide the basis for the policies in the Plan. These comprise the following:

Objective 1: Retain the character of Fulbourn as an individual village, separate from Cambridge- It is important for Fulbourn to continue to be a sustainable village retaining its key characteristics, separate from Cambridge, but recognizing the benefits of its proximity. This means that Fulbourn should retain its individuality as a village set within its rural landscape and that the Green Belt surrounding the parish should be sustained.

Objective 2: Enhance the rural environment surrounding the village- The rural environment of the Parish surrounding the village should be enhanced through encouraging further development of biodiversity and amenities both within the village and in the surrounding fields. This will include providing greater natural and

human connectivity between village and countryside and increased protection and biodiversity within the green spaces of the village.

Objective 3: Maintain and improve the character and distinctiveness of the village-

This will mean prioritising local distinctiveness in every element of change and growth and favouring sensitive development which enriches the landscape and enhances the character of the locality. As part of this effort, it will be important to support the conservation of our natural and built environmental assets for future generations, strengthen the character of the green spaces and also resist inappropriate development

Objective 4: Have a mix of housing affordable, available and suitable for all ages-

Within the village, it will be important to secure a range of housing to meet the needs of all ages to ensure that local residents and their families could continue to live in the village. The environmental sustainability of new and existing buildings should be optimised, encouraging high levels of energy efficiency, and other sustainable measures to mitigate the impacts of climate change.

Objective 5: Support business development and employment opportunities- The community is keen to continue to support and accommodate businesses within the village so that the local economy can continue to provide a suitable range of employment opportunities and essential services to the villagers and make a contribution to the wider economy of the region.

Objective 6: Improve amenities and community facilities- The community recognises the need to safeguard our existing local community assets and seek provision of complementary new or enhanced community facilities to meet all future needs and reduce the need to travel to access services

Objective 7: Increase the safety of local streets and lanes and enhance access to public transport services- Walking and cycling through the winding lanes and narrow streets of the village are part of the life and experience of Fulbourn and need to be supported through all measures that increase safety and comfort, while respecting local character. This is also essential to reduce carbon emissions and respond to the climate crisis. Future development should also be accompanied by strong support for walking, cycling and improvement of public transportation for the village as a whole.

Objective 8: Recognise the challenges of climate change and promote the application of appropriate measures through all aspects of development- The community of Fulbourn recognises the challenges posed by climate change and fully supports the application of the specific policies of the Local Plan. Locally specific measures are included in the various policies as appropriate.

28. The Neighbourhood Plan contains 16 policies. These are arranged under the following headings:

Protected Village Setting and Separation

Policy FUL/01: Protecting the Distinctiveness and Landscape Setting of Fulbourn
Policy FUL/02: Development outside the Development Framework

Enhanced Rural Environment

Policy FUL/03: Creating a Connected Green Infrastructure Network
Policy FUL/04: Protection and Enhancement of the Natural Environment

Local Green Spaces and Amenity Areas

Policy FUL/05: Local Green Space and Protected Village Amenity Areas

Village Character

Policy FUL/06: Protecting and Enhancing Village Character
Policy FUL/07: Building and Landscape Design
Policy FUL/08: Village Street and Lane Layout

Residential Development

Policy FUL/09: Larger Residential Development (10 or more units)
Policy FUL/10: Rural Exception Sites
Policy FUL/11: Housing Design Quality

Employment

Policy FUL/12: Employment Development
Policy FUL/13: Large Employment Sites

Community Facilities

Policy FUL/14: Community Facilities
Policy FUL/15: Healthcare Facilities

Sustainable Transport and Mobility

Policy FUL/16: Sustainable Mobility

29. An assessment of the objectives and policies of the Fulbourn Neighbourhood Plan against the objectives and guidance set out in the NPPF is provided in Table 2.

Table 2: Conformity of the Fulbourn Neighbourhood Plan with NPPF Objectives

NPPF Objective	Neighbourhood Plan Objective	Neighbourhood Plan Policy	Conformity of Neighbourhood Plan with NPPF
Delivering a sufficient supply of homes	Objective 4: Have a mix of housing affordable, available and suitable for all ages	FUL/09: Larger Residential Development (10 or more units) FUL/10: Rural Exception Sites FUL/11: Housing Design Quality	The Neighbourhood Plan recognises that major new housing developments are already under way adding around 15% to the number of dwellings in Fulbourn and exceeding assessed needs. Policy FUL/09 sets out the key requirements for larger residential development whilst Policy FUL/11 aim to guide infill development and potential windfall sites. Policy FUL/10 will allow for a recognised local need for affordable housing which cannot be satisfied elsewhere to be addressed subject to other policy requirements. New homes will be designed and constructed to a high-quality standard. They will be flexible and adaptable to different and changing lifestyles, providing for a variety of needs.
Building a strong, competitive economy	Objective 5: Support business development and employment opportunities	FUL/12: Employment Development	The Neighbourhood Plan supports employment development within the village or at its fringes provided the impact of car parking, traffic and HGV movement can be adequately mitigated and the countryside setting of Fulbourn is respected.

<p>Ensuring the vitality of town centres</p>	<p>Objective 3: Maintain and improve the character and distinctiveness of the village</p> <p>Objective 5: Support business development and employment opportunities</p> <p>Objective 6: Improve amenities and community facilities</p> <p>Objective 7: Increase the safety of local streets and lanes and enhance access to public transport</p>	<p>FUL/06: Protecting and Enhancing Village Character</p> <p>FUL/07: Building and Landscape Design</p> <p>FUL/08: Village Street and Lane Layout</p> <p>FUL/12: Employment Development</p> <p>FUL/14: Community Facilities</p> <p>FUL/16: Sustainable Mobility</p>	<p>A key objective of the Neighbourhood Plan is to ensure the vitality of the village centre with a range of employment, services and community facilities which will form a vibrant heart to the village.</p>
----------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<p>Promoting healthy and safe communities</p>	<p>Objective 1: Retain the character of Fulbourn as an individual village, separate from Cambridge Objective 2: Enhance the rural environment surrounding the village Objective 3: Maintain and improve the character and distinctiveness of the village Objective 4: Have a mix of housing affordable, available and suitable for all ages. Objective 6: Improve amenities and community facilities Objective 7: Increase the safety of local streets and lanes and enhance access to public transport services Objective 8: Recognise the challenges of climate change and promote the application of appropriate measures through all aspects of development</p>	<p>FUL/03: Creating a Connected Green Infrastructure Network Policy FUL/04: Protection and Enhancement of the Natural Environment Policy FUL/05: Local Green Space and Protected Village Amenity Areas Policy FUL/06: Protecting and Enhancing Village Character FUL/09: Larger Residential Development (10 or more units) FUL/10: Rural Exception Sites FUL/11: Housing Design Quality FUL/14: Community Facilities FUL/15: Healthcare Facilities FUL/16: Sustainable Mobility</p>	<p>The Neighbourhood Plan promotes social interaction; makes provision for social, recreational and cultural facilities and supports healthy lifestyles through the provision of safe and accessible green space and access to the countryside. The design of new development will create safe and accessible living environments with clear and legible pedestrian and cycle routes and high-quality public spaces. The development will encourage active lifestyles and social integration through everyday use of public areas</p>
<p>Promoting sustainable transport</p>	<p>Objective 7: Increase the safety of local streets and lanes and enhance access to public transport services</p>	<p>FUL/03: Creating a Connected Green Infrastructure Network Policy FUL/08: Village Street and Lane Layout</p>	<p>The Neighbourhood Plan promotes sustainable transport and mobility and seeks to mitigate the traffic impact of development. New development will be designed on active design</p>

	Objective 8: Recognise the challenges of climate change and promote the application of appropriate measures through all aspects of development	FUL/09: Larger Residential Development (10 or more units) FUL/12: Employment Development FUL/13: large Employment Sites FUL/16: Sustainable Mobility	principles. New homes will be located within short walking distance of open space, community facilities, shops, and schools to promote a healthy and active community. Movement within the village and surrounding area will be promoted via an integrated network of footpaths, cycleways and bridleways. This will help to create a vibrant, inclusive and healthy community with a distinctive sense of place. Walking and cycling will be prioritised.
Supporting high quality communications	Objective 4: Have a mix of housing affordable, available and suitable for all ages Objective 5: Support business development and employment opportunities Objective 6: Improve amenities and community facilities	FUL/09: Larger Residential Development (10 or more units) FUL/13: Large Employment Sites	The Neighbourhood Plan promotes the provision of new infrastructure to meet the needs of new and existing residents and businesses. No specific policy on communications as this is covered by the Local Plan.
Making effective use of land	Objective 1: Retain the character of Fulbourn as an individual village, separate from Cambridge Objective 3: Maintain and improve the character and distinctiveness of the village Objective 4: Have a mix of housing affordable,	FUL/01: Protecting the Distinctiveness and Landscape Setting of Fulbourn FUL/02: Development outside the Development Framework	The Neighbourhood Plan seeks to make the most effective use of land taking into account local characteristics and context. However, the Neighbourhood Plan also seeks to retain the character of Fulbourn as an individual village separate from Cambridge and to avoid coalescence. A key objective is to contain development within the Development

	<p>available and suitable for all ages</p> <p>Objective 5: Support business development and employment opportunities</p>	<p>Policy FUL/06: Protecting and Enhancing Village Character</p> <p>Policy FUL/04: Protection and Enhancement of the Natural Environment</p> <p>Policy FUL/07: Building and Landscape Design</p> <p>FUL/11: Housing Design Quality</p>	<p>Framework in order to protect the landscape setting of the village.</p>
<p>Achieving well designed places</p>	<p>Objective 1: Retain the character of Fulbourn as an individual village, separate from Cambridge</p> <p>Objective 3: Maintain and improve the character and distinctiveness of the village</p> <p>Objective 8: Recognise the challenges of climate change and promote the application of appropriate measures through all aspects of development</p>	<p>FUL/01: Protecting the Distinctiveness and Landscape Setting of Fulbourn</p> <p>Policy FUL/06: Protecting and Enhancing Village Character</p> <p>Policy FUL/07: Building and Landscape Design</p> <p>Policy FUL/08: Village Street and Lane Layout</p> <p>FUL/09: Larger Residential Development (10 or more units)</p> <p>FUL/10: Rural Exception Sites</p> <p>FUL/11: Housing Design Quality</p> <p>FUL/12: Employment Development</p> <p>FUL/13: large Employment Sites</p>	<p>The Neighbourhood Plan places great importance on maintain and improving the character of Fulbourn and promoting high quality design. Development should create a strong sense of place and local character, appropriate to the local area. Durable and high-quality buildings and public spaces will positively respond to local landscape character and history and reflect the identity of the local area. Design should reflect local aspirations and an understanding of the area's defining characteristics.</p>

<p>Protecting Green Belt Land</p>	<p>Objective 1: Retain the character of Fulbourn as an individual village, separate from Cambridge Objective 2: Enhance the rural environment surrounding the village</p>	<p>FUL/01: Protecting the Distinctiveness and Landscape Setting of Fulbourn FUL/02: Development outside the Development Framework FUL/03: Creating a Connected Green Infrastructure Network Policy FUL/04: Protection and Enhancement of the Natural Environment</p>	<p>The Neighbourhood Plan seeks to protect Fulbourn as an individual village set within a rural landscape, clearly distinct from Cambridge in development form and separated both visually and physically. The Village is located in the Green Belt surrounding Cambridge and has a well defined Development Framework boundary beyond which there is a presumption against development. The policies seek to protect the remaining visual and physical separation between Fulbourn and Cambridge, avoiding any development that could compromise the Green Belt and the individuality of Fulbourn and result in coalescence between settlements. A key objective of the Neighbourhood Plan is to protect and enhance the landscape and create a network of green spaces including protection of the Green Belt and opportunities to improve access to the countryside. The landscape setting of the village will be protected and enhanced through the creation of an extended network of accessible green spaces, with the retention of existing trees, hedgerows and landscape features.</p>
<p>Meeting the challenges of climate change and flooding</p>	<p>Objective 2: Enhance the rural environment surrounding the village Objective 8: Recognise the challenges of climate</p>	<p>FUL/02: Development outside the Development Framework</p>	<p>The Neighbourhood Plan policies support appropriate measures to ensure the future resilience of communities and infrastructure to climate change impacts. Policy FUL/09</p>

	change and promote the application of appropriate measures through all aspects of development	<p>FUL/03: Creating a Connected Green Infrastructure Network</p> <p>Policy FUL/04: Protection and Enhancement of the Natural Environment</p> <p>Policy FUL/05: Local Green Space and Protected Village Amenity Areas</p> <p>Policy FUL/07: Building and Landscape Design</p> <p>FUL/09: Larger Residential Development (10 or more units)</p> <p>FUL/11: Housing Design Quality</p> <p>FUL/12: Employment Development</p> <p>FUL/13: large Employment Sites</p> <p>FUL/16: Sustainable Mobility</p>	requires larger residential developments to set out clear measures to ensure there is no degradation of natural wetland ecosystems and an effective and sustainable drainage system is secured in perpetuity including future-proofing to meet the challenge of the climate emergency. Policy FUL/11 sets out housing quality criteria which are expected to be met in new development including high standards of energy efficiency and the use of renewable energy.
Conserving and enhancing the natural environment	<p>Objective 1: Retain the character of Fulbourn as an individual village, separate from Cambridge</p> <p>Objective 2: Enhance the rural environment surrounding the village</p> <p>Objective 3: Maintain and improve the character and distinctiveness of the village</p>	<p>FUL/01: Protecting the Distinctiveness and Landscape Setting of Fulbourn</p> <p>FUL/02: Development outside the Development Framework</p> <p>FUL/03: Creating a Connected Green Infrastructure Network</p>	A key objective of the Neighbourhood Plan is to protect and enhance natural assets and a number of policies seek to achieve this. The Neighbourhood Plan seeks to strengthen the identity of Fulbourn by supporting the creation of a Green Infrastructure Network and the increase of biodiversity and green spaces within the Neighbourhood Plan Area to add to the existing good natural spaces within the village, the Fulbourn nature reserve and the

		<p>Policy FUL/04: Protection and Enhancement of the Natural Environment</p> <p>Policy FUL/05: Local Green Space and Protected Village Amenity Areas</p> <p>Protecting and Enhancing Village Character</p> <p>Policy FUL/07: Building and Landscape Design</p> <p>FUL/09: Larger Residential Development (10 or more units)</p> <p>FUL/10: Rural Exception Sites</p> <p>FUL/11: Housing Design Quality</p> <p>FUL/12: Employment Development</p> <p>FUL/13: large Employment Sites</p>	<p>Fulbourn Fen Site of Special Scientific Interest (SSSI). This is considered vital for the identity of the village and the health and wellbeing of its inhabitants.</p>
<p>Conserving and enhancing the historic environment</p>	<p>Objective 1: Retain the character of Fulbourn as an individual village, separate from Cambridge</p> <p>Objective 2: Enhance the rural environment surrounding the village</p> <p>Objective 3: Maintain and improve the character and distinctiveness of the village</p>	<p>FUL/01: Protecting the Distinctiveness and Landscape Setting of Fulbourn</p> <p>FUL/01: Protecting the Distinctiveness and Landscape Setting of Fulbourn</p> <p>Policy FUL/06: Protecting and Enhancing Village Character</p>	<p>A key objective of the Neighbourhood Plan is to protect and enhance the character of the village including heritage assets. New development will be required to demonstrate that it has had regard to the historical development of Fulbourn. Designated and non-designated heritage assets will be protected and where possible enhanced. The layout and design of new development will be required to respond sensitively to context and character.</p>

		Policy FUL/07: Building and Landscape Design Policy FUL/08: Village Street and Lane Layout FUL/09: Larger Residential Development (10 or more units) FUL/10: Rural Exception Sites FUL/13: large Employment Sites	
Facilitating the sustainable use of minerals	The Plan area contains land within a Minerals Safeguarding Area (MSA) for sand and gravel within the County Council's adopted Minerals and Waste Core Strategy (Proposals Map C) (2011).	N/A	The Plan does not include any policies that conflict with the MSA or include any site allocations or proposals for extraction of mineral resources within Neighbourhood Plan area.

C. BASIC CONDITION 2: CONTRIBUTION TO SUSTAINABLE DEVELOPMENT

Introduction

30. National, strategic and local planning policies set a clear context for the Neighbourhood Plan and the overriding importance on the promotion of sustainable development. Contributing to the achievement of sustainable development is the core principle underpinning this Neighbourhood Plan. Delivering sustainable development involves seeking positive improvements in the quality of the built, natural and historic environment, as well as in people's quality of life including (but not limited to):
- widening the choice of high quality homes
 - improving the conditions in which people live, work, travel and take leisure
 - making it easier for jobs to be created in villages
 - protecting the natural environment and achieving net gains in biodiversity
 - promoting good design
31. There are three dimensions to sustainable development: economic, social and environmental. These dimensions give rise to the need for the planning system to perform a number of roles:
- **an economic role** – to help build a strong, responsive and competitive economy, by ensuring that sufficient land of the right types is available in the right places and at the right time to support growth, innovation and improved productivity; and by identifying and coordinating the provision of infrastructure;
 - **a social role** – to support strong, vibrant and healthy communities, by ensuring that a sufficient number and range of homes can be provided to meet the needs of present and future generations; and by fostering a well-designed and safe built environment, with accessible services and open spaces that reflect current and future needs and support communities' health, social and cultural well-being; and;
 - **an environmental role** – to contribute to protecting and enhancing our natural, built and historic environment; including making effective use of land, helping to improve biodiversity, using natural resources prudently, minimising waste and pollution, and mitigating and adapting to climate change, including moving to a low carbon economy.
32. The NPPF (para 9) makes clear that these objectives should be delivered through the preparation and implementation of plans and the application of the policies in the NPPF; they are not criteria against which every decision can or should be judged. Planning policies and decisions should play an active role in guiding development towards sustainable solutions, but in doing so should take local circumstances into account, to reflect the character, needs and opportunities of each area.
33. At the heart of the NPPF is a presumption in favour of sustainable development. Para 13 states that neighbourhood plans should support the delivery of strategic

policies contained in local plans or spatial development strategies; and should shape and direct development that is outside of these strategic policies.

Delivering Sustainable Development

34. The promotion of sustainable development sits at the heart of the Neighbourhood Plan. Policy AG1 is a general policy which supplements existing guidance and Policy GA1 to ensure that local character and distinctiveness are informed by the understanding of the local community and will be taken into account in the determination of planning applications. It also sets out the main principles of sustainable development and the measures needed to respond to a changing climate.
35. Local circumstances have been taken into account and preparation of the Neighbourhood Plan has responded to the different opportunities for achieving sustainable development. Table 3 summarises how the objectives and policies in the Plan contribute towards sustainable development as defined in the NPPF. Many of the objectives overlap the three strands of sustainability

Table 3: Assessment of The Neighbourhood Plan Objectives and Policies against Sustainable Development Objectives

Deliver Economic Sustainability	
NPPF Definition- Delivering a sufficient supply of new homes, building a strong, competitive economy and ensuring the viability of town centres	
Neighbourhood Plan Objectives	<p>Objective 4: Have a mix of housing affordable, available and suitable for all ages</p> <p>Objective 5: Support business development and employment opportunities</p> <p>Objective 6: Improve amenities and community facilities</p>
Neighbourhood Plan Policies	<p>FUL/09: Larger Residential Development (10 or more units)</p> <p>FUL/10: Rural Exception Sites</p> <p>FUL/11: Housing Design Quality</p> <p>FUL/12: Employment Development</p> <p>FUL/13: large Employment Sites</p> <p>FUL/14: Community Facilities</p> <p>FUL/15: Healthcare Facilities</p> <p>FUL/16: Sustainable Mobility</p>
<p>Commentary</p> <p>The Local Plan (2018) classifies Fulbourn as a Minor Rural Settlement (policy S/9) which states that “an indicative scheme size of 30 dwellings will be permitted’ within the Development Framework of the village. In addition, it allocates the Ida Darwin site for residential development (203 units have subsequently been approved). Major new housing development is underway adding around 15% to the number of dwellings in Fulbourn and exceeding assessed needs.</p> <p>The Plan supports residential and employment development within the Development Framework where these are in accordance with policy and will protect and enhance village</p>	

<p>character, provide a mix of housing which is affordable and available for all ages, support business development and improve amenities and community facilities. Policy FUL/10 sets out the criteria to be met by larger residential developments and Policy FUL/13 the requirements for larger employment sites.</p> <p>The Neighbourhood Plan seeks to support and accommodate businesses within the village so that the local economy can continue to provide a suitable range of employment opportunities and essential services to the villagers and make a contribution to the wider economy of the region.</p>	
<p>Deliver Social Sustainability</p>	
<p>NPPF Definition- Promoting healthy and safe communities</p>	
<p>Neighbourhood Plan Objectives</p>	<p>Objective 1: Retain the character of Fulbourn as an individual village separate from Cambridge</p> <p>Objective 2: Enhance the rural environment surrounding the village</p> <p>Objective 4: Have a mix of housing affordable, available and suitable for all ages</p> <p>Objective 5: Support business development and employment opportunities</p> <p>Objective 6: Improve amenities and community facilities</p>
<p>Neighbourhood Plan Policies</p>	<p>FUL/03: Creating a Connected Green Infrastructure Network</p> <p>Policy FUL/04: Protection and Enhancement of the Natural Environment</p> <p>Policy FUL/05: Local Green Space and Protected Village Amenity Areas</p> <p>Policy FUL/06: Protecting and Enhancing Village Character</p> <p>Policy FUL/07: Building and Landscape Design</p> <p>Policy FUL/08: Village Street and Lane Layout</p> <p>FUL/09: Larger Residential Development (10 or more units)</p> <p>FUL/10: Rural Exception Sites</p> <p>FUL/11: Housing Design Quality</p> <p>FUL/12: Employment Development</p> <p>FUL/13: Large Employment Sites</p> <p>FUL/14: Community Facilities</p> <p>FUL/15: Healthcare Facilities</p> <p>FUL/16: Sustainable Mobility</p>
<p>Commentary</p> <p>The Neighbourhood Plan promotes social interaction; makes provision for social, recreational and cultural facilities and supports healthy lifestyles through the provision of safe and accessible green space and access to the countryside. The design of new development will create safe and accessible living environments with clear and legible pedestrian and cycle routes and high-quality public spaces. Development will encourage active lifestyles and social integration through everyday use of public areas. Each village will provide community facilities. Access will be provided for all residents to high quality open</p>	

spaces and the wider countryside. Opportunities for sport and recreation will be promoted for all age groups.

The Neighbourhood Plan seeks to secure a range of housing to meet the needs of all ages to ensure that local residents and their families can continue to live in the village. The environmental sustainability of new and existing buildings is prioritised encouraging high levels of energy efficiency, and other sustainable measures to mitigate the impacts of climate change.

The Neighbourhood Plan seeks to support and accommodate businesses within the village so that the local economy can continue to provide a suitable range of employment opportunities and essential services to the villagers and make a contribution to the wider economy of the region.

The Neighbourhood Plan seeks to safeguard existing local community assets and to secure the provision of complementary new or enhanced community facilities to meet all future needs and reduce the need to travel to access services.

Deliver Environmental Sustainability

NPPF Definition- Promoting sustainable transport, achieving well designed places, meeting the challenge of climate change and flooding and conserving and enhancing the natural and historic environment

Neighbourhood Plan Objectives	<p>Objective 1: Retain the character of Fulbourn as an individual village, separate from Cambridge</p> <p>Objective 2: enhance the rural environment surrounding the village</p> <p>Objective 3: Maintain and improve the character and distinctiveness of the village</p> <p>Objective 7: increase the safety of local streets and lanes and enhance access to public transport services</p>
Neighbourhood Plan Policies	<p>FUL/01: Protecting the Distinctiveness and Landscape Setting of Fulbourn</p> <p>FUL/02: Development outside the Development Framework</p> <p>FUL/03: Creating a Connected Green Infrastructure Network</p> <p>Policy FUL/04: Protection and Enhancement of the Natural Environment</p> <p>Policy FUL/05: Local Green Space and Protected Village Amenity Areas</p> <p>Policy FUL/06: Protecting and Enhancing Village Character</p> <p>Policy FUL/07: Building and Landscape Design</p> <p>Policy FUL/08: Village Street and Lane Layout</p> <p>FUL/09: Larger Residential Development (10 or more units)</p> <p>FUL/10: Rural Exception Sites</p> <p>FUL/11: Housing Design Quality</p> <p>FUL/13: Large Employment Sites</p> <p>FUL/16: Sustainable Mobility</p>

Commentary

The Neighbourhood Plan seeks to strengthen the identity of Fulbourn by supporting the creation of a Green Infrastructure Network and the increase of biodiversity and green spaces within the Neighbourhood Plan Area to add to the existing good natural spaces within the village, the Fulbourn nature reserve and the Fulbourn Fen Site of Special Scientific Interest (SSSI). This is considered vital for the identity of the village and the health and wellbeing of its inhabitants. Policy FUL/03 supports the protection from development and establishment over time of a Green Infrastructure network which can extend from the Gog Magog Hills to the Little Wilbraham Fen forming an arc on the eastern side of Fulbourn village.

The Neighbourhood Plan seeks to promote local distinctiveness in every element of change and growth and favouring sensitive development which enriches the landscape and enhances the character of the locality. As part of this effort, it supports the conservation of our natural and built environmental assets for future generations, strengthen the character of the green spaces and also resist inappropriate development.

The Neighbourhood Plan policies support appropriate measures to ensure the future resilience of communities and infrastructure to climate change impacts. It seeks to optimise the environmental sustainability of new and existing buildings and to encourage high levels of energy efficiency, and other sustainable measures to mitigate the impacts of climate change. Development will be required to include a clear approach to deal with climate change, in accordance with the Policies of the Local Plan, and with best practice. It will be very important to consider drainage issues, green roofs and walls, energy efficiency, tree cover and measures to reduce the carbon footprint of travel by reducing the need to travel, providing enhanced walking and cycling facilities and, where appropriate, shared electric vehicles. All development will be required to adopt good design principles and positively respond to the guidance in the Fulbourn Village Design Guide SPD.

A number of locally significant sites are designated as Local Green Space in accordance with the NPPF.

The Neighbourhood Plan seeks to protect and enhance heritage assets. Policies require that development in Fulbourn will respect and have a positive relationship with heritage assets and village character. Historic boundaries, such as the former deer park pale and ditch will be respected, preserved and enhanced. The layout and design of new development will respond sensitively to the form, proportion, scale and character of the village.

D. BASIC CONDITION 3: GENERAL CONFORMITY WITH THE STRATEGIC POLICIES OF THE DEVELOPMENT PLAN

Introduction

36. The Development Plan currently consists of the South Cambridgeshire Local Plan 2018 which includes policies on a wide range of topics such as housing, employment, services and facilities, and the natural environment.
37. The Neighbourhood Plan has been prepared fully in accordance with the strategic policy context provided by the South Cambridgeshire Local Plan.
38. The Fulbourn Village Design Guide was adopted by South Cambridgeshire District Council as a Supplementary Planning Document (SPD) in January 2020 and is a material planning consideration in deciding planning applications. The Fulbourn Village Design Guide amplifies and builds on the requirements set out within policy HQ/1: Design Principles in the adopted 2018 Local Plan, and other policies within the Local Plan which relate to the built and landscape character, heritage and distinctiveness of South Cambridgeshire.
39. South Cambridgeshire District Council and Cambridge City Council have commenced work on a joint Local Plan for the two areas- the Greater Cambridge Local Plan. This is at an early stage of preparation. An initial Call for Sites and workshops took place in 2019 with a wide range of groups including Residents Associations, Parish Councils, landowners and agents, statutory consultees and others. Public consultation on preferred options is expected take place during November and December 2021. The Neighbourhood Plan will be subject to review following adoption of the new Local Plan.

The South Cambridgeshire Local Plan

Settlement Hierarchy

40. The South Cambridgeshire Local Plan sets out the policies guiding development in the District in the period up to 2031. This document provides the strategic policy context for preparation of the Neighbourhood Plan.
41. Local Plan Policy S/9 identifies Fulbourn as a 'Minor Rural Centre' within Policy S/9. Minor Rural Centres are generally less sustainable locations for new development than 'Rural Centres' however are identified as more sustainable than 'Group Villages' and 'Infill Villages' in the strategy for the rural area as they often perform a role in terms of providing services and facilities for a small rural hinterland. The Local Plan states that:

'Within Minor Rural Centres there is scope in principle for larger scale windfall development within the village framework. This would allow larger villages with a reasonable level of services to provide services and facilities for surrounding smaller villages to achieve more development. However, the overall scale of development should be restricted in recognition of their more limited services compared to Rural

Centres. A maximum scheme size of 30 dwellings is used as a guideline figure to indicate the upper limit of housing development likely to be suitable. Development will not be permitted on sites capable of accommodating scheme sizes significantly larger than 30 dwellings in Minor Rural Centres.'

42. Policy S/7 of the Local Plan covers policy regarding 'Development Frameworks'. Development Frameworks define where policies for the built-up areas of settlements give way to policies for the countryside. The Policy supports development within such frameworks (including that of Fulbourn), and includes further information on proposals outside development frameworks for Neighbourhood Plans, stating that:
- '(2) Outside development frameworks, only allocations within Neighbourhood Plans that have come into force and development for agriculture, horticulture, forestry, outdoor recreation and other uses which need to be located in the countryside or where supported by other policies in this plan will be permitted.'

Development Allocations in Fulbourn

43. Two major development opportunities are identified in the Local Plan:
- The Fulbourn and Ida Darwin Hospital sites inside the Green Belt (Policy H/3).
 - Land adjoining Peterhouse Technology Park on Fulbourn Road East (Policy E/3), at the edge of the Green Belt and adjoining open countryside, is allocated for employment use.
44. The Local Plan makes clear that both these sites need careful design and landscape to ensure that the character of the Green Belt is not compromised, no coalescence with Cambridge takes place and countryside views are protected.
45. Policy H/3 allocates the Fulbourn and Ida Darwin Hospitals for redevelopment, representing previously developed land in the Green Belt and also within the Fulbourn Hospital Conservation Area, to which enhancements are sought. The Policy states that redevelopment will comprise of the existing built footprint of the Ida Darwin Hospital into a different configuration, comprising residential redevelopment on the eastern part of the Ida Darwin site and the transfer of part of the building footprint to the Fulbourn Hospital site for new mental health facilities. It is anticipated that the Ida Darwin site could deliver 250 to 275 dwellings, although the total would depend on any buildings that would remain on the Ida Darwin site, and the amount of additional healthcare development required on the Fulbourn Hospital site. The Policy also states that redevelopment will create a green wedge on the western part of the Ida Darwin site to provide a compensatory enhancement to the openness of the Green Belt in this location. The site allocation is considered 'strategic to the delivery of homes' in the District and therefore is outside the influence of the Fulbourn Neighbourhood Plan.
46. Local Plan Policy E/3: Fulbourn Road East (Fulbourn) allocates 6.9 hectares of land adjoining Peterhouse Technology Park, again within the Green Belt, for employment use. Eastern parts of this allocation are located within the Fulbourn Neighbourhood Plan area. The Inner Green Belt Review 2012, and the independent Inner Green Belt Review 2015, undertaken jointly with Cambridge City Council, examined the Green Belt in detail and concluded that the area pertaining to this site, on the edge of Cambridge, is not considered of long term importance to Green Belt purposes. Given the level of need for jobs, it was considered that exceptional circumstances

exist to justify its release. The allocation is also considered 'strategic to the delivery of jobs' in the District and outside the influence of the Fulbourn Neighbourhood Plan.

47. The Local Plan also designates sites within village frameworks for the purpose of safeguarding areas of undeveloped land which are important to retain. Some of the Protected Village Amenity Areas (PVAAs) may have important functions for the village such as allotments, recreation grounds and playing fields whilst others have an important amenity role in providing a setting for buildings or offer tranquil areas where there is minimum activity.

Protected Village Amenity Areas (PVAAs) and Local Green Space Sites

48. PVAAs are safeguarded within 'Policy NH/11: Protected Village Amenity Areas' and are identified on the Local Plan Policies Map. The Policy states that development will not be permitted within or adjacent to these areas if it would have an adverse impact on the character, amenity, tranquillity or function of the village. The Fulbourn Neighbourhood Plan area contains three PVAAs surrounding Fulbourn Primary School, St Vigor's Church and Poorwell Water / The Horse Pond.
49. The National Planning Policy Framework (NPPF) introduces a new designation of Local Green Space, to identify and protect green areas of particular importance to a local community. The NPPF outlines that such designations should only be identified where the green space is in reasonably close proximity to the community it serves; where the green area is demonstrably special to a local community and holds a particular local significance (for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife); and where the green area concerned is local in character and is not an extensive tract of land. The Local Plan identifies 'Victorian garden, Fulbourn' as a Local Green Space site (reference NH/12-031), with protection under Policy NH/12: Local Green Space. This Policy states:

'Local Green Space identified on the Policies Map will be protected from development that would adversely impact on the character and particular local significance placed on such green areas which make them valued by their local community. Inappropriate development, as defined in the National Planning Policy Framework, would not be approved except in very special circumstances and in discussion with the local community.'

Design Quality

50. The Fulbourn Village Design Guide SPD supports South Cambridgeshire's policy that seeks to secure high quality design for all new developments, with a clear and positive contribution to the local and wider context. It describes the distinctive character of the village, and those aspects of its built and natural environment that the community most value and sets out clear design principles to guide future development proposals in and around the village of Fulbourn.
51. The Neighbourhood Plan builds upon and amplifies the Village Design Guide and requires that development proposals should demonstrate that they have considered and responded to the requirements of the Design Guide.

52. Policies FUL/01, FUL/02, FUL/06, FUL/07, FUL/08, FUL/10 and FUL/11 require development proposals to demonstrate compliance with the design principles and guidance in the Fulbourn Village Design Guide and any document that supersedes this.
53. An assessment of the Neighbourhood Plan policies against the relevant strategic policies is set out in Table 4.

Table 4: Conformity of the Fulbourn Neighbourhood Plan with Strategic Policies in the South Cambridgeshire District Plan

District Plan Policy Ref	Policy Requirements	Neighbourhood Plan Policy	Compliance of Neighbourhood Plan with Strategic Policies
Policy S/1: Vision	Residents will have a superb quality of life in an exceptionally beautiful, rural and green environment	All	Conformant: The Neighbourhood Plan is founded on the Village Design Guide which has been adopted by South Cambridgeshire District Council as an SPD. All policies seek to ensure Fulbourn will continue to be a vibrant, sustainable and thriving local community with its own distinctive characteristics with a locally distinctive built and natural environment and a wide provision of local services, strongly supported by the local community. It seeks to ensure that new developments will provide suitable housing, employment, leisure facilities and local services whilst protecting and enhancing its natural and built assets for future generations.
Policy S/2: Objectives of the Local Plan	<ul style="list-style-type: none"> • Protect the character of South Cambridgeshire including its built and natural heritage and Cambridge Green Belt. New development should enhance the area and protect and enhance biodiversity; • Deliver new developments of a high quality and well-designed with distinctive character that reflects their location and which responds to the challenges of climate change; 	Policy FUL/01 Policy FUL/02 Policy FUL/03 Policy Ful/04 Policy FUL/05 Policy FUL/06 Policy FUL/07	Conformant: Policies FUL/01 and FUL/02 aim to protect Fulbourn as an individual village set within rural landscape, clearly distinct from Cambridge in development form and separated both visually and physically. Policies FUL 03- FUL/05 aim to strengthen the identity of Fulbourn by supporting the creation of a Green Infrastructure Network and the increase of biodiversity and green spaces within the Neighbourhood Plan Area to add to the existing good natural spaces within the village, the Fulbourn nature

	<ul style="list-style-type: none"> • Ensure that all new developments provide or has access to a range of services and facilities that support healthy lifestyles and well-being for everyone; • Maximise potential for journeys to be made by sustainable modes of transport 	<p>Policy FUL/08 Policy FUL/09 Policy FUL/10 Policy FUL/11 Policy FUL/15 Policy FUL/16</p>	<p>reserve and the Fulbourn Fen Site of Special Scientific Interest (SSSI). Policies FUL/06 to FUL/08 aim to ensure that the unique characteristics of Fulbourn - resulting from more than a thousand years of human activity interacting with the natural and productive landscape - are maintained and, where possible, enhanced for the enjoyment of future generations.</p>
<p>Policy S/3: Presumption in Favour of Sustainable Development</p>	<p>The Council will always work proactively with applicants jointly to find solutions which mean that proposals that accord with the Local Plan and Neighbourhood Plans can be approved wherever possible, and to secure development that improves the economic, social and environmental conditions in the area unless material considerations indicate otherwise.</p>	<p>Policy FUL/09 Policy FUL/10 Policy FUL/11 Policy FUL/12 Policy FUL/12 Policy FUL/13 Policy FUL/14 Policy FUL/15 Policy FUL/16</p>	<p>Conformant: The Neighbourhood Plan promotes well designed sustainable development within the Development Framework which will provide suitable housing, employment, leisure facilities and local services whilst protecting and enhancing the environment. Policy FUL/9 sets out how larger housing developments can make a demonstrable contribution to sustainable development.</p>
<p>Policy S/4: Cambridge Green Belt</p>	<p>New development in the Green Belt will only be approved in accordance with Green Belt policy in the National Planning Policy Framework.</p>	<p>Policy FUL/01 Policy FUL/02</p>	<p>Conformant: Policies FUL/01 and FUL/02 aim to protect Fulbourn as an individual village set within rural landscape, clearly distinct from Cambridge in development form and separated both visually and physically. The Neighbourhood Plan recognises that development will not normally be permitted outside the</p>

			Development Framework and any development activity outside of it should comply with the NPPF (if included within the Green Belt) and Local Plan Policies NH/8 and S/7. Development proposals outside the Development Framework will be required to demonstrate that they do not compromise the special character and rural setting of Fulbourn and its visual and physical separation from Cambridge or other nearby settlements.
Policy S/6: The Development Strategy to 2031	<p>The need for jobs and homes will be met as far as possible in the following order of preference, having regard to the purposes of the Cambridge Green Belt:</p> <p>a. On the edge of Cambridge; b. At new settlements; c. In the rural area at Rural Centres and Minor Rural Centres</p> <p>Development in the rural area will be limited, with allocations for jobs and housing focused on Rural Centres and Minor Rural Centres, and rural settlement policies providing for windfall development for different categories of village consistent with the level of local service provision and quality of public transport access to Cambridge or a market town</p>	<p>Policy FUL/09</p> <p>Policy FUL/11</p> <p>Policy FUL/12</p> <p>Policy FUL/13</p>	Conformant: Policy FUL/09 sets out the key requirements for larger residential development, while Policies FUL10 and FUL/11 aim to guide infill development and potential windfall sites so that they make a positive contribution to the village and its specific housing needs. The Neighbourhood Plan makes provision for the site allocations in the Local Plan and for windfall development within the Development Framework boundary as required by the Local Plan for all Minor Rural Centres.
Policy S/7: Development Frameworks	1. Development and redevelopment of unallocated land and buildings within development frameworks (as shown on the Policies Map) will be permitted provided that:	<p>Policy FUL/01</p> <p>Policy FUL/02</p> <p>Policy FUL/10</p> <p>Policy FUL/11</p>	Conformant: Policy FUL/01 states that development will only be permitted where it respects and retains or enhances the setting and special character of Fulbourn as an individual village set in a rural landscape. Any development proposals must be located and designed so that they do not

	<p>a. Development is of a scale, density and character appropriate to the location, and is consistent with other policies in the Local Plan; and b. Retention of the site in its present state does not form an essential part of the local character, and development would protect and enhance local features of green space, landscape, ecological or historic importance; and c. There is the necessary infrastructure capacity to support the development.</p> <p>2. Outside development frameworks, only allocations within Neighbourhood Plans that have come into force and development for agriculture, horticulture, forestry, outdoor recreation and other uses which need to be located in the countryside or where supported by other policies in this plan will be permitted</p>		<p>have an adverse effect on the rural character and openness of the landscape setting. Policy FUL/02 reflects the presumption against development outside the Development Framework. Development proposals outside the Development Framework will be required to demonstrate that they do not compromise the special character and rural setting of Fulbourn and its visual and physical separation from Cambridge or other nearby settlements. Policies FUL10 and FUL/11 aim to guide infill development and potential windfall sites so that they make a positive contribution to the village and its specific housing needs.</p>
Policy S/9: Minor Rural Centres	Residential development and redevelopment up to an indicative maximum scheme size of 30 dwellings will be permitted within the development frameworks of Minor Rural Centres, as defined on the Policies Map	Policy FUL/10 Policy FUL/11	Compliant: The Neighbourhood Plan policies reflect Fulbourn's status as a Minor Rural Centre. Policies FUL10 and FUL/11 aim to guide infill development and potential windfall sites so that they make a positive contribution to the village and its specific housing needs.
Policy CC/1: Mitigation and Adaptation to Climate Change	Planning permission will only be granted for proposals that demonstrate and embed the principles of climate change mitigation and adaptation into the development	Policy FUL/09 Policy FUL/10 Policy FUL/11 Policy FUL/12 Policy FUL/13	Conformant: The Neighbourhood Plan is consistent with the Climate Change policies (Policies CC/1-CC/9). The design of new development is required to address climate change mitigation and to consider consider drainage issues, green roofs and walls, energy efficiency, tree cover and measures to reduce the carbon footprint of

		Policy FUL/14	travel by reducing the need to travel, providing enhanced walking and cycling facilities and, where appropriate, shared electric vehicles
Policy HQ/1: Design Principles	All new development must be of high quality design, with a clear vision as to the positive contribution the development will make to its local and wider context. Development proposals must preserve or enhance the character of the local urban and rural area and conserve or enhance important natural and historic assets and their setting. Development must be compatible with its location and appropriate in terms of scale, density, mass, form, siting, design, proportion, materials, texture and colour in relation to the surrounding area;	Policy FUL/06 Policy FUL/07 Policy FUL/08	Conformant: Policies FUL/06 to FUL/08 aim to ensure that the unique characteristics of Fulbourn are maintained and, where possible, enhanced for the enjoyment of future generations. Policy FUL/06 states that Development will be required to respect and contribute positively to the character areas and setting of Fulbourn through the application of the design principles and guidance in the Fulbourn Village Design Guide (2020), South Cambridgeshire District Council's Design Guide and any documents that supersede or complement these. Policy FUL/07 sets out local design criteria.
Policy NH/2: Protecting and Enhancing Landscape Character	Development will only be permitted where it respects and retains, or enhances the local character and distinctiveness of the local landscape and of the individual National Character Area in which is it located	Policy FUL/01 Policy FUL/06	Conformant: Policy FUL/01 states that development will only be permitted where it respects and retains or enhances the setting and special character of Fulbourn as an individual village set in a rural landscape and that any development proposals must be located and designed so that they do not have an adverse effect on the rural character and openness of the landscape setting.
Policy NH/4: Biodiversity	New development must aim to maintain, enhance, restore or add to biodiversity. Opportunities should be taken to achieve positive gain through the form	Policy FUL/04	Conformant: Policy FUL/04 sets out a range of measures to maintain, enhance and add to biodiversity and safeguard networks for

	and design of development. Measures may include creating, enhancing and managing wildlife habitats and networks, and natural landscape. The built environment should be viewed as an opportunity to fully integrate biodiversity within new development through innovation.		wildlife and includes a requirement for sustainable long-term maintenance and management.
Policy NH/5: Sites of Biodiversity or Geological Importance	Proposed development likely to have an adverse effect on land within or adjoining a Site of Biodiversity or Geological Importance (either individually or in combination with other developments), will not normally be permitted. Exceptions will only be made where the benefits of the development clearly outweigh any adverse impact.	Policy FUL/03 Policy FUL/04	Conformant: Policy FUL/03 requires development proposals to contribute towards the creation of an extended Green Infrastructure Network which connects with the Gog Magog Hills natural greenspace, the Fulbourn Nature Reserve and other important biodiversity sites. The extended Green Infrastructure Network will increase the area of accessible natural greenspace and provide improved access to the countryside. Policy FUL/04 seeks to maintain and enhance sites of biodiversity importance.
Policy NH/6: Green Infrastructure	The Council will aim to conserve and enhance green infrastructure within the district. Proposals which deliver the strategic green infrastructure network will be supported and all new developments will be required to contribute towards the enhancement of the green infrastructure network.	Policy FUL/03	Conformant: The Neighbourhood Plan supports the creation of a Green Infrastructure Network and the increase of biodiversity and green spaces within the Neighbourhood Plan Area to add to the existing good natural spaces within the village, the Fulbourn nature reserve and the Fulbourn Fen Site of Special Scientific Interest (SSSI). Policy FUL/03 states that development will not be permitted which would prejudice opportunities for the creation of an integrated Green Infrastructure Network connecting Fulbourn with the Gog Magog

			Hills and the wider area including Cambridge, the Shelfords and Stapleford through a network of high biodiversity spaces and countryside routes
Policy NH/8: Mitigating the impact of Development in and Adjoining the Green Belt	Any development proposals within the Green Belt must be located and designed so that they do not have an adverse effect on the rural character and openness of the Green Belt. Development on the edges of settlements which are surrounded by the Green Belt must include careful landscaping and design measures of a high quality	Policy FUL/01 Policy FUL/02 Policy FUL/06 Policy FUL/07 Policy FUL/08	Conformant: Policy FUL/01 Development will not be permitted which would encroach on or reduce the current dominant green aspect of the Important Visual Gap between Fulbourn and the boundary of the urban area of Cambridge and neighbouring Villages. Proposals will be required to demonstrate how visual encroachment and urbanisation, including light and noise pollution, of the Important Visual Gap has been minimised. Policy FUL/02 sets out design criteria for development outside the Development Framework to ensure it does not compromise the character and rural setting of Fulbourn.
Policy NH/9: Redevelopment of Previously Developed Sites and Infilling in the Green Belt	Redevelopment of Previously Developed Sites and Infilling in the Green Belt will be inappropriate development except for: a. The re-use of buildings provided that the buildings are of permanent and substantial construction, preserve the openness of the Green Belt and do not conflict with the purposes of including land in Green Belt; b. The extension or alteration of a building provided that it does not result in disproportionate additions over and above the size of the original building; c. The replacement of a building, provided the new building is in the same use, and not materially larger than the one it replaces; d. Limited infilling which has no greater	Policy FUL/02 Policy FUL/06 Policy FUL/10	Conformant: Policy FUL/02 sets out design criteria for development outside the Development Framework to ensure it does not compromise the character and rural setting of Fulbourn. The Local Plan makes clear that the Fulbourn & Ida Darwin Hospital and Fulbourn Road East site allocations need careful design and landscape to ensure that the character of the Green Belt is not compromised, no coalescence with Cambridge takes place and countryside views are protected. This is reflected in the Neighbourhood Plan Policies FUL/09 and FUL/13

	<p>impact upon the openness of the Green Belt and the purpose of including land within it than the existing development; e. The partial or complete redevelopment of previously developed sites (brownfield land), whether redundant or in continuing use (excluding temporary buildings), which would not have a greater impact on the openness of the Green Belt and the purpose of including land within it than the existing development.</p>		
<p>Policy NH/11: Protected Village Amenity Areas</p>	<p>Protected Village Amenity Areas are identified on the Policies Map where development will not be permitted within or adjacent to these areas if it would have an adverse impact on the character, amenity, tranquillity or function of the village.</p>	<p>Policy FUL/05</p>	<p>Conformant: Protected Village Amenity Areas are designated in the Neighbourhood Plan in accordance with the Local Plan</p>
<p>Policy NH/12: Local Green Space</p>	<p>Local Green Space will be protected from development that would adversely impact on the character and particular local significance placed on such green areas which make them valued by their local community.</p>	<p>Policy FUL/06</p>	<p>Conformant: A number of sites of local significance are designated as Local Green Space under Policy FUL/05.</p>
<p>Policy NH/13: Important Countryside Frontages</p>	<p>1. Important Countryside Frontages are defined where land with a strong countryside character either:</p> <ul style="list-style-type: none"> a. Penetrates or sweeps into the built-up area providing a significant connection between the street scene and the surrounding rural area; or b. Provides an important rural break between two nearby but detached parts of a development framework. 	<p>Policy FUL/01</p>	<p>Conformant: Important Countryside Frontages are defined in Policy FUL/01 accordance with Local Plan Policy NH/13 where land with a strong countryside character provides a significant connection between the village and surrounding rural area or an important rural break between parts of the development framework. Planning permission for development will be refused if it would compromise these purposes.</p>

	2. Planning permission for development will be refused if it would compromise these purposes		
Policy NH/14: Heritage Assets	Development proposals will be supported when they sustain and enhance the significance of heritage assets, including their settings, particularly designated heritage assets, non-designated heritage assets, the wider historic landscape, designed and other landscapes and historic places.	Policy FUL/06 Policy FUL/07 Policy FUL/08	Conformant: The Neighbourhood Plan requires development to respect and contribute positively to the character areas and setting of Fulbourn and to have regard to its historical development. Policy FUL/06 states that buildings identified as Non-Designated Heritage Assets in the Fulbourn Conservation Area Appraisal and subsequent documents will be protected and where possible enhanced.
Policy NH/15: Heritage Assets and Adapting to Climate Change	1. The retention and re-use of historic buildings and other heritage assets will be encouraged and supported as a sustainable resource. 2. Proposals for energy efficient and renewable energy measures for historic buildings which adequately safeguard their heritage significance will be permitted	Policy FUL/11	Conformant: Policy FUL/07 states that all new development, including infill, extensions and housing alterations, must be of a high design quality and demonstrate how the design principles and guidance set out in the Village Design Guide (2020) have been applied. Policy FUL/11 sets out design quality criteria.
Policy H/3: Fulbourn and Ida Darwin Hospitals	The redevelopment of the existing built footprint of the Ida Darwin Hospital into a different configuration, comprising residential redevelopment on the eastern part of the Ida Darwin site and the transfer of part of the building footprint to the Fulbourn Hospital site for new mental health facilities will be permitted. Redevelopment will create a green wedge on the western part of the Ida Darwin site to provide a compensatory enhancement to the openness of the	Policy FUL/01 Policy FUL/09	Conformant: The Neighbourhood Plan accommodates the site allocations in the Local Plan. Policy FUL/01 sets out the criteria for protecting the landscape setting of Fulbourn and the separation between The village and Cambridge. Policy FUL/09 sets out criteria for larger housing developments.

	Green Belt in this location. This green wedge will also provide enhanced public access to the countryside		
Policy H/8: Housing Density	Housing developments including rural exception sites, will achieve an average net density of 30 dwellings per hectare (dph) in Rural Centres, Minor Rural Centre villages, and Group villages. The net density on a site may vary from the above where justified by the character of the locality, the scale of the development, or other local circumstances.	Policy FUL/07	Conformant: Policy FUL/07 states that net density (as defined in the Local Plan) shall not exceed 30 dwellings per hectare (dph) in any particular part of the development, unless it can be demonstrated that higher densities are appropriate through a design-led approach respecting the character of the locality and the scale of development and are in accordance with other policies of this plan.
Policy H/9: Housing Mix	A wide choice, type and mix of housing will be provided to meet the needs of different groups in the community including families with children, older people, those seeking starter homes, people wishing to build their own homes, people seeking private rented sector housing, and people with disabilities.	Policy FUL/09 Policy FUL/10 Policy FUL/11	Conformant: Policy FUL/09 states that larger developments will be expected to deliver an appropriate housing mix taking into account local needs and circumstances, in accordance with Local Plan Policy H/9, including at least 5% built to accessible and adaptable dwellings M4(2) standard suitable for older residents.
Policy H/10: Affordable Housing	All developments of 11 dwellings or more to provide 40% affordable homes on site	Policy FUL/09	Conformant
Policy H/11: Rural Exception Site Affordable Housing	1. Affordable housing developments to meet identified local housing needs on small sites adjoining a development framework boundary will be permitted subject to: a. The number, size, design, mix and tenure of affordable homes are confined to, and appropriate to, meeting identified local needs; b. The development is of a scale and location appropriate to	Policy FUL/10	Conformant: Policy FUL/10 supports the development of rural exception sites subject to criteria which are consistent with the Local Plan.

	<p>the size, facilities and character of the settlement; c. For sites at settlements within or adjoining the Green Belt, that no alternative sites exist that would have less impact on Green Belt purposes; d. That the affordable homes are secured for occupation by those in housing need in perpetuity. Mortgagee in Possession clauses will be allowed where demonstrated to be necessary to enable development to proceed.</p> <p>2. In order to facilitate the delivery of significant additional affordable housing the Council will consider allowing some market housing on rural exception sites on viability or deliverability grounds.</p>		
Policy E/3: Fulbourn Road East (Fulbourn)	Development proposals will need to demonstrate how the site can be designed and landscaped to effectively mitigate impact on the wider Cambridge Green Belt.	Policy FUL/01 Policy FUL/02 Policy FUL/13	Conformant: The Neighbourhood Plan seeks to protect the character of the Green Belt and setting of the village. Policy FUL/13 states that development of the Peterhouse Extension site should be compliant with the Fulbourn Village Design Guide as well as the relevant policies of the South Cambridgeshire Local Plan
Policy E/12: Employment Development in Villages	Within development frameworks in villages, planning permission will be granted for new employment development (B1, B2 and B8 uses) or expansion of existing premises provided that the scale of development would be in keeping with the category and scale of the village, and be in character and scale with the location.	Policy FUL/07 Policy FUL/12	Conformant: Policy FUL/12 supports employment development within the village as long as the impact of car parking, traffic and HGV movement can be adequately mitigated and the Fulbourn countryside setting is protected. Policy FUL/07 requires new development to be in keeping with the character and scale of the village.

<p>Policy E/13: Employment Development on the Edges of Villages</p>	<p>Subject to Green Belt policy, new development for employment development (B1, B2 and B8 Use Classes) will be permitted on sites adjoining or very close to the development frameworks of villages where: a. It is demonstrated that there are no suitable buildings or sites within the settlement or nearby, or suitable buildings to reuse or replace in the countryside nearby. b. The site comprises previously developed land. If greenfield sites are proposed they will need to demonstrate no suitable previously developed sites are available. c. The proposal is justified by a business case, demonstrating that the business is viable. d. There is a named user for the development, who shall be the first occupant. A planning condition will be attached to any permission to this effect. e. The proposal is logically related to the built form of the settlement, the scale and form of the development would be in keeping with the category and scale of the village. f. The proposal would not have an unacceptable adverse impact on the character and appearance of the area and in particular the village edge and is in scale with the location. g. The site can be easily accessed on foot or cycle.</p>	<p>Policy FUL/12 Policy FUL/13</p>	<p>Conformant: Policies FUL/12 and FUL/13 support employment development within the village or at its fringes as long as the impact of car parking, traffic and HGV movement can be adequately mitigated and the Fulbourn countryside setting is protected.</p>
<p>Policy SC/3: Protection of Village Services and Facilities</p>	<p>Planning permission will be refused for proposals which would result in the loss of a village service, including village pubs, shops, post offices, banks and building societies, community buildings and meeting places, sports venues, cultural buildings, places of</p>	<p>FUL/14</p>	<p>Conformant: Policy FUL/14 states that proposals that result in the loss of community facilities will be resisted unless there is clear evidence that the asset is no longer required, or an alternative, suitable and enhanced facility is provided at</p>

	worship or health facilities, where such loss would cause an unacceptable reduction in the level of community or service provision in the locality		an accessible location within the village and with the support of the local community.
Policy SC/4: Meeting Community Needs	All housing developments will include or contribute to the provision of the services and facilities necessary to meet the needs of the development. The scale and range of this provision or contribution will be appropriate to the level of need generated by the development and will address the specific needs of different age groups, of people with disabilities, and faith groups and will be adaptable to population growth and demographic changes. The full range of services and facilities are likely to be required in new settlements and similar developments.	Policy FUL/09 Policy FUL/14 Policy FUL/15	Conformant: Policies FUL/14 and FUL/15 aim to secure the expansion of the Recreation Ground to serve the future needs of the village and to protect the provision of health care in a convenient and accessible location.
Policy SC/5: Community Healthcare Facilities	Proposals for Community healthcare facilities will be supported within development frameworks	FUL/15	Conformant: Policy FUL/15 aims to protect the provision of health care in a convenient and accessible location.
Policy SC/6: Indoor Community Facilities	All housing developments will contribute towards the provision of indoor community facilities to meet the need generated by the development.	Policy FUL/14	Conformant: The Neighbourhood Plan does not include new housing allocations but Policy FUL/14 states that where housing development is required to make a contribution towards community facilities, the expansion and strengthening of existing facilities will be the preferred option
Policy SC/7: Outdoor Play Space, Informal Open Space and	All housing developments will contribute towards Outdoor Playing Space (including children's play space and formal outdoor sports facilities), and	Policy FUL/04 Policy FUL/09 Policy FUL/11	Conformant: Policies FUL/14 aims to secure the expansion of the Recreation Ground to serve the future needs of the village

New Developments	Informal Open Space to meet the need generated by the development	Policy FUL/14	
Policy SC/8: Protection of Existing Recreational Areas, Allotments and Community Orchards	Planning Permission will not be granted for proposals resulting in the loss of land or buildings providing for recreational use, playing fields or for the loss of allotments or community orchards except where: a. They would be replaced by an area of equivalent or better quantity and quality and in a suitable location; or b. The proposed development includes provision of open space, or sports and recreation facilities of sufficient benefit to outweigh the loss; or c. An excess of provision in quantitative and qualitative terms is clearly demonstrated in all the functions played by the land or buildings to be lost, taking into account potential future demand and in consultation with local people and users d. Where replacement open space is to be provided in an alternative location, the replacement site / facility must be fully available for use before the area of open space to be lost can be redeveloped	Policy FUL/14	Conformant
Policy SC/9: Lighting Proposals	1. Development proposals which include new external lighting will only be permitted where it can be demonstrated that: a. The proposed lighting scheme and levels are the minimum required for reasons of public safety, crime prevention / security, and living, working and recreational purposes; b. Light spillage and glare are minimised; c. There is no unacceptable adverse impact on the local amenity of neighbouring	Policy FUL/02 Policy FUL/08	Conformant: Policy FUL/02 requires any development proposals outside the Development Framework to demonstrate that light pollution is limited, with appropriate levels of street lighting and avoidance of floodlighting (including sport facilities), where this would have an unacceptable impact on the environment, wildlife, the maintenance of dark skies or amenity as a result of noise and light pollution. Policy FUL/08 states that the detailed design of

	or nearby properties, or on the surrounding countryside.		new street layouts should minimise the use of lighting.
Policy TI/2: Planning for Sustainable Travel	Development must be located and designed to reduce the need to travel, particularly by car, and promote sustainable travel appropriate to its location. Planning permission will only be granted for development likely to give rise to increased travel demands, where the site has (or will attain) sufficient integration and accessibility by walking, cycling or public and community transport, including provision of new cycle and walking routes and protection and enhancement of existing routes including the Rights of Way Network.	Policy FUL/12 Policy FUL/16	Conformant: Policy FUL/16 aims to encourage ambitious sustainable transport and mobility as part of new development. The following order of priority should be evident in development proposals: pedestrians, cycling, public transport, innovative mobility, shared transport, private transport.
Policy TI/3: Parking Provision	Car parking provision should be provided through a design-led approach	Policy FUL/10 Policy FUL/11 Policy FUL/12 Policy FUL/13	Conformant
Policy TI/8: Infrastructure and New Developments	Planning permission will only be granted for proposals that have made suitable arrangements for the improvement or provision of infrastructure necessary to make the scheme acceptable in planning terms	Policy FUL/09 Policy FUL/10 Policy FUL/11 Policy FUL/12 Policy FUL/13	Conformant

E. BASIC CONDITION 4: COMPLIANCE WITH ENVIRONMENTAL OBLIGATIONS

Introduction

54. In order for a neighbourhood plan to meet the Basic Conditions to proceed to Referendum, the Local Planning Authority must determine whether a neighbourhood plan requires a Strategic Environmental Assessment (SEA), and/or a Habitats Regulations Assessment (HRA).
55. This requires the Plan to be assessed against the criteria set out in Schedule 1 to the Environmental Assessment of Plans and Programmes Regulations 2004 and the Conservation of Habitats and Species Regulations 2010 which transposed EC Habitats Directive 92/43/EEC into UK law.
56. As part of the process of making a Neighbourhood Plan, Fulbourn Parish Council has requested a screening opinion to see whether a Strategic Environmental Assessment is required. Such a requirement can be screened out if it is felt, based on the information available, that the Neighbourhood Plan would not have a likely significant environmental affect.
57. A Strategic Environmental Assessment (SEA) and Habitat Regulations Assessment (HRA) Screening Opinion was prepared by Place Services on behalf of South Cambridgeshire District Council (SCDC) for the Fulbourn Neighbourhood Plan. The Screening Opinion was based on the Regulation 14 pre-submission version of the Draft Neighbourhood Plan.
58. HRA screening is the initial assessment of the impacts of a land use proposal against the conservation objectives of Habitats sites. Specifically, it is to ascertain whether or not a proposal (either alone or in combination with other proposals) would potentially damage the internationally designated features of that site. European sites are also known as Natura 2000 sites.
59. An HRA Screening Report has been undertaken to accompany the Fulbourn Neighbourhood Plan in accordance with the Neighbourhood Planning (General) Regulations 2012.
60. The Strategic Environmental Assessment (SEA) and Habitat Regulations Assessment Screening Determination Statement (November 2020) and SEA and HRA screening Report (October 2020) are reproduced in Appendix 1 and the principal findings are summarised in this section. It is noted that some modifications have been made to the policy numbering and wording of the draft Neighbourhood Plan in response to Regulation 14 Consultation since the SEA/HRA Screening Report was prepared. However this has not resulted in any substantive policy changes or raised new issues which have not been addressed in the Screening Report. It is therefore considered that the SEA/HRA Screening Determination Statement remains valid.

Background

61. The Neighbourhood Plan has been prepared for town and country planning purposes and sets a framework for future development consent. The policies of the Neighbourhood Plan can be considered to determine the use of small areas at local level commensurate with their status in determining local planning applications.
62. The Neighbourhood Plan does not seek to modify the proposals in the District Plan or the quantity of development to be accommodated in the area but rather seeks to clarify the qualitative requirements of development taking into account local context in terms of, for example, the green infrastructure network, countryside setting, visual separation between the villages and location appropriate design. As such, the GANP provides further amplification of policies in the adopted Local Plan to assist developers and decision makers.
63. The Fulbourn Neighbourhood Plan does not include:
 - New and additional site allocations for development
 - Modification of the development quantities or breakdown of development types (such as housing typologies, employment space, etc)
 - Any changes to development boundaries
64. The Designated Boundary of the Neighbourhood Plan area does not include any European designated sites, such as Special Areas of Conservation (SAC), Special Protection Areas (SPA) and Ramsar sites.

Strategic Environmental Assessment

65. The European Directive 2001/42/EC requires a Strategic Environmental Assessment (SEA Directive) to be carried out for certain plans and programmes to assess their effects on the environment. This Directive was transposed in law by the Environmental Assessment of Plans and Programmes Regulations 2004. The purpose of a SEA is to provide a high level of protection for the environment and to integrate considerations of the environment into the preparation and adoption of plans with a view to promoting sustainable development. Under Article 3(2) of the SEA Directive and Regulation 5 (6) of the Environmental Assessment of Plans and Programmes Regulations 2004, Strategic Environmental Assessment (SEA) is only required for documents that determine land that are a minor modification of a plan that has already been subject to an SEA where it is considered that they are likely to have 'significant environmental effects'.
66. The role of the screening exercise has been to determine the likelihood of the Fulbourn Neighbourhood Plan (at the time of writing) to have significant effects on the environment. The likelihood of effects on the following required themes, as included within Annex I of the SEA Directive (2001/42/EC) has been considered:
 - Biodiversity;
 - Population;
 - Human health;
 - Fauna;
 - Flora;

- Soil;
- Water;
- Air;
- Climatic factors;
- Material assets;
- Cultural heritage including architectural and archaeological heritage;
- Landscape; and
- The interrelationship between the above factors.

67. The assessment of the likely significant effects on the Environment of the Fulbourn Neighbourhood Plan are summarised in the following table.

Table 5: Assessment of Likely Significant Effects on the Environment

Criteria for determining the likely significance of effects (Annex II SEA Directive)	Likelihood and summary of significant effects
<p>The degree to which the plan or programme sets a framework for projects and other activities, either with regard to the location, nature, size and operating conditions or by allocating resources.</p>	<p>The Plan sets out relevant policies which will be used to determine proposals for development within the Neighbourhood Plan area once adopted. The Plan does not include any allocations for development; instead housing needs will be met through the 'strategic' development of the Ida Darwin hospital site as identified for allocation within Policy H/3 of the adopted South Cambridgeshire Local Plan. The Neighbourhood Plan states that, 'Fulbourn has no need to propose further housing allocations but should encourage sustainable and high-quality development on the sites already allocated and within the Village Development Framework.' Policy FUL/10 of the Neighbourhood Plan, entitled 'Housing Development and Local Need' seeks to ensure that new housing development proposals of 10 or more units will be expected to take account of and demonstrate that they respond to identified local need. Various criteria are included within the Policy related to housing mix, a percentage of yields being affordable, net density and infrastructure obligations. A Neighbourhood Plan must demonstrate conformity with the strategic policies of the Local Plan and once brought into force, the policies it contains take precedence over existing non-strategic policies only in the Local Plan for that Neighbourhood Plan area. The degree to which the Plan sets a framework for projects through allocating resources is considered relatively low as Policy FUL/10 reiterates affordable housing thresholds and 'per hectare' net density requirements of Local Plan policies H/10 and H/8 respectively. The extent to</p>

	<p>which any conflicts exist between Policy FUL/10 and District level policies within the Local Plan will be considered between the Parish Council and the Local Planning Authority in finalising the Neighbourhood Plan, or otherwise through the independent examination of the Neighbourhood Plan.</p>
<p>The degree to which the plan or programme influences other plans or programmes including those in a hierarchy.</p>	<p>The Neighbourhood Plan provides policies for the Plan area, relevant to a local level only. The Neighbourhood Plan does not allocate any land for development purposes and its policies are considered to be in general conformity to that of the adopted South Cambridgeshire Local Plan. The Neighbourhood Plan, when/if 'made', will have weight in all planning decisions within the Plan area, however it should be acknowledged that issues identified as 'strategic' within the Local Plan will have priority over any of the Neighbourhood Plan policies. The degree to which the plan or programme influences other plans or programmes, including any development brief at the Ida Darwin hospital site, is therefore relatively low in the context of the Plan area.</p>
<p>The relevance of the plan or programme for the integration of environmental considerations in particular with a view to promoting sustainable development.</p>	<p>Neighbourhood Plans are required to contribute to the achievement of sustainable development. The Neighbourhood Plan policies seek to ensure environmental considerations are taken into account. The Neighbourhood Plan includes policies related (directly / indirectly) to ensuring environmental considerations will be integrated into any forthcoming development within the Plan area. These are:</p> <ul style="list-style-type: none"> · FUL/01: Respect for Local Character and Local Setting; · FUL/02: Protecting Setting of Fulbourn; and · FUL/04: Protection and Enhancement of Natural Features' <p>Irrespective of the adequacy of the above policies, adopted Local Plan policies apply within the Neighbourhood Plan area, which have been subject to thorough assessment within the Local Plan Sustainability Appraisal and Habitats Regulations Assessment. This ensures that environmental considerations, in particular with a view to promoting sustainable development, will be considered for all development proposals within the Neighbourhood Plan area.</p>
<p>Environmental problems relevant to the plan.</p>	<p>The Neighbourhood Plan reflects a small area and the Plan's policy content seeks to address environmental issues. The policy content of the adopted Local Plan will additionally apply to any proposals within the Neighbourhood Plan area. Local Plan policies have been subject to Sustainability Appraisal (SA) within the context of the Local Plan. The</p>

	<p>Neighbourhood Plan and this Screening Report identify the following potential (direct / indirect) environmental problems or sources of potential problems relevant to the Neighbourhood Plan area:</p> <ul style="list-style-type: none"> · The Plan area is within various SSSI Impact Risk Zones (IRZs). Development proposals within IRZs are required to be consulted on with Natural England, should they be of a type or size that could warrant negative effects on the relevant SSSI. · The Plan area contains the Fulbourn Fen SSSI to the east, which is in an 'unfavourable recovering' condition; as a result, all planning applications in the IRZ require consultation with Natural England. · Additionally the Wilbraham Fens SSSI borders the Neighbourhood Plan boundary to the north, the Great Wilbraham Common SSSI borders the Neighbourhood Plan boundary to the north east, the Fleam Dyke SSSI borders the boundary to the south east, the Roman Road SSSI borders the boundary to the south and the Gog Magog Golf Course SSSI borders the boundary to the south west. · Although the village of Fulbourn is within a Development Framework (as defined within the South Cambs Local Plan), the entirety of the land surrounding the built up area is located within the Cambridge Greenbelt. · A number of Priority Habitats (from the Priority Habitat Inventory³) are scattered throughout the Plan area, with some adjacent to the existing development framework boundary. These include good quality semi-improved grassland, lowland meadows, deciduous woodland, young trees woodland, traditional orchard, and lowland calcareous grassland. · The Plan area contains three Scheduled Monuments: Settlement site by Caudle Corner Farm; Iron Age ritual enclosure containing a Bronze Age barrow, and Roman cemetery; and Fleam Dyke. · There are approximately 53 Listed Buildings within the Plan area; the majority of these are associated with the Fulbourn Conservation Area forming the historic core of the village. · Of these Listed Buildings, there exists the Grade II* listed Church of St Vigor and the Grade II* listed Highfield House. Both of these listed buildings are located within the Conservation Area.
--	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

	<ul style="list-style-type: none"> · The majority of the Neighbourhood Plan area is within various Source Protection Zones (SPZs). SPZs are defined around large and public potable groundwater abstraction sites. The purpose of SPZs is to provide additional protection to safeguard drinking water quality through constraining the proximity of an activity that may impact upon a drinking water abstraction. Within the Neighbourhood Plan area, there lie areas of Zone I (Inner Protection Zone), Zone II (Outer Protection Zone) and Zone III (Total Catchment). · The majority of chalk streams suffer from low summer flow, which has been increasing in recent years due to over-abstraction from the aquifer and surface water sources. · Land within Flood Risk Zones 3 and 2 exist at the Neighbourhood Plan boundary's eastern boundary associated with the Cam Valley river system, and the Little Wilbraham River (also a County Wildlife Site). · The non-developed areas of the Plan area consist of Grade 2 ('very good') and Grade 3 ('good to moderate') soils. The Neighbourhood Plan area does not contain any Grade 1 ('excellent') soil, which represents the best and most versatile soil within the wider District context and also the country. · The Plan area is located within the East Anglian Chalk National Character Area (NCA). · The East Anglian Chalk NCA is characterised as a visually simple and uninterrupted landscape of smooth, rolling chalkland hills with large regular fields enclosed by low hawthorn hedges, with few trees, straight roads and expansive views to the north. The Chalk produces water that is naturally mineral rich, sediment free and of a stable temperature and as such supports specialised chalk stream ecology. A series of important nature reserves are located along the springline at the base of the chalk scarp, notably at Chippenham, Fulbourn and Fowlmere. · Medieval moated sites, park lands and nucleated villages are distinctive features of medieval settlement on the Chalk, many of which are preserved in the grounds of later country estates (for example Barrington, Sawston and Fulbourn), and many are also Scheduled Monuments. · The Plan area contains areas of land which are identified as Minerals Safeguarding Areas for sand and gravel within the Adopted Cambridgeshire County Council Minerals Core Strategy (2011).
--	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<p>The relevance of the plan or programme for the implementation of Community legislation on the environment (e.g. plans and programmes linked to waste management or water protection).</p>	<p>The content of the Neighbourhood Plan is not in conflict with those relevant planning documents within the wider district and county area related to waste management or water protection.</p>
<p>The probability, duration, frequency and reversibility of the effects on the following factors:</p>	<p>The following impacts have been identified within this Screening Assessment:</p>
<p>Biodiversity</p>	<p>The Plan includes Policy FUL/04 – Protection and Enhancement of Natural Features, which seeks to ensure that new development of any size shall incorporate measures to protect, enhance and extend existing natural features in the Plan area. The Plan area lies outside the Impact Risk Zone (IRZ) of the Devils Dyke SAC, Wicken Fen Ramsar site and Fenland Special Area of Conservation (SAC). The HRA Screening element of this Report concludes that there would be no likely significant effects resulting from the Plan alone or in-combination with other plans and projects. This is due to the Plan not introducing any new residential or employment development proposals which would result in any direct impacts. The Plan area is within the IRZs of numerous SSSIs within the Plan area however, or those that are otherwise in close proximity to the Neighbourhood Plan area. The implications of this are that all new non-Plan-led housing developments within the Plan area will require an assessment of recreational pressure on relevant SSSIs and measures to mitigate adverse impacts e.g. alternative open space provision (as espoused by Natural England). Consultation with Natural England is considered a development management issue (in so far as consultation is required at that stage), and relevant policies exist within the adopted South Cambridgeshire Local Plan. In consideration of all of the above, effects on biodiversity resulting from the Plan can therefore be ruled out at the time of writing.</p>

Population	<p>The Neighbourhood Plan includes Policy FUL/16 – Recreational and Healthcare Facilities, which includes criteria related to infrastructure provision / contributions, the expansion of the current Recreation Ground, and support for any new multi-purpose healthcare, social and lifestyle support centre proposals that may come forward in the Plan period. There are no other significant effects resulting from the Neighbourhood Plan regarding human health that would warrant a strategic assessment through SEA. The Plan includes policies for the protection of open spaces and the enhancement of Green Infrastructure that contribute to healthy lifestyles.</p>
Fauna	<p>There are no direct impacts resulting from the Neighbourhood Plan on fauna that are considered significant at the Plan level. The Plan seeks the protection and enhancement of biodiversity at key sites and does not propose any development that could lead to any deterioration of habitats. It is possible that any number of speculative developments could be forthcoming within the Plan area that could have negative impacts on protected species, however these cannot be considered strategically significant to the extent that Strategic Environmental Assessment would be warranted. Such issues are more appropriate to be considered on a case-by-case 'project level' basis at the development management stage and in accordance with relevant development management policies contained within the LPA's adopted Local Plan</p>
Flora	<p>Numerous and various areas of Priority Habitat exist within the Plan Area. The Plan includes Policy FUL/04 – Protection and Enhancement of Natural Features, which seeks to protect and enhance existing biodiversity assets in the Neighbourhood Plan area. This Policy seeks to ensure that development proposals consider opportunities for biodiversity gain through species rich planting, the protection of existing mature trees and succession planting, and the integration of native species. In addition to this Policy's protection and enhancement of flora, South Cambridgeshire Local Plan policies apply. As a result, no effects are expected to result from the Neighbourhood Plan regarding flora.</p>
Soil	<p>The non-developed areas of the Neighbourhood Plan area consist of Grade 2 ('very good') and Grade 3 ('good to moderate') soils. The Neighbourhood Plan does not propose any development within this or any greenfield land within the Neighbourhood Plan area. There are no identified negative</p>

	implications surrounding soil quality as a result of the Neighbourhood Plan.
Water	The Plan area is within a groundwater Source Protection Zone (Zones I, II and III). The Neighbourhood Plan does not allocate land for any development purposes that could give rise to ground water pollutants (e.g. give rise to hazardous substances such as pesticides, oils, petrol and diesel, solvents, arsenic, mercury or chromium VI; or non-hazardous substances such as ammonia or nitrates). Pollution control policies at the LPA level apply within the Neighbourhood Plan area to ensure that no negative effects on water quality should be experienced within Fulbourn. The HRA element of this Report concludes that although water quality is a major issue of concern for the Wicken Fen Ramsar site, and thereby Fenland SAC, the Plan does not contain any policies or proposals that would give rise to any deterioration of water quality given that the Neighbourhood Plan area lies outside the Impact Risk Zone for this Ramsar site.
Air	There are no identified air quality issues within the Plan area. Although consultation with Natural England is required for any development that could cause air pollution (regarding industrial/agricultural development) in association with the IRZs of SSSIs in the eastern parts of the Plan area, consultation would be required at the planning application stage and is not considered a matter would warrant SEA, as a strategic process, to be undertaken.
Climatic Conditions	No policies exist within the Plan that address flood risk issues, although it should be acknowledged that existing adopted Local Plan policies regarding flood risk apply in the Plan area. The Neighbourhood Plan area contains a relatively large area of Flood Risk Zone 3 to the east of the development framework however no development allocations area proposed within the Plan that would lead to any incompatibilities in any such areas. It is therefore considered that SEA would not be required and any speculative development coming forward within Fulbourn in the Plan period can be considered at the planning application stage.
Material Assets	The Plan area contains land within a Minerals Safeguarding Area (MSA) for sand and gravel within the County Council's adopted Minerals and Waste Core Strategy (Proposals Map C) (2011). The Plan does not include any policies that conflict with the MSA or include any site allocations. Regarding other material assets, the content of the

	Neighbourhood Plan is not considered to have any significant effects due to the extent / size of the Plan area. Such issues are more appropriate to be considered on a case-by-case basis at the development management stage and in accordance with relevant development management policies contained within the LPA's adopted Local Plan.
Cultural Heritage	The Plan area contains multiple Scheduled Monuments and numerous Listed Buildings, as well as the Fulbourn Conservation Area. The Plan does not allocate any land for development purposes that could have any negative effect on any of these assets but does include some proposals for improved connectivity that may have effects on heritage that would need further exploration at the appropriate stage. The Plan includes policies that directly or indirectly regard heritage and the historic environment that will apply to all proposals in the plan area over the Plan period. These are: - Policy FUL/01 – Respect for Local Character and Local Setting; - Policy FUL/02 – Protected Setting of Fulbourn; - Policy FUL/06 – Securing Village Character; and - Policy FUL/08 – Building and Landscape Design Irrespective of the robustness of these policies in ensuring the protection and enhancement of heritage assets, policy also exists at the LPA level which additionally applies in the Plan area. The effects on heritage are, as a result, considered a development management issue in the context of the Plan and its content. There are not considered to be any elements of the Plan that would give rise to significant effects on the historic environment at the strategic level that would require the full application of the SEA Directive.
Landscape	The Plan area is within a sensitive landscape, both in regard to the protection objectives of the East Anglian Chalk National Character Area (NCA) and also the Cambridge Greenbelt. Nevertheless, the Plan does not allocate land for development purposes and includes policies relevant to landscape character and its preservation. In light of the Plan's policy stance regarding landscape character, and in consideration also of the requirements of development proposals in accordance with the South Cambridgeshire Local Plan, there are no significant strategic landscape effects identified within this Report that would warrant the requirement for the application of the SEA Directive and the formulation of a SEA Environmental Report.
The cumulative nature of effects	In line with the above considerations that explore the possible individual effects of the Plan's content, no

	significant effects have been highlighted as possible that could lead to any cumulative impact.
The trans-boundary nature of the effects	The adopted South Cambridgeshire Local Plan can be seen to support the protection and improvement of conditions relevant to those sustainability factors listed within the SEA Directive. The Neighbourhood Plan is not in conflict with these wider thematic policies. The HRA Screening element of this Report, which explores in-combination effects with other relevant plans and projects, also identifies no in-combination effects regarding Habitats (European) Sites.
The risks to human health or the environment	It is considered that there is no risk to human health or the environment as a result of the Neighbourhood Plan. This is in consideration of the above screening requirements related to sustainability themes. The Neighbourhood Plan is unlikely to give rise to any accidents that can be considered to have a significant risk to human health or the environment.
The magnitude of the spatial extent of the effects (geographical area and size of the population likely to be affected).	The Neighbourhood Plan relates to the local level only. No allocations are included within the Plan and the magnitude and spatial extent of the Plan's content is unlikely to be significant in a wider District context. Effects are not expected to be realised over a wide geographic area.
The value and vulnerability of the area likely to be affected due to: - special natural characteristics or cultural heritage - exceeded environmental quality standards - intensive land use	As highlighted above in the screening of the Neighbourhood Plan per sustainability theme, the Neighbourhood Plan has not been assessed as having any possible negative effect associated with environmental themes.
The effects on areas or landscapes which have a recognised national, community or international protection status.	As highlighted above in the screening of the Plan per sustainability theme, the Neighbourhood Plan has not been assessed as having any significant effects on areas or landscapes which have a recognised national, community or international protection status.

--	--

68. SCDC has consulted the statutory consultees (Historic England/Natural England/Environment Agency) on the Screening Report prepared by Essex Place Services and asked for their views on whether a SEA is required. Consultation responses were received from the three statutory consultees. Their conclusions are summarised below and their detailed comments are included in Appendix 2 of the Strategic Environmental Assessment (SEA) and Habitat Regulations Assessment Screening Determination Statement.
- **Historic England:** The Screening Report indicates that the Council considers that the plan will not have any significant effects on the historic environment. Historic England notes that the plan does not propose to allocate any sites for development. On the basis of the information supplied, and in the context of the criteria set out in Schedule 1 of the Environmental Assessment Regulations [Annex II of 'SEA' Directive], Historic England concurs with the Council that the preparation of a Strategic Environmental Assessment is not required (November 2020)
 - **Natural England:** It is Natural England's advice, on the basis of the material supplied with the consultation, that, in so far as their strategic environmental interests (including but not limited to statutory designated sites, landscapes and protected species, geology and soils) are concerned, that there are unlikely to be significant environmental effects from the proposed plan. Natural England agrees with the report's conclusions that the Fulbourn Neighbourhood Plan would not be likely to result in a significant effect on any European Site, either alone or in combination and therefore no further assessment work would be required (November 2020)
 - **Environment Agency:** Due to resource pressures they are no longer able to provide Local Planning Authorities with comprehensive bespoke advice on screening opinions. (October 2020)
69. The screening report concludes that as the Fulbourn Neighbourhood Plan does not allocate any land for development purposes and does not include any content that could give rise to significant negative effects on the environment, or any social or economic tenets of sustainability, it can therefore be screened out for its requirement of Strategic Environmental Assessment in line with the requirements of Directive 2001/42/EC.

Habitats Regulation Assessment

70. The Conservation of Habitats and Species Regulations 2010 (as amended in 2012) transpose the requirements of the European Habitats Directive 92/43/EEC into UK law. The Habitats Directive and Regulations afford protection to plants, animals and habitats that are rare and vulnerable in a European context.
71. Habitats Regulations Assessment (HRA) is a systematic process through which the performance of a plan or project can be assessed for its likely impact on the integrity of a European Site. European Sites, also referred to as Natura 2000 sites, consist of Special Protection Areas (SPA), Special Areas of Conservation (SAC);

Potential Special Protection Areas and candidate Special Areas of Conservation (pSPA and cSAC); and listed or proposed Ramsar sites.

72. Article 6(3) of the Habitats Directive states: ‘Any plan or project not directly connected with or necessary to the management of the site but likely to have a significant effect thereon, either individually or in combination with other plans and projects, shall be subject to appropriate assessment of its implications for the site in view of the site’s conservation objectives’. This will indicate whether a full Appropriate Assessment is required. The Local Authority is the ‘competent authority’ under the Conservation of Habitats and Species Regulations 2010, and needs to ensure that Neighbourhood Plans have been assessed through the Habitat Regulations process. This looks at the potential for significant impacts on nature conservation sites that are of European importance, also referred to as Natura 2000.
73. There are five Habitats sites which lie within 20 km of the Fulbourn Neighbourhood Plan area.
- Special Protection Areas (SPAs): None
 - Special Areas of Conservation (SACs): Fenland, Eversden and Wimpole Woods and Devils Dyke
 - Wetlands of International Importance (Ramsar Sites): Wicken Fen, Chippenham Fen

The assessment of potential impacts is summarised in Table 6.

Table 6: Assessment of Potential Impacts on Habitat Sites

Nature of Potential Impact	How the Fulbourn Neighbourhood Plan (alone or in combination with other plans and projects) could affect a Habitats site	Why these effects are not considered significant
Land take by development	The Fulbourn Neighbourhood Plan area is outside the boundaries of the Habitats Sites within scope of this HRA	N/A
Impact on protected species outside the protected sites	The Fulbourn Neighbourhood Plan area lies outside the 4km Impact Risk Zone (IRZ) for Devils Dyke and outside the IRZ 5km for Wicken Fen Ramsar site which is a component of Fenland SAC.	N/A

Recreational pressure and disturbance	There is public access to Eversden and Wimpole Woods SAC.	The Fulbourn Neighbourhood Plan area is 14km from Eversden and Wimpole Woods SAC so beyond the 10km distance that Natural England consider, in the absence of evidence that visitors are likely to travel to these sites for recreation. The site is carefully managed by the landowners to avoid impacts from recreational pressure and disturbance
Water quantity and quality	Although water quality is an issue of concern for Wicken Fen Ramsar site (and thereby Fenland SAC), Fulbourn Neighbourhood Plan area lies outside the 5km Impact Risk Zone, so it is considered that there is no pathway for water quantity or quality impacts.	N/A
Changes in pollution levels	The Fulbourn Neighbourhood Plan area lies outside the IRZ of the wetland SSSIs within scope of this HRA, so it is considered that there is no pathway for pollution impacts.	N/A

74. Each of the policies in the Fulbourn Neighbourhood Plan were screened to identify whether they would have any impact on a Habitats Site. The screening categorisation comprises:
- Category A: No Negative Effect
 - Category B: No Likely Significant Effect
 - Category C: Likely Significant Effect
75. The conclusions of this assessment are summarised in Table 7. There are no specific recommendations to deliver for the policies in the Reg 14 draft Neighbourhood Plan as they have all been assigned to Category A. There is therefore no need to amend the policy text as they are not predicted to have a Likely Significant Effect on any Habitats site.

Table 7: Assessment of potential impacts of Policies on Habitat Sites

Policy Number	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
<p>Policy FUL/01 – Respect for Local Character and Local Setting</p> <p>(Now Policy FUL/01- Protecting the Distinctiveness and Landscape Setting of Fulbourn)</p>	<p>No, Category A</p>	<p>No specific recommendations</p>
<p>Policy FUL/02 – Protected Setting of Fulbourn</p> <p>(Now Policy FUL/01- Protecting the Distinctiveness and Landscape Setting of Fulbourn)</p>	<p>No, Category A</p>	<p>No specific recommendations</p>
<p>Policy FUL/03 – Development in the Green Belt and Outside the Development Framework</p> <p>(Now Policy FUL/02- Development outside the Development Framework)</p>	<p>No, Category A</p>	<p>No specific recommendations</p>
<p>Policy FUL/04 – Protection and Enhancement of Natural Features</p> <p>(Now Policy FUL/03- Creating a Connected Green Infrastructure Network and Policy FUL/04 Protection and Enhancement of the Natural Environment)</p>	<p>No, Category A</p>	<p>No specific recommendations</p>
<p>Policy FUL/05 –Additional Protected Green Spaces within the Village</p>	<p>No, Category A</p>	<p>No specific recommendations</p>

(Now Policy FUL/05 Local Green Space and Protected Village Amenity Areas)		
Policy FUL/06 – Securing Village Character (Now Policy FUL/06 Protecting and Enhancing Village Character)	No, Category A	No specific recommendations
Policy FUL/07 – Street and Lane Layout (Now Policy FUL/08)	No, Category A	No specific recommendations
Policy FUL/08 – Building and Landscape Design (Now FUL/07)	No, Category A	No specific recommendations
Policy FUL/09 - Housing Design Quality (Now Policy FUL/11)	No, Category A	No specific recommendations
Policy FUL/10- Housing Development and Local Need (Deleted)	No, Category A	No specific recommendations
Policy FUL/11 - Ida Darwin and Teversham Road Sites (Now Policy FUL/09 Larger Residential Development (10 or more units))	No, Category A	No specific recommendations
Policy FUL/12 – Rural Exception Sites (Now Policy FUL/10)	No, Category A	No specific recommendations

Policy FUL/13 – Employment Development in General (Now Policy FUL/12)	No, Category A	No specific recommendations
Policy FUL/14 – Large Employment Sites (Now Policy FUL/13)	No, Category A	No specific recommendations
Policy FUL/15 – Rural and Edge of Village Employment (Deleted and combined with Policy FUL/12 Employment Development)	No, Category A	No specific recommendations
Policy FUL/16 – Valued Community Assets (Now Policy FUL/14 Community Facilities)	No, Category A	No specific recommendations
Policy FUL/17 – Recreational and Healthcare Facilities (Now Policy FUL/15 Healthcare Facilities)	No, Category A	No specific recommendations
Policy FUL/18 - Sustainable Mobility (Now Policy FUL/16)	No, Category A	No specific recommendations

76. The HRA screening report indicates that the Fulbourn Neighbourhood Plan is not predicted to have likely significant effects on any Habitats site, either alone or in combination with other plans and projects. The requirement for the Plan to undertake further assessment under the Conservation of Habitats and Regulations 2017 (as amended) is therefore screened out. Natural England has confirmed that it agrees with the report's conclusions that the Fulbourn Neighbourhood Plan would not be likely to result in a significant effect on any European Site, either alone or in combination and therefore no further assessment work would be required.

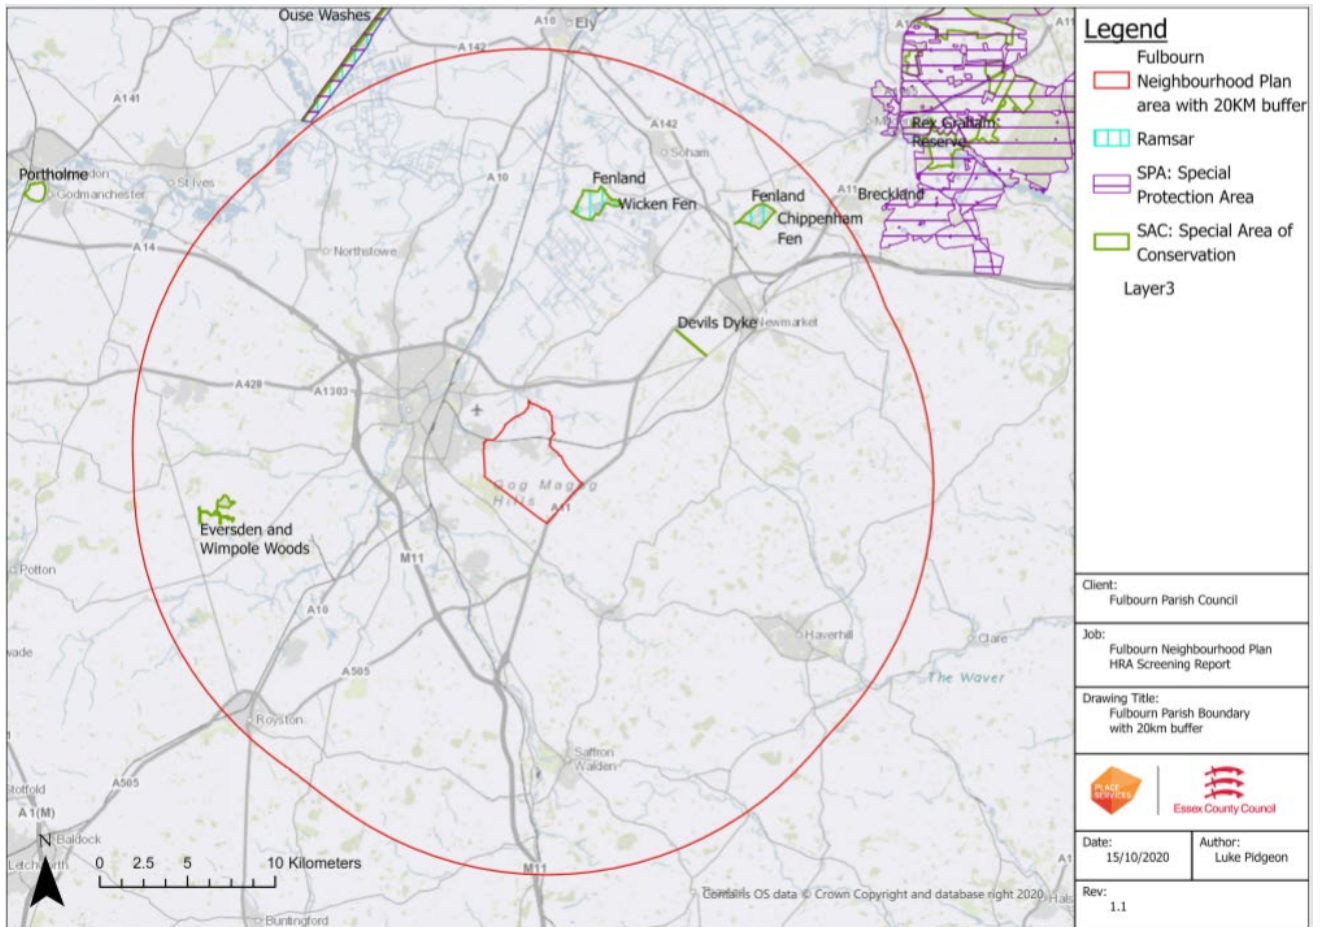

Human Rights

77. The Neighbourhood Plan has regard to the fundamental rights and freedoms guaranteed under the European Convention on Human Rights and complies with the Human Rights Act. The overall purpose of the Neighbourhood Plan is to improve the quality of life for people living and working now and in the future in the parish from an environmental, social and economic point of view. The aims and policies in the Neighbourhood Plan have been formulated in response to local people's views and in the light of evidence gathered for the parish, in order to meet the needs expressed and address the issues identified.

Conclusions

78. The Fulbourn Neighbourhood Plan does not allocate sites for development and the Neighbourhood Area does not contain sensitive natural or heritage assets that may be affected by the proposals in the plan. Furthermore, the neighbourhood plan would not have significant environmental effects that have not already been considered and dealt with through a sustainability appraisal of the Local Plan.
79. Following consultation with the Environment Agency, Natural England and Historic England, a Strategic Environmental Assessment (SEA) and Habitat Regulations Assessment Screening Determination Statement was published by Fulbourn Parish Council and South Cambridgeshire District Council in November 2020. The Determination Statement demonstrates that the Neighbourhood Plan is compatible with certain European Union obligations as required by the basic conditions, namely:
- Directive 2001/42/EC of the European Parliament and of the Council of 27 June 2001 on the assessment of the effects of certain plans and programmes on the environment; and
 - Article 6(3) and (4) of the EU Habitats Directive and with Regulation 61 of the Conservation of Habitats and Species Regulations 2010 (as amended).
80. The Neighbourhood Plan does not therefore require a Strategic Environmental Assessment (SEA)/ Sustainability Appraisal (SA) or Habitats Regulation Assessment (HRA). This is because there will be no significant environmental, social or economic effects arising from its implementation.

Figure 2: Fulbourn Neighbourhood Plan Area and Locations of Habitats sites within 20 km

F. COMPLIANCE WITH THE PUBLIC SECTOR EQUALITY DUTY

Background

81. The Equality Act 2010 places a duty on all public authorities in the exercise of their functions to have regard to the need to eliminate discrimination, to advance equality of opportunity, and to foster good relations between persons who have a “protected characteristic” and those who do not. “Protected characteristics” are age, disability, gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion and belief, sex, and sexual orientation.

Plan preparation

82. The aims and policies in the Neighbourhood Plan have been formulated in response to local people’s views and in the light of evidence gathered for the parish, in order to meet the needs expressed and address the issues identified. In order to confirm that the NP does not have any unintended consequences for particular groups the strategic aims and the policies in the Plan have been systematically scrutinised to ensure that they do not disadvantage any potentially vulnerable groups.
83. Fulbourn Parish Council has from the beginning of the plan process committed to the ambition that the Neighbourhood Plan should be developed with the full input of the community. Every effort has been made to consult with the community in a meaningful way at every stage of the Plan’s development. Throughout the preparation of the Neighbourhood Plan the Neighbourhood Plan Steering Group has sought to engage with as wide a range of people as possible using a range of consultation methods and have been mindful to consider those that do not have access to the internet. Latterly of course the impact of the Covid Pandemic has restricted the “face to face” opportunities and reliance has been placed on a dedicated web site and circulation of updates via two local magazines distributed to each house/premises. The work started in 2018 with the aim to engage as many people as possible.
84. The vision underpinning the Fulbourn Neighbourhood Plan is for a vibrant, sustainable and thriving local community with a wide provision of local services. The Plan seek to improve the conditions for all of the population and achieve benefits for all members of the community. In each case they aim to create an environment which would also benefit persons with protected characteristics by providing an inclusive environment with a strong community spirit where homes are well designed to suit the needs of the community. Engagement with the local community has highlighted the importance of preserving the identity of Fulbourn as a friendly, inclusive, desirable place to live, retaining its independent identity and its excellent services and amenities. Of equal importance is that any future development contributes positively to the community and does not threaten what is so clearly locally valued by most residents.

85. The Fulbourn Neighbourhood Plan aims to create benefits for everyone who lives, works, shops or spends leisure time within the village including Groups with protected characteristics. The Neighbourhood Plan sets out eight key objectives:
- Retain the character of Fulbourn as an individual village, separate from Cambridge.
 - Enhance the rural environment surrounding the village.
 - Maintain and improve the character and distinctiveness of the village.
 - Have a mix of housing that is affordable, available and suitable for all ages and appropriate to the village location.
 - Support business development and employment opportunities.
 - Improve amenities and community facilities.
 - Increase the safety of local streets and lanes and enhance access to public transport services.
 - Recognise the challenges of climate change and promote the application of appropriate measures through all aspects of development.
86. Delivery of the priorities will be through both planning policies and community action. The Neighbourhood Plan is expected to have a positive impact on all sectors of the community. It supports the development of a range of housing to meet the needs of all ages to ensure that local residents and their families can continue to live in the village. It also seeks to retain and accommodate businesses within the village so that the local economy can continue to provide a suitable range of employment opportunities and essential services for local people. The Neighbourhood Plan recognises the need to safeguard existing green spaces and local community assets and seeks the provision of complementary new or enhanced community facilities to meet all future needs and reduce the need to travel to access services. This will particularly benefit the young and old and those that may have mobility issues and/ limited or no access to a car and rely on local businesses for services. The Plan seeks to ensure that future development should also be accompanied by strong support for walking, cycling and improvement of public transportation for the village as a whole.
87. In compiling the Neighbourhood Plan important community aspirations, not within the scope of a neighbourhood plan have also been identified. These include matters like improved management of green spaces and trees, expansion of recycling and grey water re-use, better traffic management and improvements to bus services. These cannot form part of planning policy but are very important to the quality of life of the village.

Equalities Impact Assessment

88. An assessment has been undertaken on whether the policies in the Neighbourhood Plan have a positive, negative or neutral impact on each of the protected characteristics. In doing so, consideration has been given to whether people with different protected characteristics have different needs or experiences in relation to each policy, and whether it would directly or indirectly discriminate against or disadvantage people on the grounds of any of the “protected characteristics”.

89. Groups with various protected characteristics will be affected in different ways by the Neighbourhood Plan and the purpose of the assessment is to identify how various groups will be affected and whether the proposals and policies in the Fulbourn Neighbourhood Plan will adversely affect disproportionately those in the groups with protected characteristics. Without exception where policies in the Neighbourhood Plan do have an impact on groups with protected characteristics, it is a positive or neutral impact and not a negative one.

Table 8: Assessment of potential impacts of Policies on Groups with Protected Characteristics

Policy Number	Impact	Commentary
Policy FUL/01- Protecting the Distinctiveness and Landscape Setting of Fulbourn	Neutral	Policy FUL/01 aims to protect Fulbourn as an individual village set within rural landscape, clearly distinct from Cambridge in development form and separated both visually and physically. This is essential to retain Fulbourn's unique village character for all future generations. This policy does not discriminate against Groups with protected characteristics and will benefit all Groups.
Policy FUL/02- Development outside the Development Framework)	Neutral	Development proposals outside the Development Framework will be required to demonstrate that they do not compromise the special character and rural setting of Fulbourn and its visual and physical separation from Cambridge or other nearby settlements. This will not impact on Groups with protected characteristics. This policy does not discriminate against Groups with protected characteristics.
Policy FUL/03- Creating a Connected Green Infrastructure Network and Policy	Positive	The creation of a Green Infrastructure Network and increase in green spaces will benefit the health and wellbeing of residents. Access to green space in the local area will have particular benefits for young children and older residents and people with disabilities or limited mobility.

FUL/04 Protection and Enhancement of the Natural Environment	Neutral	The protection and enhancement of the natural environment will benefit all Groups.
Policy FUL/05 Local Green Space and Protected Village Amenity Areas	Neutral	Protecting the rural setting and enhancing biodiversity and landscape features is essential to the character and distinctiveness of Fulbourn and will benefit all Groups.
Policy FUL/06 Protecting and Enhancing Village Character	Neutral	Policy FUL/05 seeks to ensure that the unique characteristics of Fulbourn are maintained and, where possible, enhanced for the enjoyment of future generations. This policy does not discriminate against Groups with protected characteristics and will benefit all Groups.
Policy FUL/07 – Building and Landscape Design	Neutral	Development will be required to respect and contribute positively to the character areas and setting of Fulbourn. This policy does not discriminate against Groups with protected characteristics and will benefit all Groups.
Policy FUL/08 – Street and Lane Layout	Positive	The policy seeks to enhance the pedestrian friendly character and scale of the High Street and this will benefit people with disabilities or limited mobility and older residents in accessing local services.
Policy FUL/09 Larger Residential Development (10 or more units))	Positive	Policy FUL/09 requires larger housing developments to have considered local housing needs and the promotion of inclusive communities through an inappropriate housing mix taking into account local needs and circumstances including at least 5% built to accessible and adaptable dwellings suitable for older residents rounded to the nearest whole property. There is also a requirement to provide a Building for a Healthy Life assessment and the promotion of sustainable transport modes. Developer contributions will be directed in preference towards

		increasing and strengthening the existing facilities and amenities which serve the village as a whole and to support community integration. This will benefit young and older residents and people with disabilities or limited mobility.
Policy FUL/10 – Rural Exception Sites	Positive	Policy FUL/10 supports the development of sites to meet local needs where access to housing by local residents. This could benefit younger residents and residents with special housing needs on account of age or disability.
Policy FUL/11 - Housing Design Quality	Positive	Policy FUL/11 sets out housing quality criteria including the prioritisation of walking and cycling and the creation of permeable, connected, safe communities with links to amenities and facilities. It also promotes enhanced safety and surveillance. This will have particular benefits for young children and older residents and people with disabilities or limited mobility.
Policy FUL/12 – Employment Development in General	Positive	All employment development will be required to show its commitment to the promotion of sustainable travel measures and to demonstrate that it will not significantly increase local traffic or lead to an increase to the level of heavy traffic movements in the village roads. This will have particular benefits for young children and older residents and people with disabilities or limited mobility.
Policy FUL/13 – Large Employment Sites	Neutral	Development proposals will be required to promote sustainable travel modes in line with accepted best practice. This policy does not discriminate against Groups with protected characteristics and will benefit all Groups.
Policy FUL/14 –Community Facilities	Neutral	Policy FUL/14 seeks to resist the loss of community facilities and designates the field adjacent to the recreation ground

		for the provision of additional outdoor pitches. This policy does not discriminate against Groups with protected characteristics and will benefit all Groups.
Policy FUL/15 –Healthcare Facilities	Positive	Policy FUL/15 supports the enhancement of the existing Health Centre or its reprovision in an equally central location. This will have particular benefits for older residents and people with disabilities or limited mobility and expectant mothers.
Policy FUL/16- Sustainable Mobility	Positive	Policy FUL/16 prioritises walking, cycling and public transport and requires streets to be designed for safe pedestrian use, including by wheelchair / electric chair. Large developments will be expected to make provision for safe pedestrian and cycle connections to the village centre and other important destinations. This will have particular benefits for young and older residents and people with disabilities or limited mobility.

Conclusions

90. The Fulbourn Neighbourhood Plan includes a range of policies and proposals that will benefit the local community including those with protected characteristics. A number of policies have particular positive benefits for older people, young people, mothers to be and young children, disabled people and those with limited mobility. The policies also promote equality and good relations between different groups of people.
91. The Neighbourhood Plan does not explicitly address groups with protected characteristics relating to gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion and belief, sex, and sexual orientation. It does however promote community identity and cohesion and the provision of affordable housing to meet a variety of local needs and seeks to preserve and develop community and leisure facilities and retail and local services that will benefit these groups equally. It is not considered that there are any negative equality impacts that arise from the policies or proposals contained within the Neighbourhood Plan or that it raises any issues in relation to any of the convention rights in the Human Rights Act 1998.
92. It is therefore concluded that the Fulbourn Neighbourhood Plan complies with the Public Sector Equality Duty.

G. MEETING THE PRESCRIBED CONDITIONS AND LEGAL REQUIREMENTS

Prescribed Conditions

93. This statement has demonstrated that the draft Fulbourn Neighbourhood Plan satisfies the basic conditions that are relevant to a neighbourhood plan. These are:
- having regard to national policies and advice contained in guidance issued by the Secretary of State it is appropriate to make the neighbourhood plan;
 - the 'making' of the neighbourhood plan contributes to the achievement of sustainable development;
 - the 'making' of the neighbourhood plan is in general conformity with the strategic policies contained in the development plan for the area of the authority (or any part of that area);
 - the 'making' of the neighbourhood plan does not breach, and is otherwise compatible with EU obligations;
 - the 'making' of the neighbourhood plan complies with the Public Sector Equality Duty.
94. The prescribed conditions have therefore been satisfied and the prescribed matters have been complied with in connection with the proposal for the neighbourhood plan.

Legal Requirements

95. The Fulbourn Neighbourhood Plan satisfies each of the prescribed legal requirements as follows:
- *The plan is being submitted by a qualifying body.* The Fulbourn Neighbourhood Plan is being submitted by Fulbourn Parish Council.
 - *The draft neighbourhood plan sets out policies in relation to the development and use of land in the whole or any part of a neighbourhood area.* The Neighbourhood Plan relates to the designated Fulbourn Neighbourhood Area and includes land use planning policies that can be used in the determination of planning applications.
 - *The proposed neighbourhood plan states the period in which it is to have effect.* The Fulbourn Neighbourhood Plan covers the period 2019 to 2031 and this is stated in the Neighbourhood Plan.
 - *The policies do not relate to excluded development.* The Fulbourn Neighbourhood Plan does not relate to excluded development
 - *The proposed neighbourhood plan does not relate to more than one neighbourhood area.* The Fulbourn Neighbourhood Plan does not relate to more than one neighbourhood area and there is no other neighbourhood plan in force for the Fulbourn neighbourhood area.

Conclusions

96. This Neighbourhood Plan has been produced by Fulbourn Parish Council based on consultation with the local community, South Cambridgeshire District Council, landowners/developers, statutory bodies and other stakeholders. The policies and actions set out in the plan aim to address the key themes and priorities identified by the community and to contribute to the delivery of sustainable development in the neighbourhood area in accordance with strategic policies.
97. The Policies have been drafted taking into account national, strategic and local planning policies and are considered to be in conformity with these policies and EU obligations in respect to environmental effects.
98. Taking all these together, we consider that the Plan is in conformity with the relevant regulations and prescribed conditions and can be approved accordingly.

APPENDIX 1

Strategic Environmental Assessment (SEA) and Habitat Regulations Assessment Screening Determination Statement (November 2020) and SEA and HRA Screening Report (October 2020)

Fulbourn Neighbourhood Plan

Strategic Environmental Assessment (SEA) and Habitat Regulations Assessment Screening Determination Statement

November 2020

Executive Summary

This statement sets out the reasons for the determination that the draft Fulbourn Neighbourhood Plan is not likely to require a Strategic Environmental Assessment. In addition, this statement determines that the making of the Fulbourn Neighbourhood Plan is not likely to have a significant effect on a European site.

This determination statement is intended to demonstrate that the Fulbourn Neighbourhood Plan is compatible with certain European Union obligations as required by the basic conditions, namely:

- Directive 2001/42/EC of the European Parliament and of the Council of 27 June 2001 on the assessment of the effects of certain plans and programmes on the environment; and
- Article 6(3) and (4) of the EU Habitats Directive and with Regulation 61 of the Conservation of Habitats and Species Regulations 2010 (as amended).

Fulbourn Parish Council and South Cambridgeshire District Council will publish this determination statement in accordance with the regulatory requirements.

Determination Statement

This statement has been produced to ensure the Neighbourhood Plan will, when examined, comply with the Neighbourhood Planning (General) Regulations 2012 (as amended) in particular Regulation 32 and Regulation 15(1)e(ii) of the Neighbourhood Planning (General) (Amendment) Regulations 2015.

A neighbourhood plan is required to meet a number of basic conditions (which are set out in the Town and Country Planning Act 1990), one of which being it must not breach and must be otherwise compatible with EU and Human Rights obligations. This requires neighbourhood plans to fully consider the requirements of the SEA regulations¹ which transpose the EU's SEA Directive² into law and which requires those making plans that could impact on the environment to consider whether they are likely to have a significant effect or not.

Regulation 32 in the Neighbourhood Planning (General) Regulations 2012 (as amended) sets out an additional basic condition to those set out in primary legislation. Regulation 32 states: "The making of the neighbourhood plan is not likely to have a significant effect on a European site (as defined in the Conservation of Habitats and Species Regulations 2010 (d)) or a European offshore marine site (as defined in the Offshore Marine Conservation (Natural Habitats, &c.) Regulations 2007 (e)) (either alone or in combination with other plans or projects).

A Strategic Environmental Assessment (SEA) and Habitat Regulations Assessment (HRA) Screening Opinion was prepared by Place Services on behalf of South Cambridgeshire District Council (SCDC) for the Fulbourn Neighbourhood Plan. (See Appendix 1).

SCDC has consulted the statutory consultees (Historic England/Natural England/Environment Agency) on the Screening Report prepared by Essex Place Services and asked for their views on whether a SEA is required.

Consultation responses were received from the three statutory consultees. Their conclusions are summarised below, and their detailed comments are included in Appendix 2.

- Historic England: The Screening Report indicates that the Council considers that the plan will not have any significant effects on the historic environment. Historic England notes that the plan does not propose to allocate any sites for development.

On the basis of the information supplied, and in the context of the criteria set out in Schedule 1 of the Environmental Assessment Regulations [Annex II of 'SEA' Directive], Historic England concurs with the Council that the preparation of a Strategic Environmental Assessment is not required.. (November 2020)

¹ Known fully as The Environmental Assessment of Plans and Programmes Regulations 2004.

² Known fully as Directive 2001/42/EC of the European Parliament and of the Council of 27 June 2001 on the assessment of the effects of certain plans and programmes on the environment.

- Natural England: It is Natural England's advice, on the basis of the material supplied with the consultation, that, in so far as their strategic environmental interests (including but not limited to statutory designated sites, landscapes and protected species, geology and soils) are concerned, that there are unlikely to be significant environmental effects from the proposed plan.

Natural England agrees with the report's conclusions that the Fulbourn Neighbourhood Plan would not be likely to result in a significant effect on any European Site, either alone or in combination and therefore no further assessment work would be required (November 2020)

- Environment Agency: Due to resource pressures they are no longer able to provide Local Planning Authorities with comprehensive bespoke advice on screening opinions. (October 2020)

The Neighbourhood Plan has been prepared for town and country planning purposes and sets a framework for future development consent. The policies of the Neighbourhood Plan can be considered to determine the use of small areas at local level commensurate with their status in determining local planning applications.

The Plan does not allocate any land for development purposes and does not include any content that could give rise to significant negative effects on the environment, or any social or economic tenets of sustainability.

The Fulbourn Neighbourhood Plan can therefore be **screened out** for its requirement of Strategic Environmental Assessment in line with the requirements of Directive 2001/42/EC.

The HRA screening report indicates that the Fulbourn Neighbourhood Plan is not predicted to have likely significant effects on any Habitats site, either alone or in combination with other plans and projects. Natural England agreed that there are unlikely to be significant environmental effects from the proposed plan. The requirement for the Plan to undertake further assessment under the Conservation of Habitats and Regulations 2017 (as amended) is therefore **screened out**.

Appendix 1: Strategic Environmental Assessment Screening for Fulbourn Neighbourhood Plan

As part of the process of making a Neighbourhood Plan, Fulbourn Parish Council has requested a screening opinion to see whether a Strategic Environmental Assessment is required. Such a requirement can be screened out if it is felt, based on the information available, that the Neighbourhood Plan would not have a likely significant environmental affect.

A Strategic Environmental Assessment (SEA) and Habitat Regulations Assessment (HRA) Screening Opinion was prepared by Place Services on behalf of South Cambridgeshire District Council for the Fulbourn Neighbourhood Plan.

Fulbourn Neighbourhood Plan 2019 – 2031 Pre-Submission Draft

Strategic Environmental Assessment (SEA) & Habitat Regulations Assessment (HRA) Screening Report – October 2020

Introduction

1.1 The Purpose of this Report

This screening report is an assessment of whether or not the contents of the Fulbourn Neighbourhood Plan (Pre-Submission Draft) requires a Strategic Environmental Assessment (SEA) in accordance with the European Directive 2001/42/ EC and associated Environmental Assessment of Plans and Programmes Regulations. A SEA is required if the Neighbourhood Plan is deemed to have a likely significant effect on the environment.

This report will also screen to determine whether the Neighbourhood Plan requires a Habitats Regulations Assessment (HRA) in accordance with Article 6(3) and (4) of the EU Habitats Directive and with Regulation 61 of the Conservation of Habitats and Species Regulations 2017 (as amended). An HRA screening report is required when it is deemed that likely adverse significant effects may occur on protected Habitats (European) Sites as a result of the implementation of a plan/project.

1.2 The Fulbourn Neighbourhood Plan 2019 to 2031

The Neighbourhood Plan will set out planning policies for the Fulbourn Neighbourhood Plan area. Once formally adopted, a Neighbourhood Plan carries the same legal weight as Local Development Plans adopted by the Local Planning Authority (LPA), in this case South Cambridgeshire District Council.

The Neighbourhood Plan states that the Neighbourhood Plan has given the community of Fulbourn the opportunity to define the key characteristics of their village and to guide future development and change up to 2031: preserving what is important to local people and indicating how the village should evolve in future in the context of the growth of Cambridge and South Cambridgeshire. The Plan's Vision Statement is as follows:

“In the period to 2031 Fulbourn village will continue to be a vibrant, sustainable and thriving local community with its own distinctive characteristics, separate from Cambridge yet complementary and benefiting from its proximity. It will have a locally distinctive built and natural environment and a wide provision of local services, strongly supported by the local community. New developments will ensure the ongoing success of Fulbourn providing suitable housing, employment, leisure facilities and local services whilst protecting and enhancing its natural and built assets for future generations.”

Additionally, a number of Planning Objectives are devised for the Neighbourhood Plan. These are:

Planning Objectives

1. Retain the character of Fulbourn as an individual village, separate from Cambridge

It is important for Fulbourn to continue to be a sustainable village retaining its key characteristics, separate from Cambridge, but recognizing the benefits of its proximity. This means that Fulbourn should retain its individuality as a village set within its rural landscape and that the Green Belt surrounding the parish should be sustained.

2. Enhance the rural environment surrounding the village

The rural environment of the Parish surrounding the village should be enhanced through encouraging further development of biodiversity and amenities both within the village and in the surrounding fields. This will include providing greater natural and human connectivity between village and countryside and increased protection and biodiversity within the green spaces of the village.

3. Maintain and improve the character and distinctiveness of the village

This will mean prioritising local distinctiveness in every element of change and growth and favouring sensitive development which enriches the landscape and enhances the character of the locality. As part of this effort, it will be important to support the conservation of our natural and built environmental assets for future generations, strengthen the character of the green spaces and also resist inappropriate development.

4. Have a mix of housing that is affordable, available and suitable for all ages

Within the village, it will be important to secure a range of housing to meet the needs of all ages to ensure that local residents and their families could continue to live in the village. The environmental sustainability of new and existing buildings should be optimised, encouraging high levels of energy efficiency, and other sustainable measures to mitigate the impacts of climate change.

5. Support business development and employment opportunities

The community is keen to continue to support and accommodate businesses within the village so that the local economy can continue to provide a suitable range of employment opportunities and essential services to the villagers and make a contribution to the wider economy of the region.

6. Improve amenities and community facilities

The community recognises the need to safeguard our existing local community assets and seek provision of complementary new or enhanced community facilities to meet all future needs and reduce the need to travel to access services

7. Increase the safety of local streets and lanes and enhance access to public transport services

Walking and cycling through the winding lanes and narrow streets of the village are part of the life and experience of Fulbourn and need to be supported through all measures that increase safety and comfort, while respecting local character. This is also essential to reduce carbon emissions and respond to the climate crisis. Future development should also be accompanied by strong support for walking, cycling and improvement of public transportation for the village as a whole.

Planning Objectives

8. Recognise the challenges of climate change and promote the application of appropriate measures through all aspects of development

The community of Fulbourn recognises the challenges posed by climate change and fully supports the application of the specific policies of the Local Plan. Locally specific measures are included in the various policies as appropriate.

1.3 The South Cambridgeshire Local Plan

The South Cambridgeshire Local Plan sets out the planning policies and land allocations to guide the future development of the District up to 2031. It includes policies on a wide range of topics such as housing, employment, services and facilities, and the natural environment.

1.3.1 Content regarding the Neighbourhood Plan area within the Local Plan

1.3.1.1 The Settlement Hierarchy and Principle of Development

The Local Plan identifies Fulbourn as a 'Minor Rural Centre' within Policy S/9. Minor Rural Centres are generally less sustainable locations for new development than 'Rural Centres' however are identified as more sustainable than 'Group Villages' and 'Infill Villages' in the strategy for the rural area as they often perform a role in terms of providing services and facilities for a small rural hinterland. The Local Plan states that,

'Within Minor Rural Centres there is scope in principle for larger scale windfall development within the village framework. This would allow larger villages with a reasonable level of services to provide services and facilities for surrounding smaller villages to achieve more development. However, the overall scale of development should be restricted in recognition of their more limited services compared to Rural Centres. A maximum scheme size of 30 dwellings is used as a guideline figure to indicate the upper limit of housing development likely to be suitable. Development will not be permitted on sites capable of accommodating scheme sizes significantly larger than 30 dwellings in Minor Rural Centres.'

Policy S/7 of the Local Plan covers policy regarding 'Development Frameworks'. Development Frameworks define where policies for the built-up areas of settlements give way to policies for the countryside. The Policy supports development within such frameworks (including that of Fulbourn), and includes further information on proposals outside development frameworks for Neighbourhood Plans, stating that,

'(2) Outside development frameworks, only allocations within Neighbourhood Plans that have come into force and development for agriculture, horticulture, forestry, outdoor recreation and other uses which need to be located in the countryside or where supported by other policies in this plan will be permitted.'

1.3.1.2 Local Plan Development Allocations in Fulbourn

The Local Plan allocates land for development purposes within the Fulbourn Neighbourhood Plan area within Policy H/3. Additionally, part of the land allocated within Policy E/3 of the Local Plan is within the Neighbourhood Plan area.

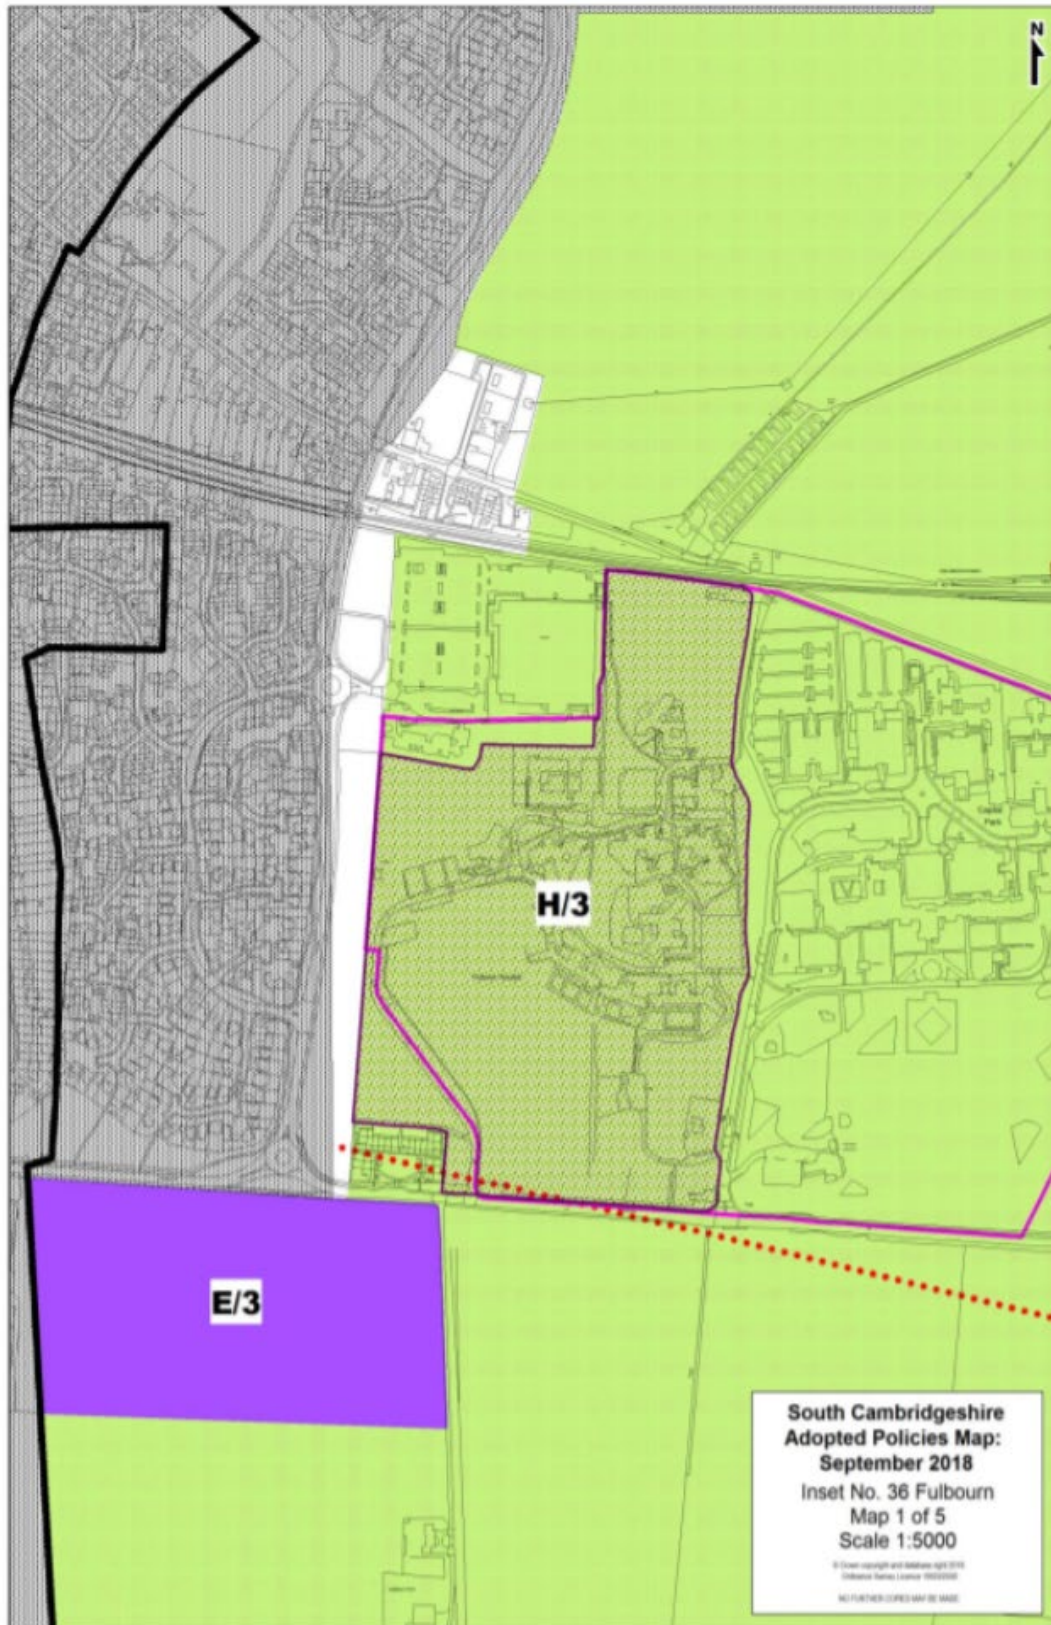

Policy H/3 allocates the Fulbourn and Ida Darwin Hospitals for redevelopment, representing previously developed land in the Green Belt and also within the Fulbourn Hospital Conservation Area, to which enhancements are sought. The Policy states that redevelopment will comprise of the existing built footprint of the Ida Darwin Hospital into a different configuration, comprising residential redevelopment on the eastern part of the Ida Darwin site and the transfer of part of the building footprint to the Fulbourn Hospital site for new mental health facilities.

It is anticipated that the Ida Darwin site could deliver 250 to 275 dwellings, although the total would depend on any buildings that would remain on the Ida Darwin site, and the amount of additional healthcare development required on the Fulbourn Hospital site. The Policy also states that redevelopment will create a green wedge on the western part of the Ida Darwin site to provide a compensatory enhancement to the openness of the Green Belt in this location. The site allocation is considered 'strategic to the delivery of homes' in the District and therefore is outside the influence of the Fulbourn Neighbourhood Plan.

Local Plan Policy E/3: Fulbourn Road East (Fulbourn) allocates 6.9 hectares of land adjoining Peterhouse Technology Park, again within the Green Belt, for employment use. Eastern parts of this allocation are located within the Fulbourn Neighbourhood Plan area. The Inner Green Belt Review 2012, and the independent Inner Green Belt Review 2015, undertaken jointly with Cambridge City Council, examined the Green Belt in detail and concluded that the area pertaining to this site, on the edge of Cambridge, is not considered of long term importance to Green Belt purposes. Given the level of need for jobs, it was considered that exceptional circumstances exist to justify its release. The allocation is also considered 'strategic to the delivery of jobs' in the District and outside the influence of the Fulbourn Neighbourhood Plan.

The following maps, taken from the Local Plan, show the location and boundary of the proposed allocations that are located within the Fulbourn Neighbourhood Plan area. For a key to the map, visit the [Local Plan Policies Map on the South Cambridgeshire District Council website](#).

Figure 1: Map of Local Plan allocations within Fulbourn Neighbourhood Plan area (H/3 west and E/3)

Source: South Cambridgeshire Local Plan, 2018

Figure 2: Map of Local Plan allocations within Fulbourn Neighbourhood Plan area (H/3 east)

Source: South Cambridgeshire Local Plan, 2018

1.3.1.3 Protected Village Amenity Areas (PVAAs) and Local Green Space Sites

1) Protected Village Amenity Areas (PVAAs)

The Local Plan also designates sites within village frameworks for the purpose of safeguarding areas of undeveloped land which are important to retain. Some of the PVAAs may have important functions for the village such as allotments, recreation grounds and playing fields whilst others have an important amenity role in providing a setting for buildings or offer tranquil areas where there is minimum activity. Not all PVAAs have public access as some undeveloped areas which are important may be private gardens. They also vary from those which are very open to visual penetration to those which may be enclosed or semi-enclosed.

PVAAs are safeguarded within 'Policy NH/11: Protected Village Amenity Areas' and are identified on the Local Plan Policies Map. The Policy states that development will not be permitted within or adjacent to these areas if it would have an adverse impact on the character, amenity, tranquillity or function of the village.

The Fulbourn Neighbourhood Plan area contains three PVAAs surrounding Fulbourn Primary School, St Vigor's Church and Poorwell Water / The Horse Pond.

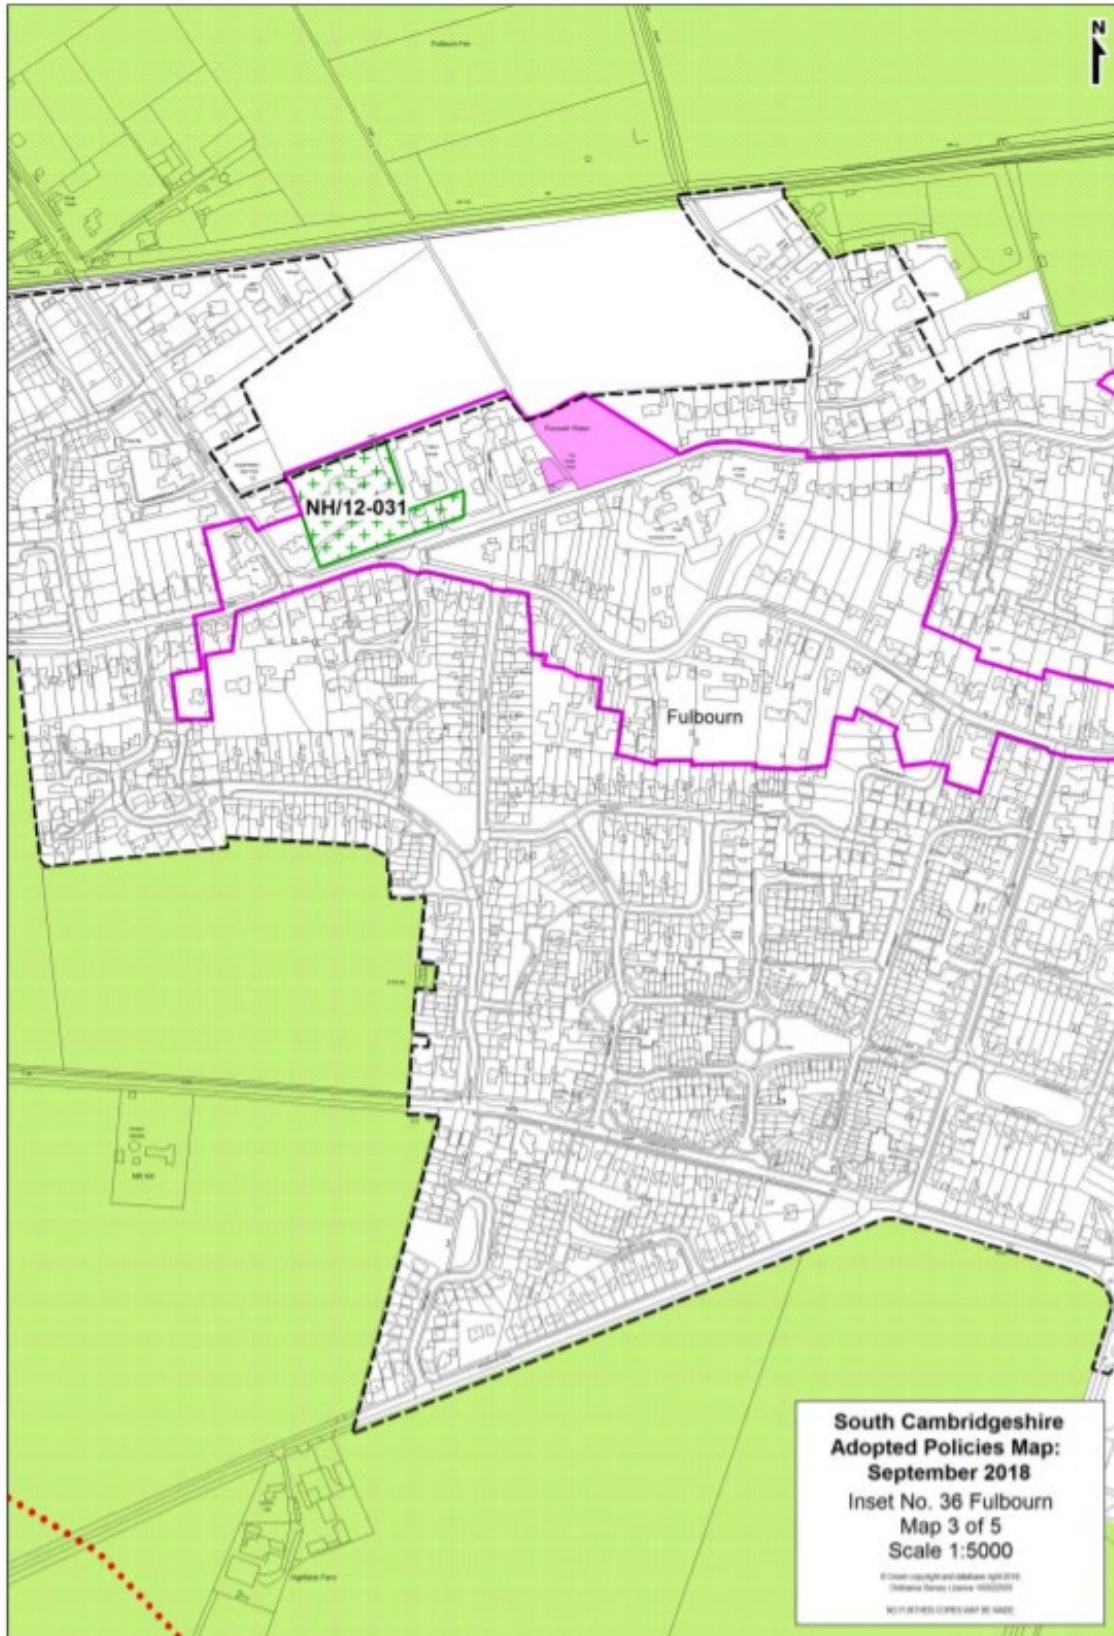

2) Local Green Space Sites

The National Planning Policy Framework (NPPF) introduces a new designation of Local Green Space, to identify and protect green areas of particular importance to a local community. The NPPF outlines that such designations should only be identified where the green space is in reasonably close proximity to the community it serves; where the green area is demonstrably special to a local community and holds a particular local significance (for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife); and where the green area concerned is local in character and is not an extensive tract of land. The Local Plan identifies 'Victorian garden, Fulbourn' as a Local Green Space site (reference NH/12-031), with protection under Policy NH/12: Local Green Space. This Policy states,

'Local Green Space identified on the Policies Map will be protected from development that would adversely impact on the character and particular local significance placed on such green areas which make them valued by their local community. Inappropriate development, as defined in the National Planning Policy Framework, would not be approved except in very special circumstances and in discussion with the local community.'

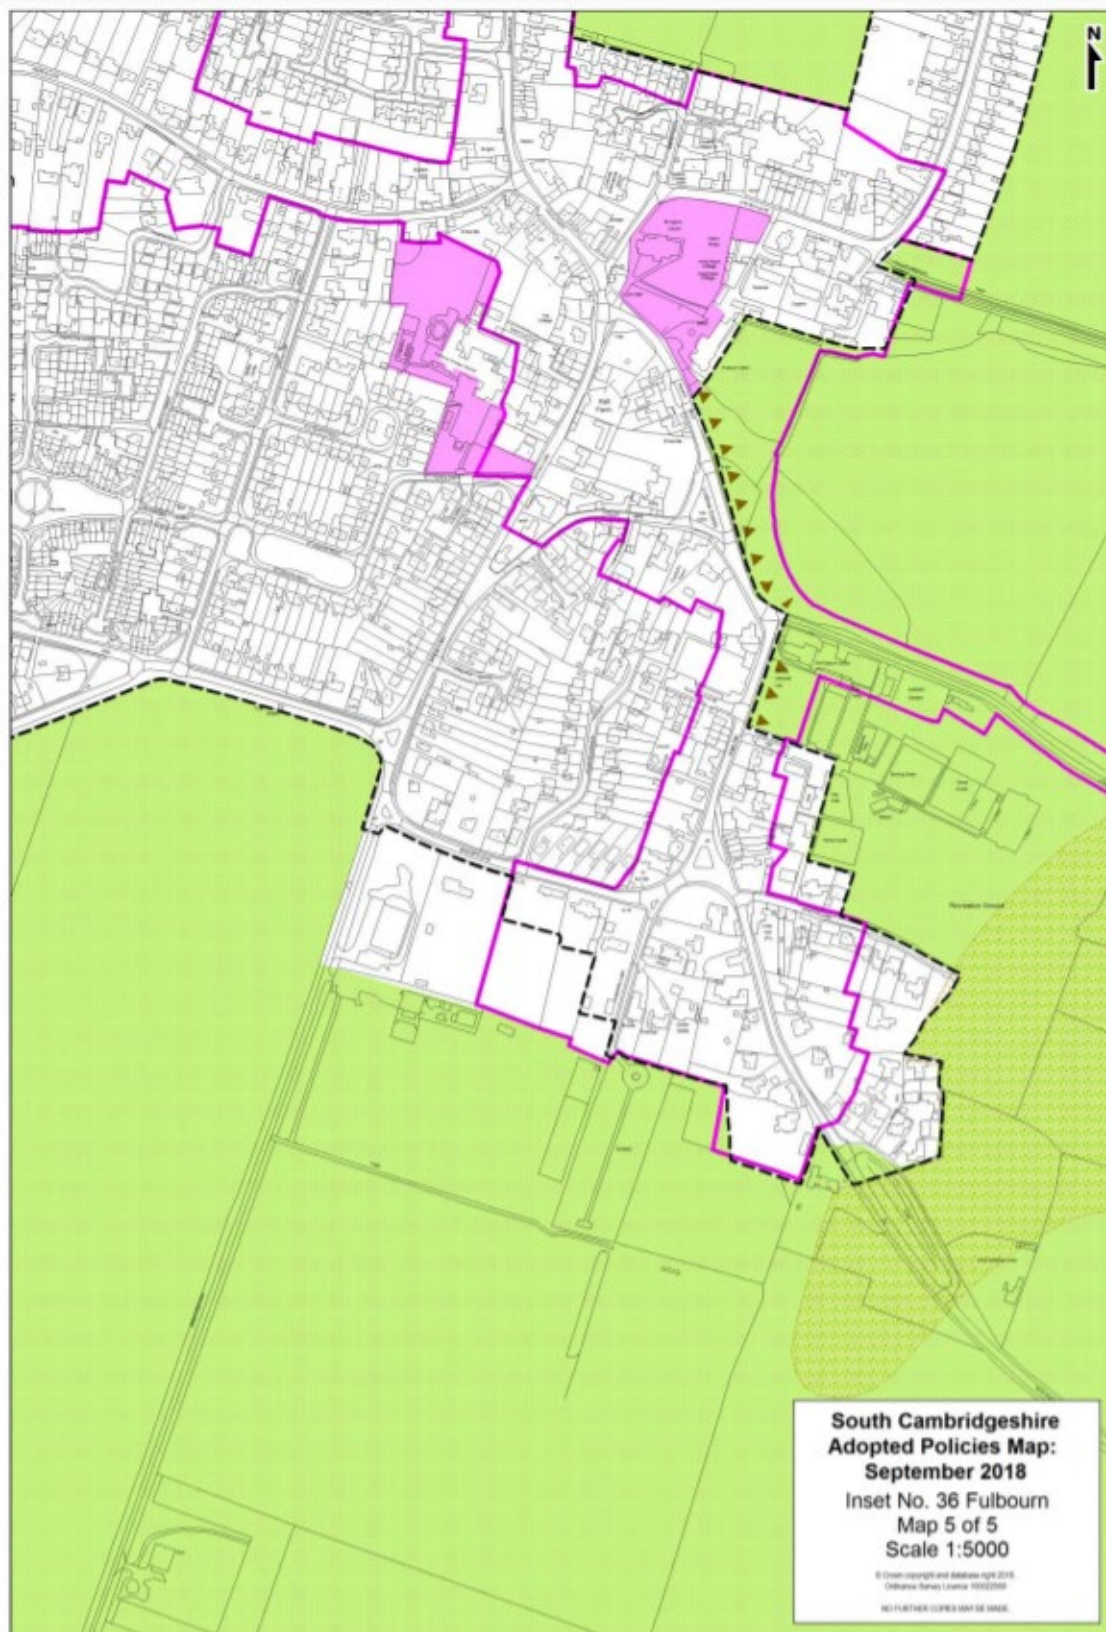

The following map, taken from the Local Plan, shows the location of the Local Green Space site and the three PVAAs in Fulbourn. For a key to the maps, visit the [Local Plan Policies Map on the South Cambridgeshire District Council website](#).

Legislative Background

2.1 Strategic Environmental Assessment (SEA)

Directive 2001/42/EC of the European Parliament and of the Council of 27 June 2001 on the assessment of the effects of certain plans and programmes on the environment states that,

‘Environmental assessment is an important tool for integrating environmental considerations into the preparation and adoption of certain plans and programmes which are likely to have significant effects on the environment.

(10) All plans and programmes which are prepared for a number of sectors and which set a framework for future development consent of projects listed in Annexes I and II to Council Directive 85/337/EEC of 27 June 1985 on the assessment of the effects of certain public and private projects on the environment(7), and all plans and programmes which have been determined to require assessment pursuant to Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild flora and fauna(8), are likely to have significant effects on the environment, and should as a rule be made subject to systematic environmental assessment. When they determine the use of small areas at local level or are minor modifications to the above plans or programmes, they should be assessed only where Member States determine that they are likely to have significant effects on the environment.

(11) Other plans and programmes which set the framework for future development consent of projects may not have significant effects on the environment in all cases and should be assessed only where Member States determine that they are likely to have such effects.’

The Fulbourn Neighbourhood Plan may influence frameworks for future development or become used ancillary to those plans and programmes that do set such a framework, and as such it has been determined that the principle of the Neighbourhood Plan should be screened for the necessary application of the SEA Directive.

The Report from the Commission to The Council, The European Parliament, The European Economic and Social Committee and the Committee of the Regions states, on the application and effectiveness of the Directive on Strategic Environmental Assessment (Directive 2001/42/EC), that

‘the following Plan & Programme (P&P), and modifications to them, are covered when prepared and/or adopted by an authority and required pursuant to legislative, regulatory or administrative provisions:

- P&P prepared for certain sectors and which set the framework for future development consent in respect of projects under the Environmental Impact Assessment-EIA-Directive.
- P&P requiring an assessment under the Habitats Directive

(92/43/EEC).

- P&P setting the framework for development consent in respect of projects (not limited to those listed in the EIA Directive; see above) and determined by "screening" as being likely to have significant environmental effects.'

This report represents this screening process in regard to the content and influence of the Fulbourn Neighbourhood Plan.

2.2 Habitats Regulations Assessment (HRA)

Under the provisions of the EU Habitats Directive and translated into English law by the Habitats Regulations (The Conservation of Habitats and Species Regulations 2017, as amended), a competent authority must carry out an assessment of whether a plan or project will significantly affect the integrity of any European Site (also referred to as Habitats Sites in the National Planning Policy Framework), in terms of impacting the site's conservation objectives.

HRA screening is the initial assessment of the impacts of a land use proposal against the conservation objectives of Habitats sites. Specifically, it is to ascertain whether or not a proposal (either alone or in combination with other proposals) would potentially damage the internationally designated features of that site. European sites are also known as Natura 2000 sites.

This HRA Screening Report has been undertaken in order to accompany the Fulbourn Neighbourhood Plan which is being produced by Fulbourn Parish Council in accordance with the Neighbourhood Planning (General) Regulations 2012.

The Neighbourhood Planning (General) Regulations 2012, state that submitted Plans need to be accompanied by a statement explaining how the proposed Plan meets the 'basic conditions' set out in Schedule 4B of the 1990 Town and Country Planning Act. These basic conditions include a requirement to demonstrate how the Plan is compatible with EU obligations, which includes the need to undertake an HRA.

In line with the Court judgement (CJEU People Over Wind v Coillte Teoranta C-323/17), mitigation measures cannot be taken into account when carrying out a screening assessment to decide whether a plan or project is likely to result in significant effects on a Habitats Site.

SEA Screening

3.1 When is SEA Required?

Planning Practice Guidance – Strategic environmental assessment requirements for neighbourhood plans (Paragraph: 026 Reference ID: 11-026-20140306) states that,

‘In some limited circumstances, where a neighbourhood plan is likely to have significant environmental effects, it may require a strategic environmental assessment. Draft neighbourhood plan proposals should be assessed to determine whether the plan is likely to have significant environmental effects. This process is commonly referred to as a “screening” assessment and the requirements are set out in regulation 9 of the Environmental Assessment of Plans and Programmes Regulations 2004.

If likely significant environmental effects are identified, an environmental report must be prepared in accordance with paragraphs (2) and (3) of regulation 12 of those Regulations.

One of the basic conditions that will be tested by the independent examiner is whether the making of the neighbourhood plan is compatible with European Union obligations (including under the Strategic Environmental Assessment Directive).

To decide whether a draft neighbourhood plan might have significant environmental effects, it must be assessed (screened) at an early stage of the plan’s preparation according to the requirements set out in regulation 9 of the Environmental Assessment of Plans and Programmes Regulations 2004. These include a requirement to consult the environmental assessment consultation bodies.

Each consultation body will be able to advise on particular topics relevant to its specific area of expertise and responsibility, and the specific information that it holds.

Where it is determined that the plan is unlikely to have significant environmental effects (and, accordingly, does not require an environmental assessment), a statement of reasons for the determination should be prepared. A copy of the statement must be submitted with the neighbourhood plan proposal and made available to the independent examiner.’

Articles 2 and 3 of the SEA Directive set out the circumstances in which a SEA is required. Table 1 sets out the assessment of whether the principle of the Fulbourn Neighbourhood Plan will require a full SEA.

Table 1: Exploring whether the Principle of the Plan would warrant SEA

Question 1: Is the Plan subject to preparation and/or adoption by a national, regional or local authority OR prepared by an authority for adoption through

legislative procedure by Parliament or Government?

Yes - The Neighbourhood Plan has been prepared for adoption through legislative procedure.

Question 2: Is the Plan required by legislative, regulatory or administrative provision? (Typical characteristics of "administrative provisions" are that they are publicly available, prepared in a formal way, probably involving consultation with interested parties. The administrative provision must have sufficient formality such that it counts as a "provision" and it must also use language that plainly requires rather than just encourages a Plan to be prepared.)

Yes - The Neighbourhood Plan would be considered as falling within the category of an 'administrative provision'.

Question 3: Is the Plan prepared for agriculture, forestry, fisheries, energy, industry, transport, waste management, water management, telecommunications, tourism, town and country planning or land use AND does it set a framework for future development consent of projects in Annexes I and II to the EIA Directive?

Yes to both criteria - The Neighbourhood Plan has been prepared for town and country planning and sets a framework for future development consent.

Question 4: Will the Plan, in view of its likely effect on sites, require an assessment under Article 6 or 7 of the Habitats Directive?

The Neighbourhood Plan's likely effect on sites and requirement for an assessment under Article 6 or 7 of the Habitats Directive is explored in Section 4 of this Report.

Question 5: Does the Plan determine the use of small areas at local level, OR is it a minor modification of a Plan likely to require assessment under the Habitats Directive?

Yes to one of the criteria - The policies of the Neighbourhood Plan can be considered to determine the use of small areas at local level commensurate with their status in determining local planning applications.

Question 6: Does the Plan set the framework for future development consent of projects (not just projects in the Annexes of the EIA Directive)?

Yes - The Neighbourhood Plan has been prepared for town and country planning and sets a framework for future development consent.

Question 7: Is the Plans sole purpose to serve national defence or civil emergency, or is it a financial or budget Plan, or is it co -financed by structural funds or European Agricultural Guidance and Guarantee Fund (EAGGF) programmes 2000 to 2006/7?

The Neighbourhood Plan does not serve a purpose related to national defence or civil emergency, a financial or budget Plan. The Neighbourhood Plan is not co-financed by structural funds or EAGGF programmes 2000 to 2006/7.

Question 8: Is it likely to have a significant effect on the environment?

Likely significant effects are explored in more detail in Section 3.3 of this Screening Report. The 'conclusions' section of the Report outlines whether the Neighbourhood Plan requires SEA or not due in regard to its effects on the environment.

The following section looks at the criteria for assessing the effects of the Neighbourhood Plan and the identified effects of the Neighbourhood Plan in line with the criteria. Crucially, it will determine whether there are any likely significant effects on the environment.

3.2 Criteria for Assessing the Effects of the Neighbourhood Plan

Criteria for determining the likely significant effects on the environment, referred to in Article 3(5) of Directive 2001/42/EC are set out below.

Annex II of SEA Directive 2001/42/EC – Significant Effects

1. The characteristics of plans and programmes, having regard, in particular, to

- the degree to which the plan or programme sets a framework for projects and other activities, either with regard to the location, nature, size and operating conditions or by allocating resources,
- the degree to which the plan or programme influences other plans and programmes including those in a hierarchy,
- the relevance of the plan or programme for the integration of environmental considerations in particular with a view to promoting sustainable development,
- environmental problems relevant to the plan or programme,
- the relevance of the plan or programme for the implementation of Community legislation on the environment (e.g. plans and programmes linked to waste-management or water protection).

2. Characteristics of the effects and of the area likely to be affected, having regard, in particular, to

- the probability, duration, frequency and reversibility of the effects,
- the cumulative nature of the effects,
- the transboundary nature of the effects,
- the risks to human health or the environment (e.g. due to accidents),
- the magnitude and spatial extent of the effects (geographical area and size of the population likely to be affected),
- the value and vulnerability of the area likely to be affected due to:
 - * special natural characteristics or cultural heritage,
 - * exceeded environmental quality standards or limit values,
 - * intensive land-use,
 - * the effects on areas or landscapes which have a recognised national, Community or international protection status.

3.3 Likely Significant Effects resulting from the Neighbourhood Plan

The following assessment will consider the likelihood of the Fulbourn Neighbourhood Plan (at the time of writing) to have significant effects on the environment. The table below will explore the likelihood of effects on the following required themes, as included within Annex I of the SEA Directive (2001/42/EC):

- Biodiversity;
- Population;
- Human health;
- Fauna;
- Flora;
- Soil;
- Water;
- Air;
- Climatic factors;
- Material assets;
- Cultural heritage including architectural and archaeological heritage;
- Landscape; and
- The interrelationship between the above factors.

Table 2: Assessment of Likely Significant Effects on the Environment

Criteria for determining the likely significance of effects (Annex II SEA Directive)	Likelihood and summary of significant effects
The degree to which the plan or programme sets a framework for projects and other activities, either with regard to the location, nature, size and operating conditions or by allocating resources.	<p>The Plan sets out relevant policies which will be used to determine proposals for development within the Neighbourhood Plan area once adopted. The Plan does not include any allocations for development; instead housing needs will be met through the ‘strategic’ development of the Ida Darwin hospital site as identified for allocation within Policy H/3 of the adopted South Cambridgeshire Local Plan. The Neighbourhood Plan states that, ‘Fulbourn has no need to propose further housing allocations but should encourage sustainable and high-quality development on the sites already allocated and within the Village Development Framework.’</p> <p>Policy FUL/10 of the Neighbourhood Plan, entitled ‘Housing Development and Local Need’ seeks to ensure that new housing</p>

Criteria for determining the likely significance of effects (Annex II SEA Directive)	Likelihood and summary of significant effects
	<p>development proposals of 10 or more units will be expected to take account of and demonstrate that they respond to identified local need. Various criteria are included within the Policy related to housing mix, a percentage of yields being affordable, net density and infrastructure obligations.</p> <p>A Neighbourhood Plan must demonstrate conformity with the strategic policies of the Local Plan and once brought into force, the policies it contains take precedence over existing non-strategic policies only in the Local Plan for that Neighbourhood Plan area. The degree to which the Plan sets a framework for projects through allocating resources is considered relatively low as Policy FUL/10 reiterates affordable housing thresholds and ‘per hectare’ net density requirements of Local Plan policies H/10 and H/8 respectively.</p> <p>The extent to which any conflicts exist between Policy FUL/10 and District level policies within the Local Plan will be considered between the Parish Council and the Local Planning Authority in finalising the Neighbourhood Plan, or otherwise through the independent examination of the Neighbourhood Plan.</p>
<p>The degree to which the plan or programme influences other plans or programmes including those in a hierarchy.</p>	<p>The Neighbourhood Plan provides policies for the Plan area, relevant to a local level only. The Neighbourhood Plan does not allocate any land for development purposes and its policies are considered to be in general conformity to that of the adopted South Cambridgeshire Local Plan. The Neighbourhood Plan, when/if ‘made’, will have weight in all planning decisions within the Plan area, however it should be acknowledged that issues identified as ‘strategic’ within the Local Plan will have priority over any of the Neighbourhood Plan policies. The degree to which the plan or programme influences other plans or programmes, including any development brief at the Ida Darwin hospital site, is therefore relatively low in the context of the Plan area.</p>
<p>The relevance of the plan or programme for the integration of environmental considerations in particular with a view to promoting</p>	<p>Neighbourhood Plans are required to contribute to the achievement of sustainable development. The Neighbourhood Plan policies seek to ensure environmental considerations are taken into account. The Neighbourhood Plan includes policies related (directly / indirectly) to ensuring environmental considerations will be integrated into any forthcoming development within the Plan area. These are:</p>

Criteria for determining the likely significance of effects (Annex II SEA Directive)	Likelihood and summary of significant effects
sustainable development.	<ul style="list-style-type: none"> • FUL/01: Respect for Local Character and Local Setting; • FUL/02: Protecting Setting of Fulbourn; and • FUL/04: Protection and Enhancement of Natural Features' <p>Irrespective of the adequacy of the above policies, adopted Local Plan policies apply within the Neighbourhood Plan area, which have been subject to thorough assessment within the Local Plan Sustainability Appraisal and Habitats Regulations Assessment. This ensures that environmental considerations, in particular with a view to promoting sustainable development, will be considered for all development proposals within the Neighbourhood Plan area.</p>
Environmental problems relevant to the plan.	<p>The Neighbourhood Plan reflects a small area and the Plan's policy content seeks to address environmental issues. The policy content of the adopted Local Plan will additionally apply to any proposals within the Neighbourhood Plan area. Local Plan policies have been subject to Sustainability Appraisal (SA) within the context of the Local Plan. The Neighbourhood Plan and this Screening Report identify the following potential (direct / indirect) environmental problems or sources of potential problems relevant to the Neighbourhood Plan area:</p> <ul style="list-style-type: none"> • The Plan area is within various SSSI Impact Risk Zones (IRZs). Development proposals within IRZs are required to be consulted on with Natural England, should they be of a type or size that could warrant negative effects on the relevant SSSI. • The Plan area contains the Fulbourn Fen SSSI to the east, which is in an 'unfavourable recovering' condition; as a result, all planning applications in the IRZ require consultation with Natural England. • Additionally the Wilbraham Fens SSSI borders the Neighbourhood Plan boundary to the north, the Great Wilbraham Common SSSI borders the Neighbourhood Plan boundary to the north east, the Fleam Dyke SSSI borders the boundary to the south east, the Roman Road SSSI borders the boundary to the south and the Gog Magog Golf Course SSSI borders the boundary to the south west. • Although the village of Fulbourn is within a Development Framework (as defined within the South Cambs Local Plan),

Criteria for determining the likely significance of effects (Annex II SEA Directive)	Likelihood and summary of significant effects
	<p>the entirety of the land surrounding the built up area is located within the Cambridge Greenbelt.</p> <ul style="list-style-type: none"> • A number of Priority Habitats (from the Priority Habitat Inventory³) are scattered throughout the Plan area, with some adjacent to the existing development framework boundary. These include good quality semi-improved grassland, lowland meadows, deciduous woodland, young trees woodland, traditional orchard, and lowland calcareous grassland. • The Plan area contains three Scheduled Monuments: <ul style="list-style-type: none"> - Settlement site by Caudle Corner Farm; - Iron Age ritual enclosure containing a Bronze Age barrow, and Roman cemetery; and - Fleam Dyke. • There are approximately 53 Listed Buildings within the Plan area; the majority of these are associated with the Fulbourn Conservation Area forming the historic core of the village. • Of these Listed Buildings, there exists the Grade II* listed Church of St Vigor and the Grade II* listed Highfield House. Both of these listed buildings are located within the Conservation Area. • The majority of the Neighbourhood Plan area is within various Source Protection Zones (SPZs). SPZs are defined around large and public potable groundwater abstraction sites. The purpose of SPZs is to provide additional protection to safeguard drinking water quality through constraining the proximity of an activity that may impact upon a drinking water abstraction. Within the Neighbourhood Plan area, there lie areas of Zone I (Inner Protection Zone), Zone II (Outer Protection Zone) and Zone III (Total Catchment). • The majority of chalk streams suffer from low summer flow, which has been increasing in recent years due to over-abstraction from the aquifer and surface water sources. • Land within Flood Risk Zones 3 and 2 exist at the Neighbourhood Plan boundary's eastern boundary

³ a spatial dataset that describes the geographic extent and location of Natural Environment and Rural Communities Act (2006) Section 41 habitats of principal importance.

<p>Criteria for determining the likely significance of effects (Annex II SEA Directive)</p>	<p>Likelihood and summary of significant effects</p>
<p>The relevance of the plan or programme for the implementation of Community legislation on the environment (e.g. plans and programmes linked to waste</p>	<p>associated with the Cam Valley river system, and the Little Wilbraham River (also a County Wildlife Site).</p> <ul style="list-style-type: none"> • The non-developed areas of the Plan area consist of Grade 2 ('very good') and Grade 3 ('good to moderate') soils. The Neighbourhood Plan area does not contain any Grade 1 ('excellent') soil, which represents the best and most versatile soil within the wider District context and also the country. • The Plan area is located within the East Anglian Chalk National Character Area (NCA). • The East Anglian Chalk NCA is characterised as a visually simple and uninterrupted landscape of smooth, rolling chalkland hills with large regular fields enclosed by low hawthorn hedges, with few trees, straight roads and expansive views to the north. The Chalk produces water that is naturally mineral rich, sediment free and of a stable temperature and as such supports specialised chalk stream ecology. A series of important nature reserves are located along the springline at the base of the chalk scarp, notably at Chippenham, Fulbourn and Fowlmere. • Medieval moated sites, park lands and nucleated villages are distinctive features of medieval settlement on the Chalk, many of which are preserved in the grounds of later country estates (for example Barrington, Sawston and Fulbourn), and many are also Scheduled Monuments. • The Plan area contains areas of land which are identified as Minerals Safeguarding Areas for sand and gravel within the Adopted Cambridgeshire County Council Minerals Core Strategy (2011). <p>The content of the Neighbourhood Plan is not in conflict with those relevant planning documents within the wider district and county area related to waste management or water protection.</p>

Criteria for determining the likely significance of effects (Annex II SEA Directive)	Likelihood and summary of significant effects
<p>management or water protection).</p> <p>The probability, duration, frequency and reversibility of the effects on the following factors:</p> <ul style="list-style-type: none"> - Biodiversity 	<p>The following impacts have been identified within this Screening Assessment:</p> <p>The Plan includes Policy FUL/04 – Protection and Enhancement of Natural Features, which seeks to ensure that new development of any size shall incorporate measures to protect, enhance and extend existing natural features in the Plan area.</p> <p>The Plan area lies outside the Impact Risk Zone (IRZ) of the Devils Dyke SAC, Wicken Fen Ramsar site and Fenland Special Area of Conservation (SAC). The HRA Screening element of this Report concludes that there would be no likely significant effects resulting from the Plan alone or in-combination with other plans and projects. This is due to the Plan not introducing any new residential or employment development proposals which would result in any direct impacts.</p> <p>The Plan area is within the IRZs of numerous SSSIs within the Plan area however, or those that are otherwise in close proximity to the Neighbourhood Plan area. The implications of this are that all new non-Plan-led housing developments within the Plan area will require an assessment of recreational pressure on relevant SSSIs and measures to mitigate adverse impacts e.g. alternative open space provision (as espoused by Natural England).</p> <p>Consultation with Natural England is considered a development management issue (in so far as consultation is required at that stage), and relevant policies exist within the adopted South Cambridgeshire Local Plan.</p> <p>In consideration of all of the above, effects on biodiversity resulting from the Plan can therefore be ruled out at the time of writing.</p>
<ul style="list-style-type: none"> - Population 	<p>It is considered that there would be no significant effects on population resulting from the Neighbourhood Plan. This is due to the small scale of the Plan area.</p>

Criteria for determining the likely significance of effects (Annex II SEA Directive)	Likelihood and summary of significant effects
<p>- Health</p>	<p>The Neighbourhood Plan includes Policy FUL/17 – Recreational and Healthcare Facilities, which includes criteria related to infrastructure provision / contributions, the expansion of the current Recreation Ground, and support for any new multi-purpose healthcare, social and lifestyle support centre proposals that may come forward in the Plan period.</p> <p>There are no other significant effects resulting from the Neighbourhood Plan regarding human health that would warrant a strategic assessment through SEA. The Plan includes policies for the protection of open spaces and the enhancement of Green Infrastructure that contribute to healthy lifestyles.</p>
<p>- Fauna</p>	<p>There are no direct impacts resulting from the Neighbourhood Plan on fauna that are considered significant at the Plan level. The Plan seeks the protection and enhancement of biodiversity at key sites and does not propose any development that could lead to any deterioration of habitats. It is possible that any number of speculative developments could be forthcoming within the Plan area that could have negative impacts on protected species, however these cannot be considered strategically significant to the extent that Strategic Environmental Assessment would be warranted. Such issues are more appropriate to be considered on a case-by-case ‘project level’ basis at the development management stage and in accordance with relevant development management policies contained within the LPA’s adopted Local Plan.</p>
<p>- Flora</p>	<p>Numerous and various areas of Priority Habitat exist within the Plan Area. The Plan includes Policy FUL/04 – Protection and Enhancement of Natural Features, which seeks to protect and enhance existing biodiversity assets in the Neighbourhood Plan area. This Policy seeks to ensure that development proposals consider opportunities for biodiversity gain through species rich planting, the protection of existing mature trees and succession planting, and the integration of native species. In addition to this Policy’s protection and enhancement of flora, South Cambridgeshire Local Plan policies apply. As a result, no effects are expected to result from the Neighbourhood Plan regarding flora.</p>

Criteria for determining the likely significance of effects (Annex II SEA Directive)	Likelihood and summary of significant effects
<p>- Soil</p>	<p>The non-developed areas of the Neighbourhood Plan area consist of Grade 2 ('very good') and Grade 3 ('good to moderate') soils. The Neighbourhood Plan does not propose any development within this or any greenfield land within the Neighbourhood Plan area. There are no identified negative implications surrounding soil quality as a result of the Neighbourhood Plan.</p>
<p>- Water</p>	<p>The Plan area is within a groundwater Source Protection Zone (Zones I, II and III). The Neighbourhood Plan does not allocate land for any development purposes that could give rise to ground water pollutants (e.g. give rise to hazardous substances such as pesticides, oils, petrol and diesel, solvents, arsenic, mercury or chromium VI; or non-hazardous substances such as ammonia or nitrates). Pollution control policies at the LPA level apply within the Neighbourhood Plan area to ensure that no negative effects on water quality should be experienced within Fulbourn.</p> <p>The HRA element of this Report concludes that although water quality is a major issue of concern for the Wicken Fen Ramsar site, and thereby Fenland SAC, the Plan does not contain any policies or proposals that would give rise to any deterioration of water quality given that the Neighbourhood Plan area lies outside the Impact Risk Zone for this Ramsar site.</p>
<p>- Air</p>	<p>There are no identified air quality issues within the Plan area. Although consultation with Natural England is required for any development that could cause air pollution (regarding industrial/agricultural development) in association with the IRZs of SSSIs in the eastern parts of the Plan area, consultation would be required at the planning application stage and is not considered a matter would warrant SEA, as a strategic process, to be undertaken.</p>
<p>- Climatic factors</p>	<p>No policies exist within the Plan that address flood risk issues, although it should be acknowledged that existing adopted Local Plan policies regarding flood risk apply in the Plan area.</p> <p>The Neighbourhood Plan area contains a relatively large area of Flood Risk Zone 3 to the east of the development framework however no development allocations area proposed within the Plan that would lead to any incompatibilities in any such areas. It is therefore considered that SEA would not be required and any</p>

Criteria for determining the likely significance of effects (Annex II SEA Directive)	Likelihood and summary of significant effects
<p>- Material assets</p> <p>- Cultural heritage</p>	<p>speculative development coming forward within Fulbourn in the Plan period can be considered at the planning application stage.</p> <p>The Plan area contains land within a Minerals Safeguarding Area (MSA) for sand and gravel within the County Council's adopted Minerals and Waste Core Strategy (Proposals Map C) (2011). The Plan does not include any policies that conflict with the MSA or include any site allocations.</p> <p>Regarding other material assets, the content of the Neighbourhood Plan is not considered to have any significant effects due to the extent / size of the Plan area. Such issues are more appropriate to be considered on a case-by-case basis at the development management stage and in accordance with relevant development management policies contained within the LPA's adopted Local Plan.</p> <p>The Plan area contains multiple Scheduled Monuments and numerous Listed Buildings, as well as the Fulbourn Conservation Area. The Plan does not allocate any land for development purposes that could have any negative effect on any of these assets but does include some proposals for improved connectivity that may have effects on heritage that would need further exploration at the appropriate stage.</p> <p>The Plan includes policies that directly or indirectly regard heritage and the historic environment that will apply to all proposals in the plan area over the Plan period. These are:</p> <ul style="list-style-type: none"> - Policy FUL/01 – Respect for Local Character and Local Setting; - Policy FUL/02 – Protected Setting of Fulbourn; - Policy FUL/06 – Securing Village Character; and - Policy FUL/08 – Building and Landscape Design <p>Irrespective of the robustness of these policies in ensuring the protection and enhancement of heritage assets, policy also exists at the LPA level which additionally applies in the Plan area. The effects on heritage are, as a result, considered a development management issue in the context of the Plan and its content. There are not considered to be any elements of the Plan that would give rise to significant effects on the historic environment at the</p>

Criteria for determining the likely significance of effects (Annex II SEA Directive)	Likelihood and summary of significant effects
<p>- Landscape</p>	<p>strategic level that would require the full application of the SEA Directive.</p> <p>The Plan area is within a sensitive landscape, both in regard to the protection objectives of the East Anglian Chalk National Character Area (NCA) and also the Cambridge Greenbelt. Nevertheless, the Plan does not allocate land for development purposes and includes policies relevant to landscape character and its preservation.</p> <p>In light of the Plan’s policy stance regarding landscape character, and in consideration also of the requirements of development proposals in accordance with the South Cambridgeshire Local Plan, there are no significant strategic landscape effects identified within this Report that would warrant the requirement for the application of the SEA Directive and the formulation of a SEA Environmental Report.</p>
<p>The cumulative nature of the effects.</p>	<p>In line with the above considerations that explore the possible individual effects of the Plan’s content, no significant effects have been highlighted as possible that could lead to any cumulative impact.</p>
<p>The trans boundary nature of the effects.</p>	<p>The adopted South Cambridgeshire Local Plan can be seen to support the protection and improvement of conditions relevant to those sustainability factors listed within the SEA Directive. The Neighbourhood Plan is not in conflict with these wider thematic policies. The HRA Screening element of this Report, which explores in-combination effects with other relevant plans and projects, also identifies no in-combination effects regarding Habitats (European) Sites.</p>
<p>The risks to human health or the environment (e.g. due to accidents).</p>	<p>It is considered that there is no risk to human health or the environment as a result of the Neighbourhood Plan. This is in consideration of the above screening requirements related to sustainability themes. The Neighbourhood Plan is unlikely to give rise to any accidents that can be considered to have a significant risk to human health or the environment.</p>
<p>The magnitude spatial extent of the</p>	<p>The Neighbourhood Plan relates to the local level only. No allocations are included within the Plan and the magnitude and</p>

Criteria for determining the likely significance of effects (Annex II SEA Directive)	Likelihood and summary of significant effects
<p>effects (geographical area and size of the population likely to be affected).</p> <p>The value and vulnerability of the area likely to be affected due to:</p> <ul style="list-style-type: none"> - special natural characteristics or cultural heritage - exceeded environmental quality standards - intensive land use 	<p>spatial extent of the Plan’s content is unlikely to be significant in a wider District context. Effects are not expected to be realised over a wide geographic area.</p> <p>As highlighted above in the screening of the Neighbourhood Plan per sustainability theme, the Neighbourhood Plan has not been assessed as having any possible negative effect associated with environmental themes.</p>
<p>The effects on areas or landscapes which have a recognised national, community or international protection status.</p>	<p>As highlighted above in the screening of the Plan per sustainability theme, the Neighbourhood Plan has not been assessed as having any significant effects on areas or landscapes which have a recognised national, community or international protection status.</p>

HRA Screening

4.1 Habitat Regulations Assessment of Development Plans

This section forms a plan level Habitats Regulations Assessment (HRA) as required by Regulation 63 of The Conservation of Habitats and Species Regulations 2017 (as amended).

Under the provisions of the EU Habitats Directive and translated into English law by the Habitats Regulations (The Conservation of Habitats and Species Regulations 2017 (as amended)), a competent authority must carry out an assessment of whether a plan or project will significantly affect the integrity of any Habitats Site, in terms of impacting the site's conservation objectives.

The first stage of HRA is the screening assessment of the impacts of a land use proposal against the conservation objectives of Habitats (European) sites. Specifically, it is to ascertain whether or not a proposal (either alone or in combination with other proposals) would potentially damage the internationally designated features of that site. Habitats (European) sites are also known as Natura 2000 sites and Habitats sites in the NPPF.

In line with the Court judgement (CJEU People Over Wind v Coillte Teoranta C-323/17), mitigation measures cannot be taken into account when carrying out a screening assessment to decide whether a plan or project is likely to result in significant effects on a Habitats Site.

This HRA Screening Report has been undertaken in order to support the Fulbourn Neighbourhood Plan which is being produced by Fulbourn Parish Council in accordance with the Neighbourhood Planning (General) Regulations 2012. The area covered by the Neighbourhood Plan is shown in Appendix 1.

The Neighbourhood Planning (General) Regulations 2012, state that submitted Neighbourhood Plans need to be accompanied by a statement explaining how the proposed Neighbourhood Plan meets the 'basic conditions' set out in Schedule 4B of the 1990 Town and Country Planning Act. These basic conditions include a requirement to demonstrate how the Plan is compatible with EU obligations, which includes the need to undertake HRA.

This section of this Report aims to:

- Identify the Habitats sites within 20km of Fulbourn Neighbourhood Plan area.
- Summarise the reasons for designation and Conservation Objectives for each site to be considered in this assessment.
- Screen the Fulbourn Neighbourhood Plan for its potential to impact upon a Habitats site.
- Assess the potential for in combination effects from other projects and plans in the area.
- Identify if there are any outstanding issues that need further investigation.

On 23 June 2016, the United Kingdom (UK) held a referendum and voted to leave the European Union (EU). On 29 March 2017 the Prime Minister triggered Article 50 of the Treaty on European Union, which commenced a period of negotiations regarding the UK's

exit from the EU. On 26 June 2018 The European Union (Withdrawal) Act 2018 received Royal Assent and work to prepare the UK statute book for Brexit has begun. The European Union (Withdrawal) Act 2018 will make sure that UK laws continue to operate following the UK's exit. There is no immediate change to legislation or policy affecting national infrastructure. Relevant EU Directives have been transposed into UK law and those are unchanged until amended by Parliament. There the requirements for HRA under the Conservation of Habitats and Species Regulations 2017 (as amended) remain in place.

4.2 Court Judgements and their consideration in this Report

4.2.1 CJEU People Over Wind v Coillte Teoranta C-323/17

As previously mentioned, in line with the Court judgement (CJEU People Over Wind v Coillte Teoranta C-323/17), mitigation measures cannot be taken into account when carrying out a screening assessment to decide whether a plan or project is likely to result in significant effects on a Habitats Site.

This HRA Screening Report does not therefore consider mitigation measures within the assessment of Likely Significant Effects resulting from the Fulbourn Neighbourhood Plan.

4.2.2 CJEU Holohan C- 461/17

This Court judgement now imposes more detailed requirements on the competent authority at Appropriate Assessment stage:

1. [...] an 'Appropriate Assessment' must, on the one hand, catalogue the entirety of habitat types and species for which a site is protected, and, on the other, identify and examine both the implications of the proposed project for the species present on that site, and for which that site has not been listed, and the implications for habitat types and species to be found outside the boundaries of that site, provided that those implications are liable to affect the conservation objectives of the site.
2. [...] the competent authority is permitted to grant to a plan or project consent which leaves the developer free to determine subsequently certain parameters relating to the construction phase, such as the location of the construction compound and haul routes, only if that authority is certain that the development consent granted establishes conditions that are strict enough to guarantee that those parameters will not adversely affect the integrity of the site.
3. [...] where the competent authority rejects the findings in a scientific expert opinion recommending that additional information be obtained, the 'Appropriate Assessment' must include an explicit and detailed statement of reasons capable of dispelling all reasonable scientific doubt concerning the effects of the work envisaged on the site concerned.

Within this HRA Screening report, the assessment determines the requirement whether an Appropriate Assessment is needed for the Fulbourn Neighbourhood Plan.

4.3 Habitats (European) Sites

Habitats Sites is the term used in the NPPF (2019) to describe any site which would be included within the definition at regulation 8 of the Conservation of Habitats and Species Regulations 2017 for the purpose of those regulations. European sites are the centrepiece of EU nature and biodiversity policy. It is an EU wide network of nature protection areas. They form an EU wide network of nature protection areas. The aim of the network is to assure the long-term survival of Europe's most valuable and threatened species and habitats.

The sites are designated under the European Union (EU) Birds Directive (Council Directive 79/409/EEC on the Conservation of Wild Birds) and the EU Habitats Directive (Council Directive 92/43/EEC on the Conservation of Natural Habitats and of Wild Fauna and Flora).

The Birds Directive requires the establishment of Special Protection Areas (SPAs) for birds. The Habitats Directive similarly requires Special Areas of Conservation (SACs) to be designated for other species, and for habitats. Wetlands of International Importance (Ramsar sites) are also considered as part of the Natura 2000 network. This is because all SPAs and SACs are comprised of Sites of Special Scientific Interest (SSSIs) and all Ramsar sites in England are SSSIs. Together, SPAs, SACs and Ramsar Sites are considered as Habitats Sites in England (NPPF, 2019).

4.3.1 Explanation of SPAs, SACs and Ramsar Sites

Special Protection Areas (SPAs)

SPAs are areas which have been identified as being of international importance for the breeding, feeding, wintering or the migration of rare and vulnerable species of birds found within EU countries. Example: Ouse Washes is internationally important for wintering waterfowl. Legislation: EU Birds Directive.

Special Areas of Conservation (SACs)

SACs are areas designated to protect habitat types that are in danger of disappearance, have a small natural range, or are highly characteristic of the region; and to protect species that are endangered, vulnerable, rare, or endemic. Example: woodland habitat of Eversden and Wimpole Woods for the population of Barbastelle bats. Legislation: EU Habitats Directive.

Wetlands of International Importance (Ramsar Sites)

Ramsar Sites are designated to protect the biological and physical features of wetlands, especially for waterfowl habitats. For example, Wicken Fen is an outstanding remnant of East Anglian peat fens and supports one species of British Red Data Book plant fen violet *Viola persicifolia* which survives at only two other sites in Britain. Ramsar sites often overlap with SACs and SPAs and UK planning policy determines that they should be accorded the same importance when developments are proposed. Legislation: Ramsar Convention (1971) – Wetlands of International Importance.

4.3.2 Habitats Sites to be considered

There are five Habitats sites which lie within 20 km of the Fulbourn Neighbourhood Plan area. These are listed in Table 3 and shown on the map in Appendix 2.

Table 3: Habitats Sites within 20km to be considered in this assessment

SPA
None
SAC
Fenland, Eversden and Wimpole Woods and Devils Dyke
Ramsar
Wicken Fen, Chippenham Fen

The Fulbourn Neighbourhood Plan area lies outside the evidenced 10km Zone of Influence (ZOI) for Eversden and Wimpole Woods SAC, the 4km IRZ for Devils Dyke and the 5km IRZ for Wicken Fen and Chippenham Fen Ramsar sites and Fenland SAC as identified on the [MAGIC website](#). It is also outside the 5km buffer for Breckland SPA & SAC.

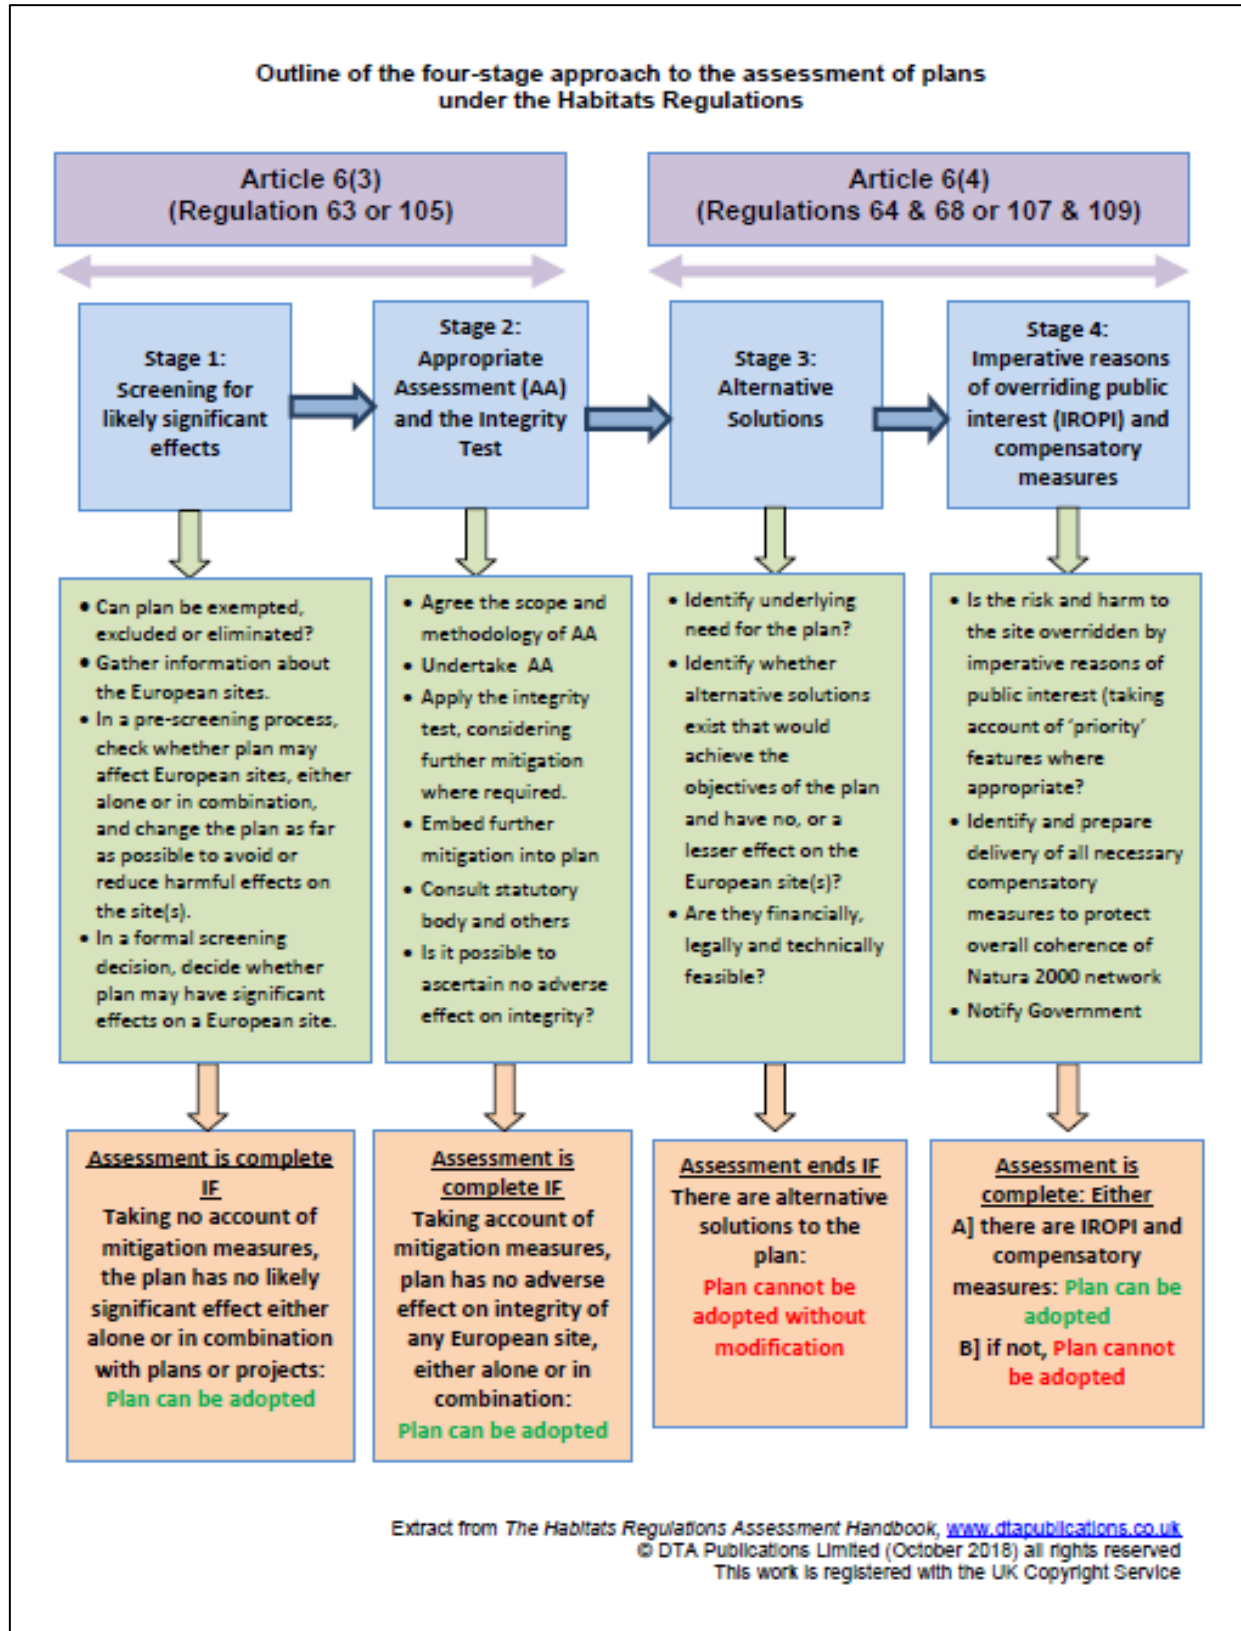

There are therefore there are no Habitats sites within scope for this HRA screening report.

4.4 Method and Approach

The Neighbourhood Planning (General) Regulations 2012, state that submitted Plans need to be accompanied by a statement explaining how the proposed Plan meets the 'basic conditions' set out in Schedule 4B of the 1990 Town and Country Planning Act. These basic conditions include a requirement to demonstrate how the Plan is compatible with EU obligations, which includes the need to undertake a HRA screening report; this is necessary to ensure the making of the neighbourhood plan is not likely to have a significant effect on a Habitats (European) site or a Habitats (European) offshore marine site, either alone or in combination with other plans or projects.

This document relates only to Stage 1 of the HRA process as set out in Figure 1 below.

Figure 5: Outline of the Four Stage Approach to the Assessment of Plans under the Habitats Regulations (taken from the DTA handbook).

4.4.1 Stage 1: HRA Screening

The screening stage identifies if any significant effects are likely because any policies or projects will have an impact on a Habitats Site. Table 4 identifies the different categories assigned to each policy in the plan: Category A identifies those policies or projects that are considered to have No Negative Effect. Category B identifies those policies or projects that will have No Likely Significant Effect. Category C identifies those policies or projects that might have Likely Significant Effect upon a Habitats Site either alone or in combination with other plans or projects. Section 4.5 considers each policy or projects and the results of the screening exercise recorded.

Table 4: Screening categorisation

Category A: No negative effect

Policies or projects that will not be likely to have any negative effect on a Habitats site.

Category B: No Likely Significant Effect

Policies or projects that could have an effect but would not be likely to have a *significant* negative effect on a Habitats site alone or in combination. This conclusion could only be reached if the effects, even in combination and taking the precautionary principle into account, are considered trivial.

Category C: Likely Significant Effect

Policies or projects which are predicted to have a likely significant effect on a Habitats Site either alone or in combination with other plans and projects.

4.4.2 Potential impacts of Fulbourn Neighbourhood Plan on Habitats Sites

There are a wide range of potential impacts on Habitats Sites that could arise from development plans. These can be summarised as -

- Land take by developments;
- Impact on protected species found within but which travel outside the protected sites may be relevant where development could result in effects on qualifying interest species within the Habitats site, for example through the loss of feeding grounds for an identified species.
- Increased disturbance, for example from recreational use resulting from new housing development and / or improved access due to transport infrastructure projects;
- Changes in water availability, or water quality as a result of development and increased demands for waste water treatment, and changes in groundwater regimes due to increased impermeable areas;
- Changes in atmospheric pollution levels due to increased traffic, waste management facilities etc. Pollution discharges from developments such as industrial developments, quarries and waste management facilities.

In line with the SA Scoping Report for South Cambridgeshire's Local Plan, each policy will be assessed against the criteria in the table below.

Table 5: Assessment of potential impacts

Nature of potential impact	How the Fulbourn Neighbourhood Plan (alone or in combination with other plans and projects) could affect a Habitats site	Why these effects are not considered significant
Land take by development	The Fulbourn Neighbourhood Plan area is outside the boundaries of the Habitats Sites within scope of this HRA.	N/A
Impact on protected species outside the protected sites	The Fulbourn Neighbourhood Plan area lies outside the 4km Impact Risk Zone (IRZ) for Devils Dyke and outside the IRZ 5km for Wicken Fen Ramsar site which is a component of Fenland SAC.	N/A
Recreational pressure and disturbance	There is public access to Eversden and Wimpole Woods SAC.	<p>The Fulbourn Neighbourhood Plan area is 14km from Eversden and Wimpole Woods SAC so beyond the 10km distance that Natural England consider, in the absence of evidence that visitors are likely to travel to these sites for recreation.</p> <p>The site is carefully managed by the landowners to avoid impacts from recreational pressure and disturbance</p>
Water quantity and quality	Although water quality is an issue of concern for Wicken Fen Ramsar site (and thereby Fenland SAC), Fulbourn Neighbourhood Plan area lies outside the 5km Impact Risk Zone, so it is considered that there is no pathway for water quantity or quality impacts.	N/A.

Nature of potential impact	How the Fulbourn Neighbourhood Plan (alone or in combination with other plans and projects) could affect a Habitats site	Why these effects are not considered significant
Changes in pollution levels	The Fulbourn Neighbourhood Plan area lies outside the IRZ of the wetland SSSIs within scope of this HRA, so it is considered that there is no pathway for pollution impacts.	N/A

4.5 Results from HRA Screening of Neighbourhood Plan Policies

Each of the policies in the Fulbourn Neighbourhood Plan was screened to identify whether they would have any impact on a Habitats Site.

Table 4: Assessment of potential impacts

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
Policy FUL/01 – Respect for Local Character and Local Setting	Development opportunities in Fulbourn will be conceived and designed in a way that respects and enhances the character and setting of the village and its surrounding through application of the guidance and design principles of the Fulbourn Village Design Guide (SPD 2020).	No, Category A	No specific recommendations
Policy FUL/02 – Protected Setting of Fulbourn	1. The setting and special character of Fulbourn, surrounded by the Cambridge Green Belt, will be protected from urban encroachment to preserve its quality of discrete and individual village set among fields and woodland retaining a clear visual and physical separation from the outer developed boundary of the urban area of Cambridge and from neighbouring villages.	No, Category A	No specific recommendations

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>2. Important views across open fields from the Gog Magog Hills and from all other approach roads shall be protected, with land retained for agricultural use or as natural open space or woodland (Fig. 5), to ensure that the setting of Fulbourn as a village within the countryside is preserved.</p> <p>3. The pattern of fields penetrating the built area of the village and outside the Village Framework Boundary will be protected from development and urbanisation to retain this key feature of the village setting. This important relationship will be protected through:</p> <p>a. Designation of Important Countryside Frontages, in accordance with Policy NH/13 of the South Cambridgeshire Local Plan.</p> <p>b. Identification of sensitive fields with a strong visual relationship between the village edge and the open countryside that contribute to the views from inside the village over rural landscape.</p>		
<p>Policy FUL/03 – Development in the Green Belt and Outside the Development Framework</p>	<p>1. Development proposals outside the Development Framework of the village should clearly demonstrate that they do not compromise the rural setting of the village and its visual and physical separation from Cambridge or other nearby settlements. Development within the Green Belt will only be permitted in exceptional cases in accordance with the NPPF.</p>	<p>No, Category A</p>	<p>No specific recommendations</p>

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>2. Any development outside the Development Framework will also be required to demonstrate that:</p> <p>a. The village character and integrity (Policy FUL/06) is respected and enhanced.</p> <p>b. The richness of trees and tree belts surrounding the village are maintained, where building rooflines are consistently below the crowns of existing trees or the expected height of new ones 10 years from planting.</p> <p>c. Street night light pollution is limited, with clearly perceptible lower lighting levels than usual for built areas and avoidance of floodlit spaces (including sport facilities), especially at the fringes of the village, within the Green Belt or in proximity of biodiversity networks.</p> <p>d. Outward views from the edge of the development and across the site towards the open countryside are preserved and enhanced, especially of views towards the Windmill or other local landmarks.</p> <p>e. Abundant additional tree planting using suitable native species and generous provision of natural open space within the site.</p> <p>f. Natural buffers and hedgerow planting are provided along all site edge roads and prominent 'gateway' buildings are avoided.</p>		
Policy FUL/04 – Protection and Enhancement of Natural Features	1. New development of any size shall incorporate measures to protect, enhance and extend existing natural features and	No, Category A	No specific recommendations

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>demonstrate that consideration has been given to:</p> <ul style="list-style-type: none"> a. Development form and design which respects and enhances local natural features. b. Creation of opportunities for positive biodiversity gain through species rich planting, including some larger native species trees and shrubs as part of the site. c. Enhancement and retention of habitat connectivity and provision of wildlife friendly hedges/fences to allow corridors for small animals. d. Protection of existing mature trees and succession planting, where space allows, with the species of local and indigenous trees which are larger at maturity and can therefore enrich and strengthen current tree presence. e. Enhancement of the village natural features and biodiversity net gain with indigenous street trees of appropriate large species and avoiding out of character ornamental trees. f. Incorporation of integral boxes for birds (such as swifts and sparrows) in all buildings, and bat boxes, where appropriate. <p>2. New developments of 10 units or more shall demonstrate, in addition, that provision is made for:</p> <ul style="list-style-type: none"> a. The preservation of important elements of existing biodiversity, including mature trees and hedgerows, and safeguarding or establishing suitable green networks for wildlife, which link to 		

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>the wider existing green infrastructure (see Fig. 7).</p> <p>b. The creation of natural and semi-natural greenspace in accordance to the definition of Natural England (ENRR526 Accessible Natural Greenspace).</p> <p>c. The assessment of current site biodiversity and provision of at least 10% net gain in biodiversity value on site. Where this cannot be accommodated on site, to identify alternative sustainable mitigation measures at an agreed location within the Parish boundaries as appropriate.</p> <p>d. Ensuring that the drainage patterns of the area are not compromised, considering the context of a changing climate, and no off site impacts are generated to the water flow and quality of the springs, streams and ditches around the Parish that feed into the Fulbourn Fen Nature Reserve (SSSI), the Wilbraham River system and Wilbraham Fen (SSSI) on the northern parish boundary.</p> <p>e. Ensuring sustainable long-term maintenance for the site for wildlife benefit, amenity and social value, as appropriate.</p>		
Policy FUL/05 – Additional Protected Green Spaces within the Village	<p>1. In addition to the sites already identified in the South Cambridgeshire Local Plan (2018), the following sites make significant contribution to the village and are designated as follows:</p> <p>a. Additional Local Green Space according to the criteria of the</p>	No, Category A	No specific recommendations

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>NPPF, where no development should take place at his location except in exceptional circumstances:</p> <ul style="list-style-type: none"> • Pound Green, containing the village war memorial and making a significant contribution to a stronger village character, identity and amenity and providing habitat opportunities for wildlife. <p>b. Additional Protected Village Amenity Areas according to the criteria of Policy NH/11 of the Local Plan. Development will not be permitted within or adjacent to these areas if it would have an adverse impact on the character, amenity, tranquillity or well-being of village residents. These include:</p> <ul style="list-style-type: none"> • Saint Vigor’s Road Green Space • The Swifts Green Space • The Haven Green Space • Caraway Road/Bird Farm Road Green Space • Cherry Orchard Green Space • Huntsmill Green Space 		
<p>Policy FUL/06 – Securing Village Character</p>	<p>1. New development proposals within the Fulbourn Neighbourhood Plan area should have regard to the integrity of the historical and agricultural and rural character of the area. Development proposals will be supported where they conserve or enhance the visual qualities and essential characteristics of Fulbourn within its landscape.</p> <p>2. New development, including infill and house alterations, will be</p>	<p>No, Category A</p>	<p>No specific recommendations</p>

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>expected to respect and positively contribute to the essential character of Fulbourn, by demonstrating a creative and contemporary response to the character of:</p> <p>a. Local street and lane layout – see also Policy FUL/07.</p> <p>b. Local architectural and building heights, form and features – see also Policy FUL /08.</p> <p>c. Type and style of tree planting and hedgerow species within the village in both street verges and private gardens.</p> <p>d. Soft edges to the built-up area, with diverse built frontages set in landscape.</p>		
Policy FUL/07 – Street and Lane Layout	<p>1. The existing streets and lanes of Fulbourn shall retain their essential character, green aspect, scale, width and alignment.</p> <p>2. New development proposals that include alterations to existing streets, roads, lanes, pedestrian passages and spaces or new street layouts will be expected to demonstrate respect for local characteristics. In particular detailed design of new street layouts should:</p> <p>a. Adopt the characteristics of the village streets and lanes, including the prevailing proportions of road to green verges.</p> <p>b. Create street networks as a natural extension of the village with informal interconnected streets, lanes and spaces, avoiding rigid and regular grids.</p>	No, Category A	No specific recommendations

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>c. Align streets and public spaces so that open views from within the village towards countryside and local landmarks are retained and enhanced.</p> <p>d. Minimise the use of associated signage, lighting and other road hardware.</p> <p>3. The High Street provides a key social and commercial function for the village and any development in or adjacent to it will be expected to make a positive contribution to its character, scale, attractiveness and vibrancy.</p>		
<p>Policy FUL/08 – Building and Landscape Design</p>	<p>1. New buildings, including infill, extensions and housing alterations, will be designed to make a positive contribution to the character of the village and demonstrate they respond they respond in particular to the following design criteria:</p> <p>a. Building heights should be lower than the crown of surrounding trees to retain the concept of a ‘village among trees’, indicatively corresponding to a maximum height from ground to ridge of 8.5m or less, a typical 2-storey building.</p> <p>b. Overall height of any proposed 2.5-storey building shall be similar to that of a typical 2-storey building. Such a building shall be defined by having an upper floor plan significantly smaller than the one below (first floor above ground level) with daylight provided by a roof window or dormer which is fully within the tiled roof area.</p>	<p>No, Category A</p>	<p>No specific recommendations</p>

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>c. Buildings should be informally aligned and avoid forming rigid and regular perimeter blocks.</p> <p>d. A variety of building types should be provided, designed with coherent scale, massing and elegant simplicity, avoiding complex patterns of different materials, contrasting colours and styles that have no architectural links with the village.</p> <p>e. Parking spaces and garages should make minimal visual impact; storage for refuse and recycling bins and cycles, together with other infrastructure such as meter boxes shall be integrated into the design within enclosures, and not visible from the street.</p> <p>f. Local and contemporary features, materials and detailing should be used, and main road frontages should include tall trees, hedges and boundary walls typical of Fulbourn.</p> <p>2. New development proposals shall contribute to the richness of the village’s existing landscape in accordance to Policy FUL/04. In particular:</p> <p>a. Trees and native shrubs should be used to frame views and create a transition (‘soft edge’) between the village and the open countryside.</p> <p>b. Any green buffer between new development and the existing built-up areas of the village should be laid out to respect privacy while not isolating the new community.</p>		

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>c. Sustainable drainage systems (SUDS) should form part of the landscape, taking inspiration from traditional ditches and watercourses and contributing to the biodiversity of the site through appropriate dense planting and long-term maintenance.</p>		
<p>Policy FUL/09 - Housing Design Quality</p>	<p>1. All residential development proposals shall contribute positively to the quality and character of Fulbourn (see Policy FUL/06 to FUL/08), and as set out in the Fulbourn Village Design Guide (SPD 2020), South Cambridgeshire District Council's Design Guide and any documents that supersede or complement these.</p> <p>2. For modifications or extensions to existing dwellings, design proposals will need to clearly demonstrate that the following criteria are met:</p> <p>a. Building and site boundaries are sensitively treated to avoid over-development and adverse impact on the character of the area and its street scene.</p> <p>b. Where the existing building is of high quality or holds significant architectural or historic interest, proposed extensions must not dominate the original building and context.</p> <p>c. A contemporary design has been considered for an extension that adds quality and interest to the original building. Designers should seek creative solutions to providing natural light, ventilation, summer shading and winter solar gain.</p>	<p>No, Category A</p>	<p>No specific recommendations</p>

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>d. A choice of high-quality materials which reflect the existing building or, where appropriate, the context of the wider village area.</p> <p>3. For newly built single dwellings or schemes of up to 9 houses, including infill and windfall sites, self-build or co-housing, this means demonstrating that:</p> <p>a. The proposals are in scale with neighbouring developments.</p> <p>b. The proposals are generally in keeping with the design context or provide an opportunity to strengthen village design quality and provide a positive precedent for future development.</p> <p>4. For proposals that result in the development of new housing schemes of 10 dwellings or more, it is also necessary:</p> <p>a. To demonstrate that the proposed development will contribute to sustainable development through a submitted Building for a Healthy Life assessment or other appraisal system agreed with the local Parish Council.</p> <p>b. To ‘design in’ opportunities for safe outdoor play in playgrounds and on the streets notwithstanding compliance with Local Plan Policy SC/7 (Outdoor Play Space, Informal Open Space and New Developments).</p> <p>c. To incorporate appropriate energy generation technology (solar PV, solar thermal, heat pumps, etc.) and demonstrate how contributions</p>		

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>towards becoming energy neutral are maximised in the scheme.</p> <p>5. All proposals are expected to:</p> <ul style="list-style-type: none"> a. Observe high standards of energy efficiency and use of renewables. b. Adopt rainwater storage and grey water technology. c. Respond to the needs of residents to manage their waste, access their cycles, park their cars and report their utility usage. d. To adopt design and layout strategies which prioritise walking and cycling, create permeable, connected, safe communities with links to amenities and facilities and to other residential areas. e. To ‘design in’ active facades where front doors and habitable rooms overlook the street, thus also providing enhanced safety through informal observation by ‘eyes on the street’. f. To give careful consideration of car parking so that it does not dominate the street. g. To ensure creative use of landscaping, building design and planting that enhances the public realm, creates biodiversity and increases amenity. h. To use opportunities to provide public art that will reinforce a sense of place and community. 		
Policy FUL/10 - Housing	1. New housing development proposals of 10 or more units will be expected to take account of and	No, Category A	No specific recommendations

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
Development and Local Need	<p>demonstrate that they respond to identified local need, by providing:</p> <p>a. Housing mix including at least a 5% share of small units designed to cater for the needs of an ageing population, built to accessible and adaptable dwellings M4(2) standard rounding to the nearest whole property.</p> <p>b. At least 40% of the houses should be affordable according to Local Plan Policy H/10, including a suitable proportion of low-income houses for sale and rent and for people with disability.</p> <p>c. Net density (as defined in the Local Plan) shall not exceed 30 dwellings per hectare (dph) in any particular part of the development, unless it can be demonstrated that higher densities are appropriate through a design-led approach respecting the character of the locality and the scale of development and are in accordance with other policies of this plan.</p> <p>Any developers' obligations to provide social and community infrastructure should be directed in preference towards increasing and strengthening the facilities and amenities of the village as a whole and to support community integration, in response to the requirements set out by Fulbourn Parish Council.</p>		
Policy FUL/11 - Ida Darwin and Teversham Road Sites	1. In addition to the requirements of other policies of the Neighbourhood Plan, redevelopment of the Ida	No, Category A	No specific recommendations

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>Darwin Site shall respond positively to the following criteria:</p> <ul style="list-style-type: none"> a. Visual separation from Capital Park shall be provided by a green wedge to be retained and enhanced through planting and buffers. This area will be established in perpetuity as a natural area, with trees and high biodiversity value, with minimal low-level lighting only along the southern boundary pedestrian/cycle path. b. The design and layout of the development should reflect its location by retaining the prevailing openness of the Green Belt, including the balance of green space and built form in which open natural space visually prevails, and maintaining its character of buildings in parkland. c. Particular attention shall be made to preserving and enhancing long-distance views across open countryside and to the retention of views across the site, particularly out towards the Windmill to the south. d. Orientation and integration (functionally and visually) of the new residential area with the village, rather than self-containment or merging with the fringe of Cambridge, is expected, including pedestrian routes, signage and visual coherence. e. Pedestrian and cycle connections along Fulbourn Old Drift linking Fulbourn village with the Beechwoods Estate and the bus transport hub at the Tesco 		

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>Superstore should form part of the redevelopment plans to provide an opportunity to connect the Beechwoods Estate with the village and its facilities.</p> <p>f. A clear approach to reducing the need to travel by private vehicle through the provision of infrastructure that supports low carbon mobility.</p> <p>2. Any development of land at the proposed Teversham Road site, south of the railway line, shall ensure that:</p> <p>a. There is no degradation of the natural wetland ecosystem associated with the natural spring at Poor Well, the chalk stream and associated wetlands.</p> <p>b. There is an effective and sustainable drainage scheme for this low-lying site in perpetuity, including future-proofing for the challenge of the escalating climate emergency.</p> <p>c. The vistas to the surrounding countryside from Poor Well are retained reflecting the existence of a natural wildlife corridor that extends from Poor Well on Cow Lane northwards to Fulbourn Fen, the Wilbraham River and Little Wilbraham Fen, including provision to conserve and enhance the existing flora and fauna.</p> <p>d. Design and layout of the site should be integrated into the pattern of streets and lanes of the village, at least for pedestrians and cyclists, so</p>		

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	as to avoid becoming an isolated housing estate.		
Policy FUL/12 – Rural Exception Sites	<p>1. The development of rural exception sites will only be supported if all the relevant criteria in Policy FUL/09 are met and it can be demonstrated that the site proposal:</p> <p>a. Addresses a recognised local need which is not and cannot be satisfied elsewhere.</p> <p>b. Prioritises access to housing by local residents.</p> <p>c. Secures 100% affordable homes in perpetuity. d. Does not compromise the views, rural setting and biodiversity protected by Policies FUL/01-04</p>	No, Category A	No specific recommendations
Policy FUL/13 – Employment Development in General	<p>1. Within the village Framework Boundary, planning applications for business uses which meet the criteria set out in Policies E/12 of the South Cambridgeshire Local Plan 2018 will be supported, especially if new employment opportunities available to village residents are created and there is a demonstrable reduction in the need to travel.</p> <p>2. All employment development will need to demonstrate in a Transport Statement that:</p> <p>a. Car parking and transportation to serve the business can be provided without loss of character, visual amenity and safety. Developments will also be expected to demonstrate that the proposed</p>	No, Category A	No specific recommendations

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>changes will not materially increase the traffic load on the village roads.</p> <p>b. The requirements and operation of van and heavy vehicles has been fully explored and permitted only subject to implementation of adequate mitigation measures.</p> <p>c. Development requiring heavy vehicle movements will only be acceptable if heavy vehicle movement takes place at the village periphery or with direct access to the road network outside of the village boundary.</p> <p>d. All employment development must clearly show its commitment to the adoption of sustainable travel measures.</p>		
Policy FUL/14 – Large Employment Sites	<p>1. Any proposed development, re-development or extensions to existing business premises at Capital Park or the Peterhouse Extension site should be compliant with the Fulbourn Village Design Guide as well as the relevant policies of the South Cambridgeshire Local Plan.</p> <p>2. Measures to support ambitious sustainable travel in line with accepted best practice at the time of the application will be required. These should be clearly set out in a Transport Assessment with clear responsibilities for monitoring and management.</p>	No, Category A	No specific recommendations
Policy FUL/15 – Rural and Edge of Village Employment	1. Employment and employment diversification in rural areas (Green Belt) is supported as long as Policy E/13 of the South Cambridgeshire Local Plan 2018 is respected and	No, Category A	No specific recommendations

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>there is no increase in volume and heavy vehicle movement through the existing communities.</p> <p>a. Employment developments or extensions requiring routine heavy vehicle movements will only be supported if they have direct access to the road network outside of the village boundary.</p> <p>b. Adequate planted edges to screen the car parking will be required.</p>		
Policy FUL/16 – Valued Community Assets	1. Proposals that result in the loss of valued community assets such as meeting rooms, public houses, places of worship and recreation and sports facilities will be resisted unless there is clear evidence that the asset is no longer required, or an alternative, suitable and enhanced facility is provided at an accessible location within the village and with the support of the local community.	No, Category A	No specific recommendations
Policy FUL/17 – Recreational and Healthcare Facilities	<p>1. Where development of large sites is required to make financial and / or direct contribution to community facilities, contribution towards the expansion and strengthening of the existing facilities should be considered in preference to creation of new ones.</p> <p>2. Expansion of the current Recreation Ground to meet current standards by the National Playing Fields Association and provide additional outdoor pitch space is strongly preferred to the creation of alternative facilities elsewhere.</p>	No, Category A	No specific recommendations

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>a. The field adjacent to the Recreation Ground is designated for the required expansion (see Fig. 9)</p> <p>b. Expansion of outdoor facilities is to be prioritised over provision of additional indoor ones.</p> <p>Alternative facilities at other locations, and as part of new development, should clearly demonstrate that they are offering synergy with the existing ones and that they are provided and designed to strengthen the community of Fulbourn as a whole.</p> <p>3. The provision of a new multi-purpose healthcare, social and life-style support centre to replace the existing Health Centre is strongly encouraged and should be prioritised above the provision of other community facilities.</p> <p>a. Redevelopment and intensification of the current site for this purpose would be welcomed, because of its accessible location. Alternative locations should be equally easily accessible.</p> <p>There will be an expectation of collaborative working with the current GP practice.</p>		
Policy FUL/18 – Sustainable Mobility	<p>1. Within the village, where appropriate, development should:</p> <p>a. Clearly demonstrate a clear order of priority given to road users as follows: pedestrians, cycling and horse riding, public transport, innovative mobility, shared transport, private transport.</p>	No, Category A	No specific recommendations

Policy Number	Policy Wording	Will Policy have Likely Significant Effects on the Habitats Sites?	Recommendations
	<p>b. Design streets for safe pedestrian use, including by wheelchair / electric chair.</p> <p>c. Ensure that existing pedestrian / cyclist access is not reduced and if any changes are required to road configuration then the opportunity shall be used to enhance pedestrian and cycling access.</p> <p>d. Integrate with the existing network of shortcuts, footpaths, cycleway and bridleways, linking, where applicable, into the network serving the wider Parish Area.</p> <p>e. Positively contribute to the upgrade and maintenance of the existing networks and contribute to improved bus provision, including additional high-quality and safe bus waiting areas.</p> <p>2. Adoption of sustainable mobility measures and integration with Cambridge sustainable mobility efforts are supported.</p>		
<p>Policy FUL/19 – Safe Streets</p>	<p>1. The character of the streets shall comply with the Village Design Guide (SPD 2020)</p> <p>2. Roads, footpaths and lighting should use material with low environmental impact and offer easy long-term maintenance.</p>	<p>No, Category A</p>	<p>No specific recommendations</p>

4.5.1 Recommendations

There are no specific recommendations to deliver for the policies in this draft Neighbourhood Plan as they have all been assigned to Category A. There is therefore no need to amend the policy text as they are not predicted to have a Likely Significant Effect on any Habitats site.

The in-combination effects from other plans and projects are considered in the following

Section.

4.6 Other Plans and Projects: In-combination Effects

The plans and projects listed below and their HRAs have been carried out by South Cambridgeshire District Council or other organisations and none have been found to have a likely significant effect on the Habitats sites within scope of this assessment.

The Water Cycle Strategy (WCS) for Major Growth Sites in and Around Cambridge is not in itself a relevant plan or project under the Habitats Regulations but was prepared to support the delivery of the existing development strategy. Whilst it does not provide an assessment of new proposals for the Local Plan, its findings are relevant to support the assessment of this plan. It focused on issues related to the water supply, surface drainage and wastewater sewerage associated with potential development sites, and also concluded no likely significant effects, and that protected sites could be screened out of further assessment.

In the context of this HRA, the other relevant plans to be considered (i.e. those that have also triggered a requirement for HRA) are listed below in combination with Fulbourn Neighbourhood Plan HRA.

Table 6: Other plans or projects considered for in combination effects

Statutory Body	Title of HRA or Project	Findings of HRA or Project	Potential for in combination effects
South Cambridgeshire District Council	Northstowe Area Action Plan HRA (April 2007)	“It can be objectively concluded that the Northstowe Area Action Plan is not likely to have any significant effects on any Natura 2000 or Ramsar sites. There is therefore no requirement to proceed to the next stage of an Appropriate Assessment.”	It is considered that in combination likely significant effects are not predicted.
South Cambridgeshire District Council	Cambridge Southern Fringe Area Action Plan HRA (May 2007)	“This AAP was subject to an HRA and found not to impact on a Natura site or a Ramsar site.”	It is considered that in combination likely significant effects are not predicted.

Statutory Body	Title of HRA or Project	Findings of HRA or Project	Potential for in combination effects
South Cambridgeshire District Council	Cambridge East Area Action Plan HRA (May 2007)	“It can be objectively concluded that the Cambridge East Area Action Plan is not likely to have any significant effects on any Natura 2000 or Ramsar sites. There is therefore no requirement to proceed to the next stage of an Appropriate Assessment.”	It is considered that in combination likely significant effects are not predicted.
South Cambridgeshire District Council	North West Cambridge Area Action Plan HRA (August 2007)	“It has been objectively concluded that the North West Cambridge Area Action Plan – Preferred Options Draft - is not likely to have any significant effects on any Natura 2000 or Ramsar sites. It is therefore concluded that there is no requirement to proceed to the next stage of an Appropriate Assessment.”	It is considered that in combination likely significant effects are not predicted.
South Cambridgeshire District Council	Habitat Regulations Assessment: Chapter 20 of South Cambs Local Plan SA Scoping Report (June 2012) and including the Draft Final Sustainability Report (2014) and	“The Local Plan for the district was subject to an HRA screening and found to have no likely significant impact on a Natura site or a Ramsar site.”	It is considered that in combination likely significant effects are not predicted.

Statutory Body	Title of HRA or Project	Findings of HRA or Project	Potential for in combination effects
	Sustainability Appraisal Addendum (2015)		
South Cambridgeshire District Council	Waterbeach New Town SPD HRA screening report (2018)	“The overall conclusion of this screening assessment is that the draft Waterbeach New Town SPD is unlikely to have any significant effects on the Natura 2000 and Ramsar sites identified alone or in combination with other plans or projects.”	It is considered that in combination likely significant effects are not predicted.
South Cambridgeshire District Council	Bourn Airfield New Village SPD SEA / HRA Screening Report (June 2019)	“The HRA element of this Screening Report indicates that the draft Bourn Airfield New Village SPD is not predicted to have likely significant effects on Eversden and Wimpole Woods SAC, either alone or in combination with other plans and projects.”	It is considered that in combination likely significant effects are not predicted.
South Cambridgeshire District Council	Greater Cambridge Local Plan Habitats Regulations Assessment Issues and Options Scoping Report (Dec 2019)	“This Scoping document has been produced to provide guidance and parameters for developing the GCLP in the context of European sites and as a reference point for stakeholders	N/A

Statutory Body	Title of HRA or Project	Findings of HRA or Project	Potential for in combination effects
South Cambridgeshire District Council and Cambridge City Council	North East Cambridge Area Action Plan HRA Report (July 2020)	wishing to comment on the document.” RE: Air Quality, Water Quality, Water Quantity, and Recreation - “In accordance with the precautionary principle, a conclusion of no AEoI cannot be reached.”	It is considered that in combination likely significant effects are not predicted as all Fulbourn Neighbourhood Plan policies have been assigned to Category A.

Conclusions

5.1 Strategic Environmental Assessment (SEA)

The Neighbourhood Plan has been prepared for town and country planning purposes and sets a framework for future development consent. The policies of the Neighbourhood Plan can be considered to determine the use of small areas at local level commensurate with their status in determining local planning applications.

The Plan does not allocate any land for development purposes and does not include any content that could give rise to significant negative effects on the environment, or any social or economic tenets of sustainability.

The Fulbourn Neighbourhood Plan can therefore be **screened out** for its requirement of Strategic Environmental Assessment in line with the requirements of Directive 2001/42/EC.

5.2 Habitats Regulations Assessment (HRA)

Subject to Natural England's review, this HRA screening report indicates that the Fulbourn Neighbourhood Plan is not predicted to have likely significant effects on any Habitats site, either alone or in combination with other plans and projects. The requirement for the Plan to undertake further assessment under the Conservation of Habitats and Regulations 2017 (as amended) is therefore **screened out**.

Appendix 2: Consultation Responses from the Statutory Environmental Bodies

Historic England

6 November 2020

Thank you for inviting Historic England to comment on this consultation. As the Government's adviser on the historic environment Historic England is keen to ensure that the protection of the historic environment is fully taken into account at all stages and levels of the local planning process. Therefore we welcome this opportunity to review the Screening Report for this plan. For the purposes of this consultation, Historic England will confine its advice to the question, "Is it (the Fulbourn Neighbourhood Plan) likely to have a significant effect on the historic environment?". Our comments are based on the information supplied with the Screening Opinion.

The Screening Report indicates that the Council considers that the plan will not have any significant effects on the historic environment. We note that the plan does not propose to allocate any sites for development.

On the basis of the information supplied, and in the context of the criteria set out in Schedule 1 of the Environmental Assessment Regulations [Annex II of 'SEA' Directive], Historic England concurs with the Council that the preparation of a Strategic Environmental Assessment is not required.

The views of the other two statutory consultation bodies should be taken into account before the overall decision on the need for an SEA is made.

I should be pleased if you can send a copy of the determination as required by REG 11 of the Environmental Assessment of Plans and Programmes Regulations 2004.

We should like to stress that this opinion is based on the information provided by you with your correspondence. To avoid any doubt, this does not reflect our obligation to provide further advice on later stages of the SEA process and, potentially, object to specific proposals which may subsequently arise (either as a result of this consultation or in later versions of the plan) where we consider that, despite the SEA, these would have an adverse effect upon the environment.

Historic England strongly advises that the conservation and archaeological staff of the relevant local authorities are closely involved throughout the preparation of the plan and its assessment. They are best placed to advise on; local historic environment issues and priorities, including access to data held in the Historic Environment Record (HER), how the allocation, policy or proposal can be tailored to minimise potential adverse impacts on the historic environment; the nature and design of any required mitigation measures; and opportunities for securing wider benefits for the future conservation and management of heritage assets.

Yours sincerely

Edward James – Historic Places Advisor, East of England

Natural England

3 November 2020

Thank you for your consultation on the above dated 26 October 2020 which was received by Natural England on 26 October 2020

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

Screening Request: Strategic Environmental Assessment

It is our advice, on the basis of the material supplied with the consultation, that, in so far as our strategic environmental interests (including but not limited to statutory designated sites, landscapes and protected species, geology and soils) are concerned, that there are unlikely to be significant environmental effects from the proposed plan.

Neighbourhood Plan

Guidance on the assessment of Neighbourhood Plans, in light of the Environmental Assessment of Plans and Programmes Regulations 2004 (as amended), is contained within the National Planning Practice Guidance. The guidance highlights three triggers that may require the production of an SEA, for instance where:

- a neighbourhood plan allocates sites for development
- the neighbourhood area contains sensitive natural or heritage assets that may be affected by the proposals in the plan
- the neighbourhood plan may have significant environmental effects that have not already been considered and dealt with through a sustainability appraisal of the Local Plan.

We have checked our records and based on the information provided, we can confirm that in our view the proposals contained within the plan will not have significant effects on sensitive sites that Natural England has a statutory duty to protect.

We are not aware of significant populations of protected species which are likely to be affected by the policies / proposals within the plan. It remains the case, however, that the responsible authority should provide information supporting this screening decision, sufficient to assess whether protected species are likely to be affected.

Notwithstanding this advice, Natural England does not routinely maintain locally specific data on all potential environmental assets. As a result the responsible authority should raise environmental issues that we have not identified on local or national biodiversity action plan species and/or habitats, local wildlife sites or local landscape character, with its own ecological and/or landscape advisers, local record centre, recording society or wildlife body on the local landscape and biodiversity receptors that may be affected by this plan, before determining whether an SA/SEA is necessary.

Please note that Natural England reserves the right to provide further comments on the environmental assessment of the plan beyond this SEA/SA screening stage, should the

responsible authority seek our views on the scoping or environmental report stages. This includes any third party appeal against any screening decision you may make.

Habitats Regulations Assessment (HRA) Screening

Natural England agrees with the report's conclusions that the Fulbourn Neighbourhood Plan would not be likely to result in a significant effect on any European Site, either alone or in combination and therefore no further assessment work would be required.

Yours sincerely

Danielle Priestner
Consultations Team

Environment Agency

28 October 2020

Thank you for your consultation.

Environment Agency position.

Due to resource pressures we are no longer able to provide you with comprehensive bespoke advice on pre application enquiries, neighbourhood plans, screening and scoping opinions etc.

Notwithstanding the above I attach a copy of the Agency's 'Planning Application Guidance' (*PAG*) document for the applicant's assistance.

Note to applicant;

Key environmental issues associated with this site will include floodrisk, investigation and remediation plans of any contaminated land, protection of controlled waters, investigation of any historic landfills in the vicinity, and full details of proposed site drainage (surface and foul water including pollution prevention measures). Information regarding these issues is available at www.gov.uk

Anglian Water Services Ltd. should be consulted by the Local Planning Authority and be requested to demonstrate that the sewerage and sewage disposal systems serving the development have sufficient capacity to accommodate the additional flows, generated as a result of the development, without causing pollution or flooding. If there is not capacity in either of the sewers, the Agency must be reconsulted with alternative methods of disposal.

Please note that the views expressed in this letter by the Environment Agency do not represent our final view in relation to any future planning application(s) made in relation to this submission. We reserve the right to change our position in relation to any such application.

Yours faithfully

Mr. T.G. Waddams
Planning Liaison
