

GREATER CAMBRIDGE
SHARED WASTE

Request for Domestic Clinical Waste Collection

(To be completed by a community nurse, practice nurse, consultant or GP)

About the disposal of clinical waste.

Two collection arrangements are available depending on the different types of waste:

- Hygiene Waste that can be collected via the normal rubbish collections. As it is non-infectious it can be placed in your black bin. If all the waste to be disposed of falls into this category you do not need to complete this form.
- Clinical Waste that needs to be collected and disposed of separately via our clinical collection service. This is waste which poses a threat of infection to humans; the term also includes items such as surgical waste, used syringes, drugs or other pharmaceutical products.

How does the collection work?

Filled sacks / sharps boxes are collected from outside the customer’s front door on a weekly basis (minimum) or at a frequency most suitable to your individual needs. New empty sacks being posted through your letterbox or left in a nearby visible location unless these are provided by the health care provider. Sharps boxes should be provided by your health care provider.

Name of applicant	
Address (including Postcode)	
Contact details Phone and email?	

Is the waste generated by a health care professional in the resident's home?

Yes – A health care professional attends home visits.	
No – All waste is self-administered and generated by the individual.	

If **Yes** to a health care professional, it is not the responsibility of the Local Council to provide the clinical waste collection service and the resident should be directed back to their Health Care Provider to arrange disposal.

	Type of waste	Applicable?	Description
